

Robert King

A detailed study of the King's Hall, Cambridge, from its foundation in the early fourteenth century until its dissolution in 1546. It is based largely on the 26 extant volumes of the King's Hall accounts which form one of the most remarkable sequences of medieval collegiate records in Europe. The rich profusion of the material has made it possible to reconstruct the economic, constitutional and business organisation of a medieval academic society, thereby providing for the college that same kind of exhaustive treatment which has been lavished upon other categories of medieval institutions. Dr Cobban discusses the vital contribution made by the King's Hall to the evolution of the University of Cambridge and shows how the interpretation of medieval Cambridge history has to be considerably modified. He demonstrates the important formative influence of the King's Hall in shaping the course of English collegiate development and the ways in which this College was finely attuned to the new educational trends of the age.

The Arthurian epic that began in Mad Merlin continues in Lancelot du Lethe, the story of the greatest knight, paramour, and traitor the Round Table has ever known. The story of Lancelot is one of striving for perfection only to fall short due to the sins of the flesh. But in Lancelot du Lethe the knight is only partially of the mortal realm. He and Guinevere share a mystical bond of which Arthur cannot be a part, for they are both of the bloodline of the fey, immortally destined to be betrothed. This ensuing war of loyalties and love threatens the uneasy peace not just mortal realm but of the entire netherworld of the multipantheons of gods as well. Drawing from Joseph Campbell, and from sources both historical and literary, this is a new take on the story of Camelot's most famous knight, told as only the author of Mad Merlin can. Before the Brothers' War. Before the five colors of magic. Before history itself, the plane of Dominaria was ruled by the Thran. They built machines and artifacts, the likes of which have never since been seen. But amid this civilization, a shadow took root, one that would stretch its arms across space and time. The hideous evil of Phyrexia was born.

Probably the most infamous story in the Sherlock Holmes canon is "The Final Problem" as it relates the facts of the death/murder of the master detective at Reichenbach Falls. On May 4, 1891, the detective met his archenemy Professor Moriarty on a ledge above the falls; the two became locked in a titanic hand-to-hand struggle before both tumbled over the precipice, presumably to their deaths, as witnessed afar by Dr. Watson. The outcry against the death of such a popular character was so great that in 1901 Conan Doyle was forced to give in to the pressure of his fan mail. He resurrected the detective by claiming that Holmes had managed to grab a tuft of grass during the fall into the "dreadful cauldron" and so had lived to solve another mystery. But what really happened that infamous day at Reichenbach Falls and why did

Holmes disappear in the aftermath? And what of the infamous Moriarty? How did a noble mathematician become the Napoleon of Crime? The Shadow of Reichenbach Falls provides these answers and more. It turns out that the events were not just witnessed by Watson but by another young detective of the Victorian era—Carnacki the Ghost Finder. Carnacki rescues an amnesiac gentleman from the base of the falls only to find himself and his companion doggedly pursued by an evil mastermind whose shadowy powers may reach from the bloody crime scenes of White Chapel to far beyond the grave. Filled with Holmesian lore and thrilling encounters evocative of Doyle's work in the Strand magazine, The Shadow of Reichenbach Falls will undoubtedly join the ranks of such successful Holmesian pastiches as The Seven Percent Solution, The West End Horror, and Murder by Decree. In the tradition of The Mists of Avalon and Mythago Wood, J. The bestselling, widely heralded, Jungian introduction to the psychological foundation of a mature, authentic, and revitalized masculinity. Redefining age-old concepts of masculinity, Jungian analysts Robert Moore and Douglas Gillette make the argument that mature masculinity is not abusive or domineering, but generative, creative, and empowering of the self and others. Moore and Gillette clearly define the four mature male archetypes that stand out through myth and literature across history: the king (the energy of just and creative ordering), the warrior (the energy of aggressive but nonviolent action), the magician (the energy of initiation and transformation), and the lover (the energy that connects one to others and the world), as well as the four immature patterns that interfere with masculine potential (divine child, oedipal child, trickster and hero). King, Warrior, Magician, Lover is an exploratory journey that will help men and women reimagine and deepen their understanding of the masculine psyche.

Civilization has now reached a crucial tipping point. Mountains of easy money, leveraged into the stratosphere by unscrupulous dealers in inscrutable financial derivatives, have ensnared entire nations in a web of debt. The nations and financiers are locked in a pushing match. The only unsettled question at this particular juncture is whether the nations will decisively act in the interests of their people and shut down the financial system that is looting the world or whether they will allow the banks to foreclose upon them, thereby effectively ending the era of sovereign nation states and ushering in a banker's global dictatorship. Bible prophecy supplies the answer. Jehovah Himself Has Become King offers a fresh and unique understanding of prophecy from the standpoint of the vital role that Jehovah's Witnesses have played upon the world stage in recent times. But contrary to the Watchtower's prophetic exegesis focused on an invisible parousia for the past nearly 100 years, this work points forward to the visible manifestation of Christ to the chosen ones during the three and one-half year period outlined in the Scriptures as the time of the end.

