

Salk Gov Ae

In this edited volume, academics and practitioners from various disciplines investigate the challenges, opportunities and frameworks in the implementation of Smart Cities in the Gulf.The volume presents insightful analyses and identifies key lessons learned through case studies covering four main themes including smart city frameworks and governance, resources and infrastructure, information and communication technologies, and the social perspective. In doing so, the book provides policy recommendations related to smart governance, as well as overall frameworks that cities can adopt in their process of transition, and knowledge that is integral to bridge the gap between various stakeholders in the Smart City milieu. This edited volume comprises extended versions of papers presented at a workshop held at the University of Cambridge, UK titled “Smart Cities in the GCC: Current State, Opportunities and Challenges.”

Berlitz Pocket Guide Dubai is a concise, full-colour travel guide that combines lively text with vivid photography to highlight the very best that this ever-changing city has to offer. The Where To Go chapter details all the key sights, from modern icons such as the seven-star Burj Al Arab and the world's tallest building, the Burj Khalifa, to the more traditional attractions such as the Gold Souk and historic Bastakiya. There are also excursions into the desert, Al Ain and even nearby Abu Dhabi. Handy maps on the cover help you get around with ease. To inspire you, the book offers a rundown of the Top 10 attractions in the city, followed by an itinerary for a Perfect Day in Dubai. The What to Do chapter is a snapshot of ways to spend your spare time, including shopping in the city's opulent malls and atmospheric souks, taking in the horse racing and hitting Dubai's famous clubs and bars. You'll also be armed with background information, including a brief history of the city and an Eating Out chapter covering its cosmopolitan cuisine. There are carefully chosen listings of the best hotels and restaurants, and an A-Z to equip you with all the practical information you will need.

Lonely Planet's Oman, UAE & the Arabian Peninsula is your most up-to-date advice on what to see and skip, and what hidden discoveries await you. Feel the desert's allure in Sharqiya Sands, dine at the top of the world's tallest building, and see the masterpieces of the Museum of Islamic Art –all with your trusted travel companion.

“The Human Hand as an Inspiration for Robot Hand Development” presents an edited collection of authoritative contributions in the area of robot hands. The results described in the volume are expected to lead to more robust, dependable, and inexpensive distributed systems such as those endowed with complex and advanced sensing, actuation, computation, and communication capabilities. The twenty-four chapters discuss the field of robotic grasping and manipulation in light of the human hand’s capabilities and push the state-of-the-art in robot hand design and control. Topics discussed include human hand biomechanics, neural control, sensory feedback and perception, and robotic grasp and manipulation. This book will be useful for researchers from diverse areas such as robotics, biomechanics, neuroscience, and anthropologists. Written with students of aerospace or aeronautical engineering firmly in mind, this is a practical and wide-ranging book that draws together the various theoretical elements of aircraft design – structures, aerodynamics, propulsion, control and others – and guides the reader in applying them in practice. Based on a range of detailed real-life aircraft design projects, including military training, commercial and concept aircraft, the experienced UK and US based authors present engineering studies using an essential toolkit and reference to support their own project work. All aircraft projects are unique and it is impossible to provide a template for the work involved in the design process. However, with the knowledge of the steps in the initial design process and of previous experience from similar projects, students will be freer to concentrate on the innovative and analytical aspects of their course project. The authors bring a unique combination of perspectives and experience to this text. It reflects both British and American academic practices in teaching aircraft design. Lloyd Jenkinson has taught aircraft design at both Loughborough and Southampton universities in the UK and Jim Marchman has taught both aircraft and spacecraft design at Virginia Tech in the US. * Demonstrates how basic aircraft design processes can be successfully applied in reality * Case studies allow both student and instructor to examine particular design challenges * Covers commercial and successful student design projects, and includes over 200 high quality illustrations

