

## Sample Hospice Charting

This guide offers a detailed overview of the CHPN test, so that you know exactly what to expect on the Certified Hospice and Palliative Nurse Exam. It also covers all of the subjects over which you will be tested, example questions for you to practice and improve, and test tips and strategies to help you score higher on the CHPN exam 2018.

This pocket-size guide saves nurses precious time while ensuring that a complete patient record is created and that legal, quality assurance, and reimbursement requirements are met. This handbook provides specific verbiage for charting patient progress, change or tasks accomplished for approximately 50 common problems. The new third edition has been completely updated to include Critical Assessment Findings, Subjective Findings for Documentation, Resources for Care and Practice, Legal Considerations, Time Saving Tips, and new Managed Care information. Plus, roughly 15 additional common problems and diagnoses have been added making this practical resource more valuable than ever. Diagnoses are in alphabetical order allowing for fast and easy access. Each patient problem or diagnosis found in this handbook includes specific documentation guidelines for the following aspects of nursing care: \*Assessment of patient problem \*Associated nursing diagnosis \*Examples of objective findings for documentation \*Examples of subjective findings for documentation \*Examples of assessment of the data \*Examples of potential medical problems for this patient \*Examples of the documentation of potential nursing interventions/actions \*Examples of the evaluations of the interventions/actions \*Other services that may be indicated and their associated interventions and goals/outcomes \*Nursing goals and outcomes \*Potential discharge plans for this patient \*Patient, family, caregiver educational needs \*Resources for care and practice \*Legal considerations for documentation, as appropriate Introductory chapters describe documentation, the medical record systems of nursing documentation, and current JCAHO and ANA standards related to documentation. Specialty sections provide important and specific guidelines for hospice care and maternal-child care. Appendices provide the latest NANDA-approved nursing diagnoses, descriptions of services provided by other disciplines, abbreviations, and a listing of resources (i.e., directory of resources, clinical newsletters and journals, Internet resources, further reading). Includes Time Saving Tips boxes to help minimize the time needed for documentation responsibilities. Each diagnosis includes a Critical Assessment Components/Findings section to help nurses with their critical decision making and determine whether an assessment finding indicates immediate attention or patient follow up. The Goals/Outcomes section of each diagnosis now appears at the beginning so that nurses know the intended goals and outcomes up front before beginning the assessment. All documentation guidelines now include sections on Examples of Subjective Findings for Documentation and Resources for Care and Practice. Includes Legal Considerations for Documentation as appropriate to highlight important legal issues. Part One has been updated to reflect the current managed care environment, including new information required by the National Community of Quality Assurance [NCQA], so that nurses can incorporate and focus on these changes as they document

Home Health Assessment Criteria: 75 Checklists for Skilled Nursing Documentation Barbara Acello, MS, RN and Lynn Riddle Brown, RN, BSN, CRNI, COS-C Initial assessments can be tricky--without proper documentation, home health providers could lose earned income or experience payment delays, and publicly reported quality outcomes affected by poor assessment documentation could negatively impact an agency's reputation. Ensure that no condition or symptom is overlooked and documentation is as accurate as possible with Home Health Assessment Criteria: 75 Checklists for Skilled Nursing Documentation. This indispensable resource provides the ultimate blueprint for accurately assessing patients' symptoms and conditions to ensure regulatory compliance and proper payment. It will help agencies deliver more accurate assessments and thorough documentation, create better care plans and improve patient outcomes, prepare for surveys, and ensure accurate OASIS reporting. All of the book's 75-plus checklists are also available electronically with purchase, facilitating agency-wide use and letting home health clinicians and field staff easily access content no matter where they are. This book will help homecare professionals: Easily refer to checklists, organized by condition, to properly assess a new patient Download and integrate checklists for use in any agency's system Obtain helpful guidance on assessment documentation as it relates to regulatory compliance Appropriately collect data for coding and establish assessment skill proficiency

