As Arthur Penhaligon seeks to find the seventh key, complete his quest to save the kingdom to which he is heir, and learn his true identity, he discovers that he has a greater purpose than he could have imagined.

Time travelers Jonah and Katherine arrive

in 1611 to rescue John Hudson, son of the explorer Henry Hudson, but soon Jonah and Katherine's knowledge of history is tested once again, and they fear that more is at stake than just one boy's life.

This urgent and eye-opening book makes the case that protecting humanity's future is the central challenge of our time. If all

goes well, human history is just beginning. Our species could survive for billions of years - enough time to end disease, poverty, and injustice, and to flourish in ways unimaginable today. But this vast future is at risk. With the advent of nuclear weapons, humanity entered a new age, where we face existential catastrophes -

those from which we could never come back. Since then, these dangers have only multiplied, from climate change to engineered pathogens and artificial intelligence. If we do not act fast to reach a place of safety, it will soon be too late. Drawing on over a decade of research, *The Precipice* explores the cutting-edge

science behind the risks we face. It puts them in the context of the greater story of humanity: showing how ending these risks is among the most pressing moral issues of our time. And it points the way forward, to the actions and strategies that can safeguard humanity. An Oxford philosopher committed to putting ideas