This unique textbook provides a concise and practical approach to clinical dilemmas involving the liver, pancreas, and biliary tree. Six major sections encompass (1) Hepatic, (2) Biliary, (3) Pancreas, (4) Transplantation, (5) Trauma, and (6) Innovative Technology. Each topic is written by recognized experts from an “experiential”e; viewpoint combined with evidence-based medicine. The book contains over 170 chapters and over 350 contributors. It is relevant to Surgical Oncologists, Hepato-Pancreato-Biliary (HPB) Surgeons, Transplant Surgeons, Traumatologists, HPB Interventionalists, General Surgeons, and trainees and students. The title of each chapter is in a form of a clinical scenario and each chapter begins with a Case Scenario and ends with Salient Points. Special debates are included in each section. There are also interesting images, detailed illustrations, comprehensive tables, thorough algorithms, and other adjunctive tools that enhance learning. The authors emanate from different corners of the world. The book is a valuable resource for faculty, students, surgical trainees, fellows, and all health care providers in the HPB/Trauma/Transplant/Oncology fields.

The Indian Listener (fortnightly programme Journal of AIR in English) published by The Indian State Broadcasting Service,Bombay ,started on 22 december, 1935 and was the successor to the Indian Radio Times in english, which was published beginning in July 16 of 1927. From 22 August 1937 onwards, it was published by All India Radio,New Delhi.In 1958, it was turned into a weekly journal. Later, The Indian listener became “Akashvani” in January 5, 1958. It was made a fortnightly again on July 1,1983. It used to serve the listener as a Bradshaw of broadcasting ,and give listener the useful information in an interesting manner along with programmes,who writes them,take part in them and produce them along with photographs of performing artists. It also contains the information of major changes in the policy and service of the organisation. Lady Fatima Masuma (a) was the daughter of the 7th Imam, Imam Musa al-Kadhim (a), and the sister of the 8th Imam, Imam Ali al-Rida (a). She was a noble lady who dedicated her life to Islam and Allah. She is buried in the city of Qum in Iran. This book includes her biography, education, and narrationof traditions. It also includes the history and description of her shrine and a brief look at the city of Qum.This book is one of the many Islamic publications distributed by Ahlulbayt Organization throughout the world in different languages with the aim of conveying the message of Islam to the people of the world. Ahlulbayt Organization (www.shia.es) is a registered Organization that operates and is sustained through collaborative efforts of volunteers in many countries around the world, and it welcomes your involvement and support.

Its objectives are numerous, yet its main goal is to spread the truth about the Islamic faith in general and the Shi`a School of Thought in particular due to the latter being misrepresented, misunderstood and its tenets often assaulted by many ignorant folks, Muslims and non-Muslims. Organization’s purpose is to facilitate the dissemination of knowledge through a global medium, the Internet, to locations where such resources are not commonly or easily accessible or are resented, resisted and fought! In addition, For a complete list of our published books please refer to our website (www.shia.es) or send us an email to info@shia.es

The chapters in this edited volume explore the sociolinguistic implications of orthographic and scriptural practices in a diverse range of communicative contexts, ranging from schoolrooms to internet discussion boards. The focus is on the way that scriptural practices both index and constitute social hierarchies, identities and relationships and in some cases, become the focus for public language ideological debates. Capitalizing on the now robust body of literature on orthographic choice and debate in sociolinguistics and anthropological linguistics, the volume addresses a number of cross-cutting themes that connect orthographic practices to areas of contemporary interest in sociolinguistics and linguistic anthropology. These themes include: the different social implications of self vs. other representation and the permeability of the personal/social and the public/private; how scriptural practices (“inscription”) serve as sites for social discipline; the historical and intertextual frameworks for the meaning potentials of orthographic choice (relating to issues of genre and style); and writing as a broader semiotic field: the visual and esthetic dimensions of texts and metalinguistic “play” in spelling and its ambiguous implications for wider states.

