Simple Heuristics That Make Us Smart  
invites readers to embark on a new  
journey into a land of rationality that  
differs from the familiar territory of  
cognitive science and economics.

Traditional views of rationality tend to  
see decision makers as possessing  
superhuman powers of reason, limitless  
knowledge, and all of eternity in which to  
ponder choices. To understand decisions  
in the real world, we need a different,

## Read Free Rpmt Previous Year Papers

more psychologically plausible notion of rationality, and this book provides it. It is about fast and frugal heuristics--simple rules for making decisions when time is pressing and deep thought an unaffordable luxury. These heuristics can enable both living organisms and artificial systems to make smart choices, classifications, and predictions by employing bounded rationality. But when and how can such fast and frugal heuristics work? Can judgments based simply on one good reason be as accurate as those based on many reasons? Could less knowledge even lead to systematically better predictions than more knowledge? Simple Heuristics explores these questions, developing computational models of heuristics and testing them through experiments and analyses. It shows how fast and frugal heuristics can produce adaptive decisions

in situations as varied as choosing a mate, dividing resources among offspring, predicting high school drop out rates, and playing the stock market. As an interdisciplinary work that is both useful and engaging, this book will appeal to a wide audience. It is ideal for researchers in cognitive psychology, evolutionary psychology, and cognitive science, as well as in economics and artificial intelligence. It will also inspire anyone interested in simply making good decisions.

Jim Grant was a visionary leader on a global scale. As Executive Director of UNICEF, the United Nations Children's Fund, from 1980 to 1995, he launched a worldwide child survival and development revolution. The practical result was that by 1995, 25 million children were alive who would otherwise have died. Millions more were living with

month in this magazine. Can Community Development Financial Institutions (CDFIs) get unlimited amounts of low cost, unsecured, short- and long-term funding from the capital markets based on their organizational credit risk? Can they get pricing, flexibility, and procedural parity with for-profit corporations of equivalent credit risk? One of the key objectives of this book is to explain the reasons why the answer to the two questions above remains "no." The other two key objectives are to