TABLE OF CONTENTS

Section 1: Assessment Documentation Guidelines

1.1. Medicare Conditions of Participation 1.2. Determination of Coverage Guidelines 1.3. Summary of Assessment Documentation Requirements 1.4. Assessment Documentation for Admission to Agency 1.5. Case Management and Assessment Documentation 1.6. Assessment Documentation for Discharge Due to Safety or Noncompliance 1.7. Start of Care Documentation Guidelines 1.8. Routine Visit Documentation Guidelines 1.9. Significant Change in Condition Documentation Guidelines 1.10. Transfer Documentation Guidelines 1.11. Resumption of Care Documentation Guidelines 1.12. Recertification Documentation Guidelines 1.13. Discharge Documentation Guidelines

Section 2: General Assessment Documentation

2.1. Vital Sign Assessment Documentation 2.2. Pain Assessment Documentation 2.3. Pain Etiology Assessment Documentation 2.4. Change in Condition Assessment Documentation 2.5. Sepsis Assessment Documentation 2.6. Palliative Care Assessment Documentation 2.7. Death of a Patient Assessment Documentation 2.8. Cancer Patient Assessment Documentation

Section 3: Neurological Assessment Documentation

3.1. Neurological Assessment Documentation 3.2. Alzheimer's Disease/Dementia Assessment Documentation 3.3. Cerebrovascular Accident (CVA) Assessment Documentation 3.4. Paralysis Assessment Documentation 3.5. Seizure Assessment Documentation 3.6. Transient Ischemic Attack (TIA) Assessment Documentation

Section 4: Respiratory Assessment Documentation

4.1. Respiratory Assessment Documentation 4.2. Chronic Obstructive Pulmonary Disease (COPD) Assessment Documentation 4.3. Pneumonia/Respiratory Infection Assessment Documentation

Section 5: Cardiovascular Assessment Documentation

5.1. Cardiovascular Assessment Documentation 5.2. Angina Pectoris Assessment Documentation 5.3. Congestive Heart Failure (CHF) Assessment Documentation 5.4. Coronary Artery Bypass Graft Surgery (CABG) Assessment Documentation 5.5. Coronary Artery Disease (CAD) Assessment Documentation 5.6. Hypertension Assessment Documentation 5.7. Myocardial Infarction Assessment Documentation 5.8. Orthostatic Hypotension Assessment Documentation 5.9. Pacemaker and Defibrillator Assessment Documentation

Section 6: Gastrointestinal Assessment Documentation

6.1. Gastrointestinal Assessment Documentation 6.2. Cirrhosis Assessment Documentation 6.3. Crohn's Disease Assessment Documentation 6.4. Hepatitis Assessment Documentation 6.5. Peritonitis, Suspected Assessment Documentation 6.6. Pseudomembranous Colitis Assessment Documentation 6.7. Ulcerative Colitis Assessment Documentation

Section 7: Genitourinary Assessment Documentation

7.1. Genitourinary Assessment Documentation 7.2. Acute Renal Failure Assessment Documentation 7.3. Chronic Renal Failure Assessment Documentation 7.4. Urinary Tract Infection (UTI) Assessment Documentation

Section 8: Integumentary Assessment Documentation

8.1. Integumentary Assessment Documentation 8.2. Skin Tear Assessment Documentation 8.3. Herpes Zoster Assessment Documentation 8.4. Leg Ulcer Assessment Documentation 8.5. Necrotizing Fasciitis (Streptococcus A) Assessment Documentation 8.6. Pressure Ulcer Assessment Documentation

Section 9: Musculoskeletal Assessment Documentation

9.1. Musculoskeletal Assessment Documentation 9.2. Arthritis Assessment Documentation 9.3. Compartment Syndrome Assessment Documentation 9.4. Fall Assessment Documentation 9.5. Fracture Assessment Documentation

Section 10: Endocrine Assessment Documentation

10.1. Endocrine Assessment Documentation 10.2. Diabetes Assessment Documentation

Section 11: Eyes, Ears, Nose, Throat Assessment Documentation

11.1. Eyes, Ears, Nose, Throat Assessment Documentation 11.2. Dysphagia Assessment Documentation

Section 12: Hematologic Assessment Documentation

12.1. Hematologic Assessment Documentation 12.2. Anticoagulant Drug Therapy Assessment Documentation 12.3. Deep Vein Thrombosis (DVT) Assessment Documentation 12.4. HIV Disease and AIDS Assessment Documentation