The comparison of established methods in surgery is necessary in order to evaluate the advantages or disadvantages of each. We have therefore tried to include discussions of all the problems which arise in the treat ment of long-gap esophageal atresia. The long-term results of different types of colonic interposition, of different ‘stretching’ procedures, and of simple staged surgery seemed especially worthy of discussion. It was also important to describe the role of complications caused by special pathology of the trachea in esophageal atresia and their management. Second, new problems continue to arise with regard to the prenatal diagnosis of malformations. These new aspects will continue to exert an influence on our surgical field. Malformations pose severe problems for parents, the growing fetus, and the doctors and are lasting burdens on our task. PETER WURNIG, Vienna Contents I. Long-gap Esophageal Atresia Current Surgical Strategies in Long-gap Esophageal Atresia with Regard to Endoscopy Anastomosis. D. Boob and J. Kotlarski. This book is designed to present a comprehensive and state-of-the-art approach to the diagnosis and surgical management of parasitic diseases involving different organ systems, with emphasis on the gastrointestinal tract. It is divided into five parts that address the various etiologies, current diagnostic dilemmas and methods, as well as the key principles involved in their surgical management. The introduction presents the overall epidemiology and classification of parasitic diseases, followed by chapters that focus on different types of the most frequently encountered parasitic diseases of the gastrointestinal tract

A breakthrough guide to the nutrition-autism connection: the foods, meals, and supplements to feed your child to improve an autism spectrum condition
The next part places special emphasis on hydatid disease with regard to the current extent of this disease, changes in its management, and the most frequent complications and tips on how to avoid them. The following part discusses the surgical management of parasitic diseases affecting different organ systems, including the heart, the lungs, the brain and the urinary system. The final part presents the surgical dilemmas encountered in special situations, such as pregnancy, and the pediatric patient. The Surgical Management of Parasitic Diseases is an important and authoritative resource to surgeons of all specialties dealing with parasitic diseases

The Fast Track Set Up Guide is a step by step comprehensive resource to help entrepreneurs set up a business in Dubai, Abu Dhabi & the Northern Emirates of the United Arab Emirates (UAE) all on their own. Learn the rules of the road directly from experts, from brick and mortar establishments to freehold zones to virtual offices, this guide takes you through everything you need to know to get started immediately and save thousands of dollars in the process.

Written by S K S Singaram & Vinod Kumar, this book is nothing less than an essential guide for all those who are coming to Dubai for the first time. If you are from the Indian subcontinent, it is a little easier for you to understand and appreciate the local dress and other cultural traditions. But you need not worry if you are from a western country as this ultimate guide on Dubai will make you feel at home with all the information provided in this book. The book contains lots of illustrations to make it easier for the readers.

Kulturelles und wirtschaftliches Wissen über die Golfstaaten und Saudi-Arabien: Alles, was Geschäftsreisende an Informationen brauchen. Viel mehr als Erdöl: Zahlreiche lohnende Geschäftsfelder locken heute ausländische Investoren und internationale Unternehmen in die Golfstaaten. Damit das unternehmerische Engagement Früchte trägt, gibt Béatrice Hecht-El Minshawi einen kompakten Einblick in die Geschichte, Gesellschaft, Kultur und Wirtschaft der arabischen Staaten. Die Autorin schildert anschaulich, was westliche Geschäftsleute dort erwartet und auf welche anderen alltäglichen sowie geschäftlichen Gepflogenheiten sie sich einstellen müssen. Praktische Reiseinformationen, Hotel- und Ausgetipps zu den wichtigsten Städten sowie Stadtpläne komplettieren diesen Business-Ratgeber im Taschenformat.

This is the first textbook to focus on Aortopathy, a new clinical concept for a form of vasculopathy. The first section of the book starts from discussing general concept and history of Aortopathy, and then deals with its pathophysiology, manifestation, intrinsic factor, clinical implication, management and prevention. The second part closely looks at various disorders of the Aortopathy such as bicuspid aortic valve and coarctation of aorta. The book editors have published a lot of works on the topic and have been collecting relating data in the field of congenital heart disease for the past 20 years, thus present the book with confidence. The topic – an association of aortic pathophysiological abnormality, aortic dilation and aorto-left ventricular interaction – is getting more and more attention among cardiovascular physicians. This is the first book to refer for cardiologists, pediatric cardiologists, surgeons, ACHD specialists, etc. to acquire thorough knowledge on Aortopathy.

