In November 1940 the body of Moll McCarthy, an unmarried mother, was found in a field in Tipperary. She had been shot. The man who reported the discovery was neighbour Harry Gleeson. Although Harry had an alibi, he was swiftly convicted and hanged. This travesty of justice suited the parish priest, the Gardaí, and respectable families whose sons, brothers and husbands had fathered Moll's seven children. The investigation was hijacked and the defence compromised. Neighbours and friends felt intimidated. Moll's daughter Mary, approaching death over fifty years later, became upset and said to a nurse "I saw my own mother shot on the kitchen floor, and an innocent man died". Somewhere in the grounds of Mountjoy Jail lies the body of Harry Gleeson, posthumously pardoned by the State in 2015. This is the story of how and why he was framed and who the guilty parties were.

This unique visual guide charts the fascinating history of tractors and also provides an A-Z reference from around the world.

I am pleased to present the Fifth Edition of the Plastics Engineering Handbook. Last published in 1976, this version of the standard industry reference on plastics processing incorporates the numerous revisions and additions necessitated by 14 years of activity in a dynamic industry. At that last printing, then-SPI President Ralph L. Harding, Jr. anticipated that plastics production would top 26 billion pounds in 1976 (up from 1.25 billion in 1947, when the First Edition of this book was issued). As I write, plastics production in the United States had reached almost 60 billion pounds annually. Indeed, the story of the U.S. plastics industry always has been one of phenomenal growth and unparalleled innovation. While these factors make compilation of a book such as this difficult, they also

make it necessary. Thus I acknowledge all those who worked to gather and relate the information included in this 1991 edition and thank them for the effort it took to make the Plastics Engineering Handbook a definitive source and invaluable tool for our industry.