Section 13: Nutritional Assessment Documentation

13.1. Nutritional Assessment Documentation 13.2. Dehydration Assessment Documentation 13.3. Electrolyte Imbalances Assessment

Documentation 13.4. Weight Loss, Cachexia, and Malnutrition Assessment Documentation Section 14: Psychosocial Assessment Documentation 14.1. Psychosocial Assessment Documentation 14.2. Delirium Assessment Documentation 14.3. Psychotic Disorder Assessment Documentation 14.4. Restraint Assessment Documentation Section 15: Infusion Assessment Documentation 15.1. Implanted Infusion Pump Assessment Documentation 15.2. Infusion Therapy Assessment Documentation 15.3. Vascular Access Device (VAD) Assessment Documentation

There has been a steady growth in the provision of day care services for people with life-threatening illnesses who live at home. This book includes details of the range of therapies and services that a multi-disciplinary team can provide to address the physical, emotional, psycho-social and spiritual needs of these patients and their families, thus enabling them to remain in their own homes.

Proven, approachable, and part of a complete course solution, Fundamentals of Nursing, 9th Edition, makes essential concepts accessible and help students develop the knowledge and clinical skills to succeed throughout their nursing education. This comprehensively enhanced edition equips students for today's clinical environment with coverage of emerging practices and technology, new multimedia learning tools, and case studies that reflect the clinical application of chapter concepts and prepare students to excel throughout their nursing careers. Features New! Reflective Practice Leading to Personal Learning callouts cultivate a person-centered approach to nursing care. New! Clinical vignettes personalize the clinical application of concepts and integrate with vSim for Nursing for patient-specific reinforcement of commonly encountered scenarios and conditions. New! Technology Alerts familiarize students with emerging devices and software they'll likely encounter in the clinical setting. New! Informatics chapter reflects the increasingly important role of data and information technology in patient care. New! QSEN boxes in every chapter help students ensure compliance with Quality and Safety Education for Nurses competencies. NEW! Legal Alerts help students ensure compliance with important laws and considerations related to clinical practice. New! Watch & Learn Videos clarify key concepts and procedures in engaging detail. Revised! Illustrated Concept Maps engage visual learners, simplify complex topics, and strengthen students' clinical reasoning skills. Case scenarios in each chapter encourage holistic patient care and reflection on critical thinking questions.

America's health care system has become too complex and costly to continue business as usual. Best Care at Lower Cost explains that inefficiencies, an overwhelming amount of data, and other economic and quality barriers hinder progress in improving health and threaten the nation's economic stability and global competitiveness. According to this report, the knowledge and tools exist to put the health system on the right course to achieve continuous improvement and better quality care at a lower cost. The costs of the system's current inefficiency underscore the urgent need for a systemwide transformation. About 30 percent of health spending in 2009--roughly \$750 billion--was wasted on unnecessary services, excessive administrative costs, fraud, and other problems. Moreover, inefficiencies cause needless suffering. By one estimate, roughly 75,000 deaths might have been averted in 2005 if every state had delivered care at the quality level of the best performing state. This report states that the way health care providers currently train, practice, and learn new information cannot keep pace with the flood of research discoveries and technological advances. About 75 million Americans have more than one chronic condition, requiring coordination among multiple specialists and therapies, which can increase the potential for miscommunication, misdiagnosis, potentially conflicting interventions, and dangerous drug interactions. Best Care at Lower Cost emphasizes that a better use of data is a critical element of a continuously improving health system, such as mobile technologies and electronic health records that offer significant potential to capture and share health data better. In order for this to occur, the National Coordinator for Health Information Technology, IT developers, and standard-setting organizations should ensure that these systems are robust and interoperable. Clinicians and care organizations should fully adopt these technologies, and patients should be encouraged to use tools, such as personal health information portals, to actively engage in their care. This book is a call to action that will guide health care providers; administrators; caregivers; policy makers; health professionals; federal, state, and local government agencies; private and public health organizations; and educational institutions.