This book draws upon the expertise of academic researchers, urban planners and architects to explore the challenge of building the sustainable cities of the future. It addresses this challenge by considering current cities and those of the near future, and creates a picture of the sustainable city from the bottom up. Individual chapters cover topics such as transport, energy supply, sustainable urbanism and promoting social equality in large infrastructure projects. Real-world examples are presented to illustrate how systems thinking is used to integrate different components of a city so as to ensure that the whole is more sustainable than its parts. Written in an accessible style, this book is intended for general readers as much as it is for students and researchers interested in sustainable cities and related topics. It is also ideal for urban planners seeking best-practice guidelines for sustainable urban development.

Perioperative care is the care that is given before and after surgery. This textbook is a complete guide to the anaesthetic and critical care management of patients undergoing complex surgeries in all organ systems of the body. Topics cover all age groups – neonates, children, and adults. Divided into 11 sections, the book begins with a general overview of critical care in the perioperative period discussing airway management, pain, fluid and electrolyte therapy, shock, arterial blood gas analysis, respiratory failure and mechanical ventilation, and thromboembolism. The following sections cover surgeries in different organ systems and patient groups – cardiothoracic and vascular, neurosciences, paediatrics, obstetrics and gynaecology, gastrointestinal, genitourinary, orthopaedics, head and neck, and transplantation. The final section explains selected miscellaneous topics including nutrition, haemodynamic monitoring, echocardiography, renal replacement therapy, and antibiotics. Compiling 700 pages, the comprehensive text is further enhanced by clinical photographs, diagrams and tables. Key points Comprehensive guide to perioperative critical care in neonates, children and adults Covers complex surgeries in all organ systems Includes discussion on imaging, airway management, and ventilation Highly illustrated with clinical photographs, diagrams and tables

Dates are an important fruit, especially in many African, Middle-Eastern and Asian countries. In recent years this fruit has gained significant importance in terms of global commerce. During the period 1990–2009, global production of dates saw an increase of 219% and this trend is expected to continue as per FAO projections. Some of the major challenges confronting date fruit production and commerce are issues related to postharvest handling technologies, use of appropriate processing and packaging technologies, food safety aspects and quality assurance. Dates: Postharvest Science, Processing Technology and Health Benefits provides contemporary information that brings together current knowledge and practices in the value chain of dates, from production through to consumption. The important book published by Wiley Blackwell

features coverage from leading experts on innovative processing technologies, packaging, quality management and pest control for dates. It is the only book to address the science and technology of the postharvest production of dates, a commercially important and growing sector of the food industry. By examining the intersection of Islamic law, state law, religion, and culture in the Egyptian nation-building process, Recasting Islamic Law highlights how the sharia, when attached to constitutional commitments, is reshaped into modern Islamic state law. Rachel M. Scott analyzes the complex effects of constitutional commitments to the sharia in the wake of the Egyptian Revolution of 2011. She argues that the sharia is maintained by the modern state when it is applied as modern Islamic state law, but rather recast in its service. In showing the particular forms that the sharia takes when it is applied as modern Islamic state law, Scott pushes back against assumptions that introductions of the sharia into modern state law result in either the revival of medieval Islam or in its complete transformation. Scott engages with premodern law and with the Ottoman legal legacy on topics concerning Egypt’s Coptic community, women’s rights, personal status law, and the relationship between religious scholars and the Supreme Constitutional Court. Recasting Islamic Law considers modern Islamic state law’s discontinuities and its continuities with premodern sharia.

Ostentatious, glam, materialistic, and tax free, Dubai is one of the most popular overseas locations for expatriate professionals. But although Dubai’s population is made up of 75% expats compared to 25% locals, there is still an old town, away from the artificial world of glass skyscrapers shooting up towards the sky. The souks, the heart of urban Arabia, boast windows brimming with gold, rows of spices and nuts and fruits, pashminas and a dizzying variety of perfumes. As you set off on your journey to imitable Dubai, this easy-to-use book offers advice on everything - from how to prepare before leaving; areas to live; how to find a job; understanding the property market; selecting schools; and the legal system. - Overview of Dubai: a general overview of history, climate, culture and economy - Living in Dubai: offers advice on driving licences, opening a bank account, finding accommodation, how to get around, the education system and schools, hospitals, understanding of the legal system, and how to get connected - Working in Dubai: provides an understanding of the job market, its conditions, and how to find a job in Dubai - Leisure in Dubai: looks into shopping, food and dining, outdoor activities, how to keep fit, clubs, and short weekend trips

