*The far right is back with a vengeance. After several decades at the political margins, far-right politics has again taken center stage. Three of the world's largest democracies – Brazil, India, and the United States – now have a radical right leader, while far-right parties continue to increase their profile and support within Europe. In this timely book, leading global expert on political extremism Cas Mudde provides a concise overview of the fourth wave of postwar far-right politics, exploring its history, ideology, organization, causes, and consequences, as well as the responses available to civil society, party, and state actors to challenge its ideas and influence. What defines this current far-right renaissance, Mudde argues, is its mainstreaming and normalization within the contemporary political landscape. Challenging orthodox thinking on the relationship between conventional and far-right politics, Mudde offers a complex and insightful picture of one of the key political challenges of our time.*

*Deep in the desert there sits a beautiful oasis, ruled by a monarch unlike any other in Erdas. His name is Cabaro the Great Lion and he reigns over a kingdom of animals, jealously guarding his golden talisman. No human has ever set foot in the Great Beasts territory. The journey to his oasis is impossible. As a team of Conor, Abeke, Meilin and Rollan have achieved the impossible before. But now that team is broken the friends scattered by a devastating betrayal. The young heroes and their spirit animals have already sacrificed much in their quest for the talismans. But with the world crumbling all around them and a ruthless enemy opposing their every move their greatest sacrifices are yet to come.*

*From National Book Award Finalist Eliot Schrefre comes the compelling tale of a girl who must save a group of bonobos – and herself – from a violent coup. Congo is a dangerous place, even for people who are trying to do good. When Sophie has to visit her mother at her sanctuary for bonobos, she’s not thrilled to be there. Then Otto, an infant bonobo, comes into her life, and for the first time she feels responsible for another creature. But peace does not last long for Sophie and Otto. When an armed revolution breaks out in the country, the sanctuary is attacked, and the two of them must escape unprepared into the jungle. Caught in the crosshairs of a lethal conflict, they must struggle to keep safe, to eat, and to live. In ENDANGERED, Eliot Schrefre plunges us into a heart-stopping exploration of the things we do to survive, the sacrifices we make to help others, and the tangled geography that ties us all, human and animal, together. The Myth has awakened. It has corrupted friends and stolen spirit animals. It has toppled cities and poisoned the Evertree itself. Working with the red cloaks, the young heroes learn of a plan to destroy this evil forever. But theyll only get one chance. And if they fail, the world will be consumed.*

The vast majority of premature deaths can be prevented through simple changes in diet and lifestyle. In How Not to Die, Dr. Michael Greger, the internationally-renowned nutrition expert,

physician, and founder of NutritionFacts.org, examines the fifteen top causes of premature death in America—heart disease, various cancers, diabetes, Parkinson’s, high blood pressure, and more—and explains how nutritional and lifestyle interventions can sometimes trump prescription pills and other pharmaceutical and surgical approaches, freeing us to live healthier lives. The simple truth is that most doctors are good at treating acute illnesses but bad at preventing chronic disease. The fifteen leading causes of death claim the lives of 1.6 million Americans annually. This doesn’t have to be the case. By following Dr. Greger’s advice, all of it backed up by strong scientific evidence, you will learn which foods to eat and which lifestyle changes to make to live longer. History of prostate cancer in your family? Put down that glass of milk and add flaxseed to your diet whenever you can. Have high blood pressure? Hibiscus tea can work better than a leading hypertensive drug—and without the side effects. Fighting off liver disease? Drinking coffee can reduce liver inflammation. Battling breast cancer? Consuming soy is associated with prolonged survival. Worried about heart disease (the number 1 killer in the United States)? Switch to a whole-food, plant-based diet, which has been repeatedly shown not just to prevent the disease but often stop it in its tracks. In addition to showing what to eat to help treat the top fifteen causes of death, How Not to Die includes Dr. Greger’s Daily Dozen—a checklist of the twelve foods we should consume every day.Full of practical, actionable advice and surprising, cutting edge nutritional science, these doctor’s orders are just what we need to live longer, healthier lives.

Perfect for fans of suspenseful nonfiction such as books by Steve Sheinkin, this is a page-turning narrative about Dietrich Bonhoeffer, a pastor and pacifist who became an unlikely hero during World War II and took part in a plot to kill Hitler. Written by two-time National Book Award finalist Patricia McCormick, author of *Sold* and *Never Fall Down* and coauthor of the young reader’s edition of *I Am Malala*. It was April 5, 1943, and the Gestapo would arrive any minute. Dietrich Bonhoeffer had been expecting this day for a long time. He had put his papers in order—and left a few notes specifically for Hitler’s men to see. Two SS agents climbed the stairs and told the boyish-looking Bonhoeffer to come with them. He calmly said good-bye to his parents, put his Bible under his arm, and left. Upstairs there was proof, in his own handwriting, that this quiet young minister was part of a conspiracy to kill Adolf Hitler. This compelling, brilliantly researched account includes the remarkable discovery that Bonhoeffer was one of the first people to provide evidence to the Allies that Jews were being deported to death camps. It takes readers from his privileged early childhood to the studies and travel that would introduce him to peace activists around the world—evenually putting this gentle, scholarly pacifist on a deadly course to assassinate one of the most ruthless dictators in history. The Plot to Kill Hitler provides fascinating insights into what makes someone stand up for what’s right when no one else is standing with you. It is a question that every generation must answer again and again. With black-and-white photographs, fascinating sidebars, and thoroughly researched details, this book should be essential reading.

*The death of a mother alters forever a family's story of itself. Indeed, it taxes the ability of a family to tell that story at all. The Accounts narrates the struggle to speak with any clear understanding in the wake of that loss. The title poem attempts three explanations of the departure of a life from the earth—a physical account, a psychological account, and a spiritual account. It is embedded in a long narrative sequence that tries to state plainly the facts of the last days of the mother's life, in a room that formerly housed a television, next to a California backyard. The visual focus of that sequence, a robin's nest, poised above the family home, sings in a kind of lament, giving its own version of ways we can see the transformation of the dying into the dead. In other poems, called "Arguments," two voices exchange uncertain truths about subjects as high as heaven and as low as crime. Grief is a problem that cannot be solved by thinking, but that doesn't stop the mind, which relentlessly carries on, trying in vain to settle its accounts. The death of a well-loved person creates a debt that can never be repaid. It reminds the living of our own psychological debts to each other, and to the dead. In this sense, the death of this particular mother and the transformation of this particular family are evocative of a greater struggle against any changing reality, and the loss of all beautiful and passing forms of order.*