Time is Running Out! The planeswalker Teferi at last returns to his home plane only to find it devastated and barren. Time itself is fracturing, and it's up to Teferi and his companions to find a way to halt the collapse. It won't be easy when his allies are poised to turn against him. About the Author Scott McGough recently moved to farm country and can now compare the urban, suburban, and agrarian lifestyles. Not surprisingly, his first choice hasn't changed since childhood: all things being equal, he'd rather be down the shore. Scott worked on The Duelist magazine before joining the Creative Team for MAGIC: THE GATHERING®. He worked on almost all the Urza/Phyrexia saga and has since written eight novels and a handful of short stories for MAGIC: THE GATHERING. All this, and yet he has only ever appeared on one Magic card. Though he finds this burden bitter and onerous, he will at least admit that that it's a really good picture. Willie Stark's obsession with political power leads to the ultimate corruption of his gubernatorial administration.

In 1970, a jury convicted Robert Hillary King of a crime he did not commit and sentenced him to 35 years in prison. He became a member of the Black Panther Party while in Angola State Penitentiary, successfully organizing prisoners to improve conditions. In return, prison authorities beat him, starved him, and gave him life without parole after framing him for a second crime. He was thrown into solitary confinement, where he remained in a six-by-nine-foot cell for 29 years as one of the Angola 3. In 2001, the state grudgingly acknowledged his innocence and set him free. This is his story. It begins at the beginning: born black, born poor, born in Louisiana in 1942, King journeyed to Chicago as a hobo at the age of 15. He married and had a child, and briefly pursued a semi-pro boxing career to help provide for his family. Just a teenager when he entered the Louisiana penal system for the first time, King tells of his attempts to break out of this system, and his persistent pursuit of justice where there is none. Yet this remains a story of inspiration and courage, and the triumph of the human spirit. The conditions in Angola almost defy description, yet King never gave up his humanity, or the work towards justice for all prisoners that he continues to do today. From the Bottom of the Heap, so simply and humbly told, strips bare the economic and social injustices inherent in our society, while continuing to be a powerful literary testimony to our own strength and capacity to overcome. The paperback edition includes additional writings from Robert King and an update on the case of the Angola 3.

As the U.S. special envoy for North Korean human rights from 2009 to 2017, Ambassador Robert R. King led efforts to ensure that human rights were an integral part of U.S. policy with North Korea. In this book, he traces U.S. involvement and interest in North Korean human rights, from the adoption of the North Korean Human Rights Act in 2004--legislation which King himself was involved in and which called for the creation of the special envoy position--to his own negotiations with North Korean diplomats over humanitarian assistance, discussions that would ultimately end because of the death of Kim Jong-il and Kim Jong-un's ascension as Supreme Leader, as well as continued nuclear and missile testing. Beyond an in-depth overview of his time as special envoy, Ambassador King provides insights into the United Nations' role in addressing the North Korean human rights crisis, including the UN Human Rights Council's creation of the UN Commission of Inquiry on Human Rights in the DPRK in 2013-14, and discussions in the Security Council on North Korea human rights. King explores subjects such as the obstacles to getting outside information to citizens of one of the most isolated countries in the world; the welfare of DPRK defectors, and how China has both abetted North Korea by returning refugees and enabled the problem of human trafficking; the detaining of U.S. citizens in North Korea and efforts to free them, including King's escorting U.S. citizen Eddie Jun back from Pyongyang in 2011; and the challenges of providing humanitarian assistance to a country with no formal relations with the United States and where separating human rights from politics is virtually impossible.

Destiny Called - They Answered In the dark recesses of Tyria, elder dragons have awoken from millennial slumbers. First came Primordus, which stirred in the Depths forcing the asura to flee to the surface. Half a century later, Jormag awoke and drove the norn from the frozen climes of the Northern Shiverpeaks, corrupting sons and brothers along the way. A generation later, Zhaitan arose in a cataclysmic event that reshaped a continent and flooded the capital of the human nation of Kryta. The races of Tyria stand on the edge of destiny. Heroes have battled against dragon minions, only to be corrupted into service of the enemy. Armies have marched on the dragons and been swept aside. The dwarves sacrificed their entire race to defeat a single dragon champion. The age of mortals may soon be over. This is a time for heroes. While the races of Tyria stand apart, six heroic individuals will come together to fight for their people: Eir, the norn huntress with the soul of an artist; Snaff, the asuran genius, and his ambitious assistant Zojja; Rytlock, the ferocious charr warrior in exile; Caithe, a deadly sylvari with deep secrets; and Logan, the valiant human guardian dealing with divided loyalties. Together they become Destiny's Edge. Together they answer the call. But will it be enough?