This book highlights the electronic governance in a smart city through case studies of cities located in many countries. • “E-Government ” refers to the use by government agencies of information technologies (such as Wide Area Networks, the Internet, and mobile computing) that have the ability to transform relations with citizens, businesses, and other arms of government. These technologies can serve a variety of different ends: better delivery of government services to citizens, improved interactions with business and industry, citizen empowerment through access to information, or more efficient government management. The resulting benefits are less corruption, increased transparency, greater convenience, revenue growth, and/or cost reductions. The book is divided into three parts. • E-Governance State of the Art Studies of many cities • E-Governance Domains Studies • E-Governance Tools and Issues

This book is a printed edition of the Special Issue “Dietary Intake and Behavior in Children” that was published in Nutrients

International Security Studies (ISS) has changed and diversified in many ways since 1945. This book provides the first intellectual history of the development of the subject in that period. It explains how ISS evolved from an initial concern with the strategic consequences of superpower rivalry and nuclear weapons, to its current diversity in which environmental, economic, human and other securities sit alongside military security, and in which approaches ranging from traditional Realist analysis to Feminism and Post-colonialism are in play. It sets out the driving forces that shaped debates in ISS, shows what makes ISS a single conversation across its diversity, and gives an authoritative account of debates on all the main topics within ISS. This is an unparalleled survey of the literature and institutions of ISS that will be an invaluable guide for all students and scholars of ISS, whether traditional ‘real spend’ or critical.

Soil: Genesis and Geomorphology is a comprehensive and accessible textbook on all aspects of soils. The book’s introductory chapters on soil morphology, physics, mineralogy and organisms prepare the reader for the more advanced and thorough treatment that follows. Theory and processes of soil genesis and geomorphology form the backbone of the book, rather than the emphasis on soil classification that permeates other less imaginative soils textbooks. This refreshingly readable text takes a truly global perspective, with many examples from around the world sprinkled throughout. Replete with hundreds of high quality figures and a large glossary, this book will be invaluable for anyone studying soils, landforms and landscape change. Soil: Genesis and Geomorphology is an ideal textbook for mid- to upper-level undergraduates and graduate level courses in soils, pedology and geomorphology. It will also be an invaluable reference text for researchers.

This report explores the prospects for renewables to diversify national economies and the combined GCC energy mix, while helping the region meet climate goals and contribute to the 2030 Agenda for Sustainable Development.

The rock matrix and the fluids contained therein define the aquifer as a whole, the custodian of continuity of life on this planet Earth. Its sustainable development, equitable utilization, quality maintenance, and balanced discharge and recharge are the essential elements to ensure that the next generation receives the resource baton passed on by the current generation. Spanning across the political and regional frontiers, transboundary aquifers have the potential to provide a uniting platform to the participatory nations. The common good of water can be enhanced by synergized research, data and knowledge sharing, joint development ventures, and hazard mitigation. Covering the multifarious facets of aquifers, this book will form an essential and interesting reading for all stakeholders’researchers, engineers, academia, intelligentsia, and the common consumer.

Indonesia is the largest country in the Association of Southeast Asian Nations (ASEAN), accounting for around two fifths of the region’s energy consumption. Energy demand across the country’s more than 17,000 islands could triple between 2015 and 2030.While reliance on domestic coal and imported petroleum products has grown, Indonesia has started adding more renewables to its energy mix. The country has set out to achieve 23% renewable energy use by 2025, and 31% by 2050.Remap - the global roadmap from the International Renewable Energy Agency (IRENA) - addresses this challenge, presenting a range of technology and resource options, along with key insights on the opportunities and challenges ahead.As this Remap country report shows, Indonesia could feasibly exceed its current goals and deploy even more renewables. In fact, the country could reach its 2050 target two decades sooner - by 2030.

