Can education be run as a profitable business and still be driven by a humanitarian vision? SABIS shows the answer is yes. Now with 60

schools in 15 countries and over 60,000 students, SABIS is a global education company committed to improving lives. The book is a journey through time - tracing the company from its humble origins in 1886 Mount Lebanon, through the civil war to the present day. It's also a journey through geographies, from Kurdistan to Katrina - from the first international schools in war-torn northern Iraq, to the first charter school to reopen after the hurricane devastated inner city New Orleans. SABIS goes where other educational providers are unwilling to tread, helping to rebuild lives shattered by war and natural disaster. It's finally a journey through the minds of committed educators, watching as they grapple with the fundamental question of how we educate young people in the virtues that have stood the test of time, whilst still enabling them to be prepared for a future of unknown possibilities.

Featured in Writer's Digest, Kirkus Reviews, Hypable, and MuggleNet. "A spunky and jubilant love letter to superhero fans." -Kirkus Reviews Power. Courage. Invincibility. The marks of a true hero. Meg Sawyer has none of these things. Meg has never stopped a moving bus with her bare hands, been bitten by a radioactive insect, or done anything moderately resembling saving the world. She doesn't have to. She's a background citizen, a nobody, one of the swarms of faceless civilians of Lunar City--where genetically enhanced superhumans straight out of the comics have thwarted evil for years. For as long as the Supers have existed, Meg has had one goal: to not become a casualty in their near-daily battles for justice. And for the last seventeen years, she's managed to do just that. Sure, her minimum-wage job at the local coffee shop isn't great, she can't even leave her apartment without loading herself up with protective gear, and her car was just hijacked to throw at a supervillain (again), but she's not dead yet. But when Meg accidentally finds one of the city's perfect, invincible protectors murdered under extremely suspicious circumstances, her whole "innocent bystander" strategy falls apart. After being coerced by his determined girlfriend into a mission to help prevent the deaths of the remaining Supers, Meg finds herself forced into the foreground of a story she never wanted to be part of--one that challenges everything she thought she knew about both her city and herself. In the mid-nineties, the Alfred Glickman School was just another failing school in one of America's most violent cities. Then SABIS, a private, for-profit education provider, took over. Twenty years later, the school is a six-time silver medalist in U.S. News & World Report's annual "America's Best High Schools" listing, and every single graduate of the school has been offered a college place. With success of this magnitude, you would think that for-profit managed charter schools like SABIS would be in high demand. On the contrary, they are fought at every turn. Why is the idea of employing for-profit companies to help rescue failing public schools treated with fear and hostility? Stranger still, why does a nation built on free enterprise refuse to embrace a free market strategy when so many students and schools would clearly benefit and with so much at stake? Last Bell is a book about politics, money and power. It examines the charge that for-profits running charter schools are in it for the money, not the kids, and reveals the real motives of those spreading these ideas and why they fight private sector involvement in public schools. Last Bell is a reasonable voice in a polarized debate. It does not call for an end to public schools but rather imagines a future in which private companies help create a competitive market for public education to boost performance, turn derelict schools into centers of excellence and give parents even in the worst neighborhoods real choice and their children a future.

The classic ghost story from Penelope Lively, one of the modern greats of British fiction for adults and children alike. When James' family moves to a ancient cottage in Oxfordshire (with grounds that are great for excavations and trees that are perfect for climbing), it doesn't take long for odd things to start happening. Doors crash open and strange signs appear, written in an archaic hand.

James soon discovers the culprit: a ghost! It's the spirit of Thomas Kempe, a 17th century apothecary who wants James to be his apprentice. The problem? No one else believes in ghosts. It's up to James to get rid of him... An iconic ghost story for children, The

Ghost of Thomas Kempe is adored by generations of readers.

Teachers make a difference. The success of any plan for improving educational outcomes depends on the teachers who carry it out and thus on the abilities of those attracted to the field and their preparation. Yet there are many questions about how teachers are being prepared and how they ought to be prepared. Yet, teacher preparation is often treated as an afterthought in discussions of improving the public education system. Preparing Teachers addresses the issue of teacher preparation with specific attention to reading, mathematics, and science. The book evaluates the characteristics of the candidates who enter teacher preparation programs, the sorts of instruction and experiences teacher candidates receive in preparation programs, and the extent that the required instruction and experiences are consistent with converging scientific evidence. Preparing Teachers also identifies a need for a data collection model to provide valid and reliable information about the content knowledge, pedagogical competence, and effectiveness of graduates from the various kinds of teacher preparation programs. Federal and state policy makers need reliable, outcomes-based information to make sound decisions, and teacher educators need to know how best to contribute to the development of effective teachers. Clearer understanding of the content and character of effective teacher preparation is critical to improving it and to ensuring that the same critiques and questions are not being repeated 10 years from now.

The first English-language biography of the de facto ruler of the late Ottoman Empire and architect of the Armenian Genocide, Talaat Pasha (1874-1921) led the triumvirate that ruled the late Ottoman Empire during World War I and is arguably the father of modern Turkey. He was also the architect of the Armenian Genocide, which would result in the systematic extermination of more than a million people, and which set the stage for a century that would witness atrocities on a scale never imagined. Here is the first biography in English of the revolutionary figure who not only prepared the way for Ataturk and the founding of the republic in 1923, but who shaped the modern world as well. In this explosive book, Hans-Lukas Kieser provides a mesmerizing portrait of a man who maintained power through a potent blend of the new Turkish ethno-nationalism, the political Islam of former Sultan Abdulhamid II, and a readiness to employ radical "solutions" and violence. From Talaat's role in the Young Turk Revolution of 1908 to his exile from Turkey and assassination--a sensation in Weimar Germany--Kieser restores the Ottoman drama to the heart of world events. He shows how Talaat wielded far more power than previously realized, making him the de facto ruler of the empire. He brings wartime Istanbul vividly to life as a thriving diplomatic hub, and reveals how Talaat's cataclysmic actions would reverberate across the twentieth century. In this major work of scholarship, Kieser tells the story of the brilliant and merciless politician who stood at the twilight of empire and the dawn of the age of genocide.