The Phyrexian nightmare begins. Dominaria faces its biggest threat—an invasion by its greatest enemy, an attack planned for eons by merciless foes. No one is exempt from their terror. No land is safe from their onslaught. In the shadow of the Phyrexian horde, Dominaria has but one hope—the Weatherlight and her crew. The time has come to defend hearth and home from invasion.

Toward the end of the year 1920 the Government of the United States had practically completed the programme, adopted during the last months of President Winthrop's administration. The country was apparently tranquil. Everybody knows how the Tariff and Labour questions were settled. The war with Germany, incident on that country's seizure of the Samoan Islands, had left no visible scars upon the republic, and the temporary occupation of Norfolk by the invading army had been forgotten in the joy over repeated naval victories, and the subsequent ridiculous plight of General Von Gartenlaube's forces in the State of New Jersey. The Cuban and Hawaiian investments had paid one hundred per cent and the territory of Samoa was well worth its cost as a coaling station. The country was in a superb state of defence. Every coast city had been well supplied with land fortifications; the army under the parental eye of the General Staff, organized according to the Prussian system, had been increased to 300,000 men, with a territorial reserve of a million; and six magnificent squadrons of cruisers and battle-ships patrolled the six stations of the navigable seas, leaving a steam reserve amply fitted to control home waters. The gentlemen from the West had at last been constrained to acknowledge that a college for the training of diplomats was as necessary as law schools are for the training of barristers; consequently we were no longer represented abroad by

incompetent patriots. The nation was prosperous; Chicago, for a moment paralyzed after a second great fire, had risen from its ruins, white and imperial, and more beautiful than the white city which had been built for its plaything in 1893. Everywhere good architecture was replacing bad, and even in New York, a sudden craving for decency had swept away a great portion of the existing horrors. Streets had been widened, properly paved and lighted, trees had been planted, squares laid out, elevated structures demolished and underground roads built to replace them. The new government buildings and barracks were fine bits of architecture, and the long system of stone quays which completely surrounded the island had been turned into parks which proved a god-send to the population. The subsidizing of the state theatre and state opera brought its own reward. The United States National Academy of Design was much like European institutions of the same kind. Nobody envied the Secretary of Fine Arts, either his cabinet position or his portfolio. The Secretary of Forestry and Game Preservation had a much easier time, thanks to the new system of National Mounted Police. We had profited well by the latest treaties with France and England; the exclusion of foreign-born Jews as a measure of self-preservation, the settlement of the new independent negro state of Suanee, the checking of immigration, the new laws concerning naturalization, and the gradual centralization of power in the executive all contributed to national calm and prosperity. When the Government solved the Indian problem and squadrons of Indian cavalry scouts in native costume were substituted for the pitiable organizations tacked on to the tail of skeletonized regiments by a former Secretary of War, the nation drew a long sigh of relief. When, after the colossal Congress of Religions, bigotry and intolerance were laid in their graves and kindness and charity began to draw warring sects together, many thought the millennium had arrived, at least in the new world which after all is a world by itself.

Robert d' Anjou, King of Naples (1309-1343), was a lay preacher. With his sermons, he expressed his piety and erudition, but most importantly, he preached in order to extend his royal office. This study provides an important contribution to the history of lay preaching.

Despite the state of turmoil in the world--with the forest growing out of control, the mountains erupting, the seas boiling, and the plains turning to desert--human civilization finds some relief in the brutal spectacle of the pit fights in which warriors battle to the death before huge crowds. Original.

North Korea is consistently identified as one of the world's worst human rights abusers. However, the issue of human rights in North Korea is a complex one, intertwined with issues like life in the North Korean police state, inter-Korean relations, denuclearization, access to information in the North, and international cooperation, to name a few. There are likewise multiple actors involved, including the two Korean governments, the United States, the United Nations, South Korea NGOs, and global human rights organizations. While North Korea's nuclear weapons and the security threat it poses have occupied the center stage and eclipsed other issues in recent years, human rights remain important to U.S. policy. The contributors to *The North Korean Conundrum* explore how dealing with the issue of human rights is shaped and affected by the political issues with which it is so entwined. Sections discuss the role of the United Nations; how North Koreans' limited access to information is part of the problem, and how this is changing; the relationship between human rights and denuclearization; and North Korean human rights in comparative perspective.

Drawing on new paradigms and evidence-based discoveries in neuroscience, narrative psychology, and creativity theory, *Creative Arts in Counseling and Mental Health* by Philip Neilsen, Robert King, and Felicity Baker explores the beneficial role of expressive arts within a recovery perspective.
