Sailboat Buying Guide For Cruisers. What's the scoop?! We want you to get the right boat for the right value so that you can make your *sailboat and sailing dream come true. And we're hoping that during the course of your sailboat buying journey, that we can help to entertain, educate, inspire and eventually connect with you at a beautiful tropical anchorage. Note: if your plans are to sail to the Arctic we'll have to skip the idea of physically meeting. We don't do cold...This is who we are...If you haven't bumped into us before - My family consists of my husband Simon (British), my daughter, Sienna (age 9 at the time of writing) and me - I'm Kim (American). In 2013 my family and I sold all our possessions, purchased our sailboat Britican (British and American put together) and headed out to sea. The rat race wasn't working for us so we decided to find another way to live.We've been sailing around the world ever since. So far we've sailed over 30,000 miles and that includes circumnavigating the Mediteranean, crossing the Atlantic Ocean (took 18 days), enjoying our way up the Caribbean Islands, taking a break from sailing (but not the boat) in Charleston, South Carolina and we've most recently sailed back down the Caribbean island chain all the way to Trinidad and Tobago. And 'no' we did not have loads of sailing experience before we left land.So let me tell you why I wrote this guide for you...The sailing community is full of great people. The people who work in the sailing industry (boat brokers, sailing service professionals, marina managers, etc.), however, are often disingenuous, corrupt people. New and old sailors are getting ripped off all the time. And the place where they get ripped off the most is when they purchase a boat. So, a big issue that new sailboat owners have to contend with is paying way too much for a boat and/or getting a boat that isn't in the condition as advertised or expected. The next biggest issue is information overload. There's so much information nowadays that it's hard to figure out what you need to know and when you need to know it. That goes for buying a sailboat and transitioning into the cruising lifestyle. Buying a sailboat is NOT like buying a car or a house. In both those cases, the consumer is far more protected. In this one-of-a-kind book, leading boat designer Roger Marshall walks you through the process of choosing the perfect boat for your sailing lifestyle. Along the way, you will acquire a deep understanding of the many factors that go into a boat's performance, comfort, and seaworthiness, and learn how to choose among them to meet your requirements and preferences. Best of all, you'll find Marshall's 12-page comparison table of production sailboats from all over the world, packed with information about 130 boats - length, beam, draft, displacement, ballast, sail area, fuel and water capacities, performance ratios, capsize and comfort ratios, and more, all tabulated for convenient and revealing comparisons.

This book contains classic material dating back to the 1900s and before. The content has been carefully selected for its interest and relevance to a modern audience.

Since the late 1950s, when the first "plastic" sailboat shocked the New York Boat Show, fiberglass boatbuilding has gone through classic growing pains. Longtime yacht broker and marine surveyor Henry Mustin has seen it all: the slow acceptance of those early, heavy boats; the market boom of the lighter boats of the 1970s; the "boat pox" scare of the 1980s; and the continued lack of industry standards that makes buying and owning a fiberglass boat an adventure. In Surveying Fiberglass Sailboats Mustin explains what to watch for in a used sailboat from each era, and how to ferret out the hidden defects in any boat. He shows how to estimate the cost of repairs and the value of a boat. And he addresses the question: When is a fiberglass boat too used up to save? Mustin's part-by-part look at hull, deck, rig, and machinery is both a minicourse for transforming used-boat shopping from a game of craps to a science, and the first step in a holistic boat maintenance program. His discussion of the significance of cracks found in aging hulls and decks is the most thorough in print. He is not shy in assessing the lack of regulation of professional surveyors, nor does he shrink from pointing a finger at shoddy building practices. Having a used boat surveyed is a critical prelude to buying it. Yet a professional survey is expensive--several hundred dollars. Surveying Fiberglass Sailboats will enable you to conduct your own surveys while narrowing the field, then monitor a professional surveyor's performance when selecting your target boat. The inside story on surveying fiberglass boats. No sailor should be without it. Praise for Surveying Fiberglass Sailboats: "A concisely written primer for sailors considering purchasing a used boat, preparing for extended cruising, or seeking guidelines for an ongoing maintenance program. . . . Mustin is adept at distilling often highly involved subjects, so you should be able to learn the fundamentals of evaluating a vessel's major structures, systems, and equipment."--SAIL "Thoroughly studying this book will enable you to inspect your own boat, identify problems and formulate an effective maintenance program. Plus, if you plan to buy either a used or new fiberglass sailboat, this book should help you reduce your cost."--Ensign ". . . long-time professional boat surveyor Mustin shares his experience in a compact, easy-to-reference handbook . . . This slender volume provides the foundation for a holistic boat maintenance program, making it as valuable for owners as it is for buyers."--Rhode Island Boating I would like to have had Surveying Fiberglass Sailboats . . . when I was in the market for a boat . . . Mustin takes prospective buyers on a detailed tour of boat materials, structures, rigging systems and construction techniques, illustrating . . . the potential weaknesses to watch out for--anything from blisters and stress cracks to corrosion."--Grand Rapids Press