The decade ahead will test the nation's nearly 4 million nurses in new and complex ways. Nurses live and work at the intersection of health, education, and communities. Nurses work in a wide array of settings and practice at a range of professional levels. They are often the first and most frequent line of contact with people of all backgrounds and experiences seeking care and they represent the largest of the health care professions. A nation cannot fully thrive until everyone - no matter who they are, where they live, or how much money they make - can live their healthiest possible life, and helping people live their healthiest life is and has always been the essential role of nurses. Nurses have a critical role to play in achieving the goal of health equity, but they need robust education, supportive work environments, and autonomy. Accordingly, at the request of the Robert Wood Johnson Foundation, on behalf of the National Academy of Medicine, an ad hoc committee under the auspices of the National Academies of Sciences, Engineering, and Medicine conducted a study aimed at envisioning and charting a path forward for the nursing profession to help reduce inequities in people's ability to achieve their full health potential. The ultimate goal is the achievement of health equity in the United States built on strengthened nursing capacity and expertise. By leveraging these attributes, nursing will help to create and contribute comprehensively to equitable public health and health care systems that are designed to work for everyone. The Future of Nursing 2020-2030: Charting a Path to Achieve Health Equity explores how nurses can work to reduce health disparities and promote equity, while keeping costs at bay, utilizing technology, and maintaining patient and family-focused care into 2030. This work builds on the foundation set out by The Future of Nursing: Leading Change, Advancing Health (2011) report.

Oftentimes, documentation to prove hospice eligibility can be tricky. Generalization and lack of specific details can result in non payment or repayment of claims. My purpose in creating this

pocket guide is to help nurses, physicians and other disciplines be able to accurately and thoroughly document hospice decline. Everything you need is at the drop of the hand in a small convenient size guide that can easily be carried with you anywhere.

Documentation for Health Records

*As the use of music therapy becomes more widespread so too does the need for detailed assessment. Standardised assessment tools, and knowledge of how to integrate assessment into clinical practice, are needed for teaching, research and clinical purposes all around the world. Based on the findings of members of the International Music Therapy Assessment Consortium (IMTAC), this comprehensive anthology collects the latest research and clinical practice methods about music therapy assessment. Looking at the available assessment tools holistically, the book covers the major assessment models currently used in clinical practice, and details each model's setting and motivation, development, theoretical background, and how to implement it in a clinical setting.*

*In addition to reprinting the PDF of the CMS CoPs and Interpretive Guidelines, we include key Survey and Certification memos that CMS has issued to announced changes to the emergency preparedness final rule, fire and smoke door annual testing requirements, survey team composition and investigation of complaints, infection control screenings, and legionella risk reduction.*

*The Beacon Guide to Medicare Service Delivery, 2014 Edition Updated to reflect the 2014 PPS final rule, "The Beacon Guide to Medicare Service Delivery, 2014 Edition" helps your staff understand how to deliver and document patient care in compliance with Medicare rules. The 2014 edition has been revised to include HHABN updates, OASIS-CI, ICD-10, and the new alternative sanctions that home health agencies will face in 2014. The Beacon Guide remains the industry leader in providing complete interpretation and compliance guidelines on all PPS regulations and highlighting changes that will impact your outcomes. The 2014 edition features: Analysis of the new Home Health Advance Beneficiary Notice (HHABN), including a sample form Up-to-date OASIS-CI guidance A detailed explanation of how the ICD-10 transition will affect your agency In-depth descriptions and interpretations of the new alternative sanctions coming in 2014 Home health prospective payment system 2014 final rule analysis This manual: Gives staff a working knowledge of the current regulations Enables agencies to implement checks to ensure services are delivered according to Medicare regulations Helps you produce documentation that supports compliance and payment claims Serves as a important agency resource that anyone can use when stumped by a regulatory or operational question Table of Contents: The Prospective Payment System (PPS): Gives an overview of critical concepts, including the Home Health Resource Group (HHRG), consolidated billing requirements, and clinical issues that impact billing. All About the OASIS: Discusses the fundamentals of the OASIS and assessments. Compliance and Care Delivery: Highlights issues related to visits, physician orders, and start of care, recertification, and discharge. Documentation Essentials: Looks at documentation fundamentals, the clinical record, diagnoses, and the plan of care. This includes a section related to the 485 and elements of content.*