World-renowned ‘tell it like it is’ guidebook Discover Dubai with this comprehensive, entertaining, ‘tell it like it is’ Rough Guide, packed with comprehensive practical information and our experts’ honest and independent recommendations. Whether you plan to go shopping, discover sand-skiing, laze on beaches or visit interesting museums, The Rough Guide to Dubai will help you discover the best places to explore, sleep, eat, drink and shop along the way. Features of The Rough Guide to Dubai: - Detailed regional coverage: provides in-depth practical information for each step of all kinds of trip, from intrepid off-the-beaten-track adventures, to chilled-out breaks in popular tourist areas. Regions covered include: Bur Dubai, Deira, the inner suburbs, Sheikh Zayed Road and Downtown Dubai, Jumeirah, the Burj al Arab and around, the Palm Jumeirah and Dubai Marina. - Honest independent reviews: written with Rough Guides’ trademark blend of humour, honesty and expertise, and recommendations you can truly trust, our writers will help you get the most from your trip to Dubai. - Meticulous mapping: always full-colour, with clearly numbered, colour-coded keys. Find your way around Deira, Jumeirah and many more locations without needing to get online. - Fabulous full-colour photography: features a richness of inspirational colour photography, including the dazzling Deira souks and the colourful Dubai Aquarium. - Things not to miss: Rough Guides’ rundown of Al Ain Oasis, the Burj al Arab, Deira and Jumeirah’s best sights and top experiences. - Itineraries: carefully planned routes will help you organise your trip, and inspire and inform your on-the-road experiences. - Basics section: packed with essential pre-departure information including getting there, getting around, accommodation, food and drink, health, the media, festivals, sports and outdoor activities, culture and etiquette, shopping and more. - Background Information: comprehensive Contexts chapter provides fascinating insights into Dubai, with coverage of history, religion, ethnic groups, environment, wildlife and books, plus a handy destination section and glossary. - Covers: Bur Dubai, Deira, the inner suburbs, Sheikh Zayed Road and Downtown Dubai, Jumeirah, the Burj al Arab and around, the Palm Jumeirah and Dubai Marina. About Rough Guides: Rough Guides have been inspiring travellers for over 35 years, with over 30 million copies sold globally. Synonymous with practical travel tips, quality writing and a trustworthy ‘tell it like it is’ ethos, the Rough Guides list includes more than 280 travel guides to 120+ destinations, gift-books and phrasebooks.

Authoritative, up-to-date travel information in a handy, compact format features tips on dining and lodging to suit any budget, facts on local transportation and holidays, detailed maps, sightseeing tips, and advice on shopping, nightlife, side trips, and outdoor activities.

Handbook of Medical Neuropsychology

Building Sustainable Cities of the Future

This volume provides an overview of new concepts in neurovascular interventions based on clinical and scientific knowledge of cerebrovascular disorders. It especially focuses on subarachnoid hemorrhage and cerebrovascular malformations, e.g. aneurysms, arterio-venous malformations, and cavernomas. A separate part addresses cerebral revascularization for both complex aneurysms and ischemia. All contributions were written by recognized experts and cover original papers presented at the 7th European Japanese Stroke Surgery Conference, held in Verona, Italy in June 2014. The authors present new trends and strategies for managing emerging problems, as well as in-depth discussions on controversial issues in the field.

This handbook celebrates the abundantly productive interaction of neuropsychology and medicine. This interaction can be found in both clinical settings and research l-oratories, often between research teams and clinical practitioners. It accounts for the rapidity with which awareness and understanding of the neuropsychological com- nents of many common medical disorders have recently advanced. The introduction of neuropsychology into practice and research involving conduct without obvious neurological components follows older and eminently successful models of integrated care and treatment of the classical brain disorders. In the last 50 years, with the growing understanding of neurological disorders, neuropsychologists and medical specialists in clinics, at bedside, and in laboratories together have contributed to important clinical and scienti c advances in the und- standing of the common pathological conditions of the brain: stroke, trauma, epilep
