Designed to suit a variety of two or three credit courses and seminars, the casebook is being used to teach (1) courses in "securities litigation" that examine litigation topics under the Exchange Act and the Securities Act; (2) courses in "securities enforcement" that center on SEC and criminal enforcement, market manipulation, insider trading, and the professional responsibilities of attorneys and accountants; and (3) more specialized courses or seminars that build around the theme of "current topics in securities litigation."

"The Delaware State Constitution is the first state constitution drafted by a convention composed of popularly elected representatives, and it is rich with history and tradition. The Delaware Bill of Rights has remained almost exactly the same since 1792, and it has enacted specific provisions whereby its three branches of government operate differently from the federal system. [This book provides a] constitutional and historical account of the state's basic governing charter. In it, [the author] begins with an overview of Delaware's constitutional history. He then provides an in-depth, section-by-section analysis of the entire constitution, detailing important changes that have been made over the years. . . . This second edition includes all amendments to the Delaware Constitution since 2002 and all significant court decisions interpreting any provision in the Delaware Constitution that have been issued since 2002."

Patent Ethics: Prosecution serves as an essential guide to the ethical issues arising in the course of the patent prosecution process. By providing relevant rules and case law, it allows practitioners to identify ethical problems before they arise and to address them most effectively when they do. Patent Ethics: Prosecution is the first of two volumes on patent ethics--the second is on litigation--written by Professor David Hritik and Drinker Biddle partner Mercedes Meyer. This treatise is the first of its kind to combine the United State Patent and Trademark Office (PTO) rules with commentary by the authors, which distills the authors' own experience and expertise in patent prosecution into effective practice strategies.

"Sustainability" is quickly becoming a household word in the United States. Public alarm over climate change has helped to make sustainable development a major public policy issue and a topic of growing importance in the daily lives of Americans. This book is a comprehensive assessment of U.S. progress toward sustainable development and a roadmap of necessary next steps toward achieving a sustainable America. Packed with facts, figures, and the well-informed opinions of forty-one experts, it provides an illuminating "snapshot" of sustainability in the United States today. And each of the contributors suggests where we need to go next, recommending three to five specific actions that we should take during the next five to ten years. It thus offers a comprehensive agenda that citizens, corporations, nongovernmental organizations, and government leaders and policymakers can use to make decisions today and to plan for the future. Sustainable development holds enormous promise for improving the quality of life for Americans over the coming decades. Agenda for a Sustainable America describes what we need to do to make the promise a reality. It assesses trends in twenty-eight separate areas of American life—including forestry; transportation; oceans and estuaries; religion; and state, local, and national governance. In every area, contributors reveal what sustainable development could mean, with suggestions that are specific, desirable, and achievable. Their expert recommendations point the way toward greater economic and social well-being, increased security, and environmental protection and restoration for current and future generations of Americans. Together they build a convincing case for how sustainable development can improve our opportunities and our lives.

Written by leading scholars and judges in the field, the Research Handbook on Representative Shareholder Litigation is a modern-day survey of the state of shareholder litigation. Its chapters cover securities class actions, merger litigation, derivative suits, and appraisal litigation, as well as other forms of shareholder litigation. Through in-depth analysis of these different forms of litigation, the book explores the agency costs inherent in representative litigation, the challenges of multijurisdictional litigation and disclosure-only settlements, and the rise of institutional investors. It explores how related issues are addressed across the globe, with examinations of shareholder litigation in the United States, Canada, the United Kingdom, the European Union, Israel, and China. This Research Handbook will be an invaluable resource on this important topic for scholars, practitioners, judges and legislators.

The scope of what qualifies as environmental litigation is huge, while at the same time, this area is growing rapidly as a result of evolving issues such as climate change litigation. The authors examine the most critical issues in specialized litigation, including global climate change, litigating government enforcement matters in both the civil and criminal context, citizen-suit actions, toxic tort and pesticide litigation, natural resources damages claims, and insurance as a source of recovery.

This newly updated directory describes 190 ABA-approved law schools as well as a selection of non-ABA-approved schools. Each profile presents admission requirements, the latest tuition figures and related fees, career placement services offered to graduates, and much more. A multi-page table lists each law school's median LSAT scores achieved by incoming students and summarizes each school's admission requirements. A section focusing on general advice for prospective law school students discusses ways to choose the best law school to fit each individual's needs and advises on how to get through the often-tough school admission process. The typical law school environment is also described with emphasis on its competitive atmosphere.

Over the past few decades, significant changes have occurred across capital markets. Shareholder activists have become more prominent, institutional investors have begun to wield more power, and intermediaries like investment advisory firms have greatly increased their influence. These changes to the economic environment in which corporations operate have outpaced changes in basic corporate law and left corporations uncertain of how to respond to the new dynamics and adhere to their fiduciary duties to stockholders. With The Corporate Contract in Changing Times, Steven Davidoff Solomon and Randall Stuart Thomas bring together leading corporate law scholars, judges, and lawyers from top corporate law firms to explore what needs to change and what has prevented reform thus far. Among the topics addressed are how the law could be adapted to the reality that activist hedge funds pose a more serious threat to corporations than the hostile takeovers and how statutory laws, such as the rules governing appraisal rights, could be reviewed in the wake of appraisal arbitrage. Together, the contributors surface promising paths forward for future corporate law and public policy.