*Provides comprehensive, current information for addressing the physical, psychological, and spiritual needs of hospice patients and their families Substantially updated and expanded, the second edition of this quick-access reference for hospice nurses continues to deliver the most current information on the clinical and administrative duties of the hospice nurse. It encompasses important regulatory changes and milestones, providing timely information on cultural issues, special communication considerations, and hospice care's enduring growth. This resource provides new content on levels of care, assessment and symptom management, and occupational stress, burnout, and self-care. New treatment guidelines and algorithms are included, as are updates on quality measures, the reimbursement schedule, compliance initiatives, and electronic documentation with specific examples. An indispensable clinical resource, the book is a valuable reference for nurses who are seeking to specialize in hospice, those who work in long-term care settings, post-acute care settings, acute care setting, and those who are seeking to enhance their knowledge of end-of-life care within other specialties. New to the Second Edition: Includes new regulatory changes/milestones, such as The National Quality Forum New Priorities for Action 2019 Provides updated information about levels of care, particularly the Last 7 Days rule from Medicare Covers the use of cannabis, non-pharmacological pain management interventions, care of the dying patient, and post-mortem care New chapters are included on the hospice nurse's role as case manager, patient discharge, religious and cultural influences on end-of-life care, pain assessment and interventions, wound care, care of the dying patient, and post-mortem care. Key Features: Reflects key competencies for the hospice nurse as designated by the Hospice and Palliative Nurses Association Delineates clinical and administrative responsibilities of the hospice nurse Simplifies complex information such as Medicare regulations and compliance Provides screening tools for depression, anxiety, and wound risk Includes the Palliative Performance Scale and the Karnofsky Performance Scale Serves as a concise study resource for certification*

"This 5th edition is an important achievement; it is a symbol of commitment to the field of palliative nursing, where we have been and where we are going." - Betty Rolling Ferrell, PhD, MA, FAAN, FPCN, CHPN From the Foreword The aging population has only grown since the first edition of this comprehensive and seminal publication nearly 20 years ago. Based on the need to humanize rather than medicalize the illness experience for patients, this text delves into palliative care beyond the specific diseases affecting the patient. Instead, content focuses on the whole person and family. Palliative patients struggle with chronic, debilitating, and painful conditions, and grapple with the fact that life as they knew it has already passed away. Families and friends reciprocally suffer, not knowing how to help and therefore become the secondary victims of the disease. This is not the challenge of a lone nurse, or a single physician, therapist, or social worker. Rather, palliative

and hospice care requires the expertise and unique roles of an interprofessional team to help the patient and family strengthen their resilience, continue to find meaning and purpose in life, and cure what can be cured. Palliative Care Nursing, Fifth Edition, delivers advanced empirical, aesthetic, ethical and personal knowledge. This new edition brings an increased focus on outcomes, benchmarking progress, and goals of care. It expounds upon the importance of the cross-disciplinary collaboration introduced in the previous edition. Every chapter in Sections I, II, and III includes content written by a non-nursing member of the interprofessional team. Based on best-evidence and clinical practice guidelines, this text presents comprehensive, targeted interventions responsive to the needs of palliative and hospice patients and family. Each chapter contains compassionate, timely, appropriate, and cost-effective care for diverse populations across the illness trajectory. Key Features The expanded new edition offers current, comprehensive, one-stop source of highly-relevant clinical information on palliative care Life-span approach: age-appropriate nursing considerations (e.g. geriatric, pediatric and family) Includes disease-specific and symptom-specific nursing management chapters Promotes a holistic and interdisciplinary approach to palliative care Offers important legal, ethical and cultural considerations related to death and dying Case Studies with Case Study Conclusion in each clinical chapter New to The Fifth Edition: An expanded chapter on Palliative Care incorporates most up to date scope and standards, information on Basic and Advanced HPNA certification, self-reflection and self-care for nurses. A chapter on Interprofessional Collaboration Instructor Resources: Power points and Test bank

