WEEKLY PLANNER | GET THE MOST OUT OF YOUR LIFE "Think of a ship with the complete voyage mapped out and planned. The captain and crew know exactly where the ship is going and how long it will take - it has a definite goal. And 9,999 times out of 10,000, it will get there. Now let's take another ship and just like the first and only let's not put a crew on it, or a captain at the helm. Let's give it no aiming point, no goal, and no destination. We just start the engines and let it go. I think you'll agree that if it gets out of the harbor at all, it will either sink or wind up on some deserted beach and a derelict. It can't go anyplace because it has no destination and no guidance. It's the same with a human being." ~ Earl Nightingale If you seek better organization you're sailing in the right direction. This no nonsense organizer is a great way to collect your thoughts and plan for the days activities. This means you'll be prepared for the days activities and more successful in your efforts. WEEKLY PLANNER | GET MORE OUT OF LIFE "Think of a ship with the complete voyage mapped out and planned. The captain and crew know exactly where the ship is going and how long it will take - it has a definite goal. And 9,999 times out of 10,000, it will get there. Now let's take another ship and just like the first and only let's not put a crew on it, or a captain at the helm. Let's give it no aiming point, no goal, and no destination. We just start the engines and let it go. I think you'll agree that if it gets out of the harbor at all, it will either sink or wind up on some deserted beach and a derelict. It can't go anyplace because it has no destination and no guidance. It's the same with a human being." ~ Earl Nightingale If you seek better organization you're sailing in the right direction. Standing as a summary of Spalinger's ideas at the time of the Yale lectures in 2012, this study covers two research sides of modern Egyptological research by a life-long student of ancient Egyptian calendrics and the Egyptian military. The first three chapters cover the development of Richard Parker's seminal study from 1950 and move into the present stage of scholarship. Very important is the author's clarification of what Yarker wrote in his paradigmatic work, a slim volume often misunderstood. Hence, the thrust of argument concentrates upon the dating of feasts, the names of the Egyptian months and their metamorphoses, in addition to the retention of lunar-based phenomena. Two final chapters turn to the military aspects of New Kingdom warfare, with emphasis placed upon Set I and logistical arrangements.

The archives are generally sites where historians conduct research into our past. Seldom are they objects of research. Sabyasachi Bhattacharya traces the path that led to the creation of a central archive in India, from the setting up of the Imperial Record Department, the precursor of the National Archives of India, and the Indian Historical Records Commission, to the framing of archival policies and the change in those policies over the years. In the last two decades of colonial rule in India, there were anticipations of freedom in many areas of the public sphere. These were felt in the domain of archiving as well, chiefly in the form of reversal of earlier policies. From this perspective, Bhattacharya explores the relation between knowledge and power and discusses how the World Wars and the decline of Britain, among other factors, effected a transition from a Eurocentric and disparaging approach to India towards a more liberal and less ethnocentric one.