The author examines the structure of the corporate charter market, the impact of takeover regulation and federal securities law, and the spreading of criminalization of corporate duties.

Indonesia's wealth of natural resources is being exploited at breakneck speed, and environmental awareness and knowledge among the populace is limited. This book examines how young people learn about the environment to see how education can help to develop environmental awareness and avert vast environmental destruction, not only in Indonesia, but also in the Global South more generally. Based on in-depth studies conducted in the cities of Yogyakarta and Surabaya, complemented with surveys of students in secondary schools, Environmental Education in Indonesia examines educational curricula, pedagogy and "green" activities to reveal what is currently being done in schools to educate children about the environment. The book investigates the shortcomings in environment education, including underqualified teachers, the civil service mentality, the still-pervasive chalk-and-talk pedagogy and the effect of the examination system. It also analyses the role of local government in supporting (or not) environmental education, and the contribution of environmental NGOs. The book establishes that young people are not currently being exposed to effective environmental education, and the authors propose that the best and most culturally appropriate way forward in Indonesia is to frame pro-environment behaviour and responsibility as a form of citizenship, and specifically that environmental education should be taught as a separate subject. This book will be of great interest to students and scholars of contemporary Indonesia and Southeast Asia.

Because it is the corporate domicile of choice in the United States, Delaware produces and implements the substantive laws governing internal affairs for most of our nation's corporations – large and small. As a result, most battles concerning the application of those laws are waged in Delaware courts. In Corporate and Commercial Practice in the Delaware Court of Chancery, you'll profit from the singular insight and firsthand experience of two of the court's leading practitioners. You'll quickly find out why the Court of Chancery is to corporate litigation what the Delaware General Corporation Law is to the nation's corporate community. And most important, you'll learn about numerous topics never before explored in such a comprehensive manner. Inside you'll find key coverage of:
• Jurisdiction, venue and service
• Motions practice
• Multijurisdictional litigation
• Depositions and discovery
• Privileges and immunities
• Defenses, remedies and appeals
• Costs and attorneys fees
• And much more.

On April 28, 2004, 60 Minutes II broadcast the now-infamous photos of prisoner abuse by American soldiers at Abu Ghraib. The news quickly spread worldwide, undermining the U.S. presence in Iraq. Despite several Department of Defense investigations and eleven courts-martial convictions, important questions remain about the events at Abu Ghraib. Who are these soldiers? How involved were top administration officials and army generals in the abuses? Were the soldiers simply following orders? Do these photographs depict a new American interrogation policy? Christopher Graveline and Michael Clemens provide the answers. No one has investigated the true story behind the events at Abu Ghraib as thoroughly as the authors. Only six people had complete knowledge of the Abu Ghraib investigation and prosecutions; Graveline and Clemens are two of them. They give readers unprecedented access to the inner workings of the investigation leading to the trials of PFC Lynndie England, Cpl. Charles Graner, and others. Complete with actual arguments of counsel, testimony, and evidence, this groundbreaking book puts the reader in the middle of the investigation and the subsequent trials, revealing one of the darker episodes in American military history.

Education and Technology for a Better World was the main theme for WCCE 2009. The conference highlights and explores different perspectives of this theme, covering all levels of formal education as well as informal learning and societal aspects of education. The conference was open to everyone involved in education and training. Additionally players from technological, societal, business and political fields outside education were invited to make relevant contributions within the theme: Education and Technology for a Better World. For several years the WCCE (World Conference on Computers in Education) has brought benefits to the fields of computer science and computers and education as well as to their communities. The contributions at WCCE include research projects and good practice presented in different formats from full papers to posters, demonstrations, panels, workshops and symposiums. The focus is not only on presentations of accepted contributions but also on discussions and input from all participants. The main goal of these conferences is to provide a forum for the discussion of ideas in all areas of computer science and human learning. They create a unique environment in which researchers and practitioners in the fields of computer science and human learning can interact, exchanging theories, experiments, techniques, applications and evaluations of initiatives supporting new developments that are potentially relevant for the development of these fields. They intend to serve as reference guidelines for the research community.

More than 180 ABA-approved laws schools across the United States are described, with information on admission requirements, degree requirements, tuition and fees, sources of financial aid, and career placement services. The book also features 20 pages in table form listing each law school with statistics on its median LSAT (Law School Admission Test) scores and other admission requirements, thus enabling candidates to estimate in advance their chances of admission to each school. Also helpful are a general overview of law school curricula and a brief description of selected non-ABA-approved schools. A sample LSAT is included with answers and explanations.

Shareholder litigation and class action suits play a key role in protecting investors and regulating big businesses. But Directors and Officers liability insurance shields corporations and their managers from the financial consequences of many illegal acts, as evidenced by the recent Enron scandal and many of last year's corporate financial meltdowns. Ensuring Corporate Misconduct demonstrates for the first time how corporations use insurance to avoid responsibility for corporate misconduct, dangerously undermining the impact of securities laws. As Tom Baker and Sean J. Griffith demonstrate, this need not be the case. Opening up the formerly closed world of corporate insurance, the authors interviewed people from every part of the industry in order to show the different instances where insurance companies could step in and play a constructive role in strengthening corporate governance—yet currently do not. Ensuring Corporate Misconduct concludes with a set of readily implementable reforms that could significantly rehabilitate the system.
