In the United States, approximately 14 million people have had cancer and more than 1.6 million new cases are diagnosed each

year. However, more than a decade after the Institute of Medicine (IOM) first studied the quality of cancer care, the barriers to achieving excellent care for all cancer patients remain daunting. Care often is not

## Get Free Rns 510 Navigation System Manual File Type

patient-centered, many patients do not receive palliative care to manage their symptoms and side effects from treatment, and decisions about care often are not based on the latest scientific evidence. The

## Get Free Rns 510 Navigation System Manual File Type

cost of cancer care also is rising faster than many sectors of medicine--having increased to \$125 billion in 2010 from \$72 billion in 2004--and is projected to reach \$173 billion by 2020. Rising costs are making

## Get Free Rns 510 Navigation System Manual File Type

cancer care less affordable for patients and their families and are creating disparities in patients' access to high-quality cancer care. There also are growing shortages of health professionals skilled in

## Get Free Rns 510 Navigation System Manual File Type