An on-the-go reference for hospice nurses and those interested in end-of-life care, this practical guide covers the essential elements in the compassionate and holistic care of terminally ill patients and their families. Nurses care for patients facing end-of-life issues in every practice specialty and, as the U.S. population continues to age, the need for proficiency in end-of-life skills will become increasingly important. Fast Facts for the Hospice Nurse: A Concise Guide to End-of-Life Care is an invaluable resource that provides emotional, administrative, and palliative support, whether in a hospice, long-term care facility, or acute care setting. This vital go-to text clearly and concisely lays out not only how to care for patients facing end-of-life issues, but also how to engage in self-care and cope with occupational stress. Beginning with an overview of hospice care, including its history and philosophy, this book offers a timeline of the growth of the hospice movement in the United States. Subsequent sections include up-to-date information on the clinical responsibilities of the hospice nurse in addressing the physical, psychological, and spiritual needs of terminally ill patients and their families in a culturally sensitive way. This book also outlines the administrative duties of the hospice nurse, including hospice documentation, a review of hospice regulations, and quality management. The closing section focuses on occupational stress in hospice nursing and how to engage in self-care. This text can serve as a useful clinical resource and also as a reference for nurses seeking hospice certification from the Hospice and Palliative Credentialing Center. Key Features Organized within the context of the scope and standards of practice of the Hospice and Palliative Nurses Association. Addresses key points about issues unique to hospice nursing and highlights evidence-based interventions Addresses important Medicare regulations and reimbursement Offers numerous clinical resources to assist with hospice nursing practice Serves as a concise study resource for hospice nursing certification

"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)."--Online AHRQ blurb, <http://www.ahrq.gov/qual/nurseshdbk>.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Hospice Nursing 101

Care of the Imminently Dying

This comprehensive pocket-size handbook is the essential reference for clinicians and others serving patients with advanced or life-limiting illness. It offers up-to-date, practical guidance to expertly meet the challenges of serving these patients and their families. This user-friendly manual emphasizes the importance of honoring patients' medical journey while meeting their whole-person, often complex needs—from symptom management to attending to spiritual and emotional suffering—and always acknowledging patients' lives, including the needs of loved ones supporting them. The layout makes finding information quick and easy, with alphabetically organized chapter headings. Organ-system-based chapters offer disease-specific, goals-of-care discussion guidance and reviews of etiology, signs and symptoms, assessment, and management—including well as palliative options. Other chapters cover communication with patients and families, consultation with colleagues, and code status discussions, along with valuable information on withdrawing life support, ethics, spirituality, physician-assisted death, and palliative options of last resort. Readers will find practical management strategies for symptoms such as dyspnea, and delirium. In addition, chapters on opioid use and dosing, and pharmacology of commonly used palliative medications, make this guide an invaluable resource. In this updated version of her landmark book *Learning to Listen, Learning to Teach*, celebrated adult educator Jane Vella revisits her twelve principles of dialogue education from a theoretical perspective gleaned from the discipline of quantum physics. Vella sees the path to learning as a holistic, integrated, spiritual, and energetic process. She uses stories of her work in a variety of adult learning settings, in different countries and with different educational purposes, to show readers how to utilize the twelve principles with any type of adult learner, anywhere.

Trusted for its holistic, case-based approach, *Fundamentals of Nursing: The Art and Science of Person-Centered Nursing Care*, 10th Edition, helps you confidently prepare nursing professionals for practice. This bestselling text presents nursing as an evolving art and science, blending essential competencies—cognitive, technical, interpersonal—and instilling the clinical reasoning, clinical judgment, and decision-making capabilities crucial to effective patient-centered care in any setting. The extensively updated 10th Edition offers an integrated learning and teaching solution that combines traditional text, video, and interactive resources to tailor content to diverse learning styles and deliver a seamless experience for every student.

The geriatric population is growing in the United States and caring for geriatrics can be complex. This population is at an increased risk for skin injury. There are some ulcers specifically at the end of life. One of the ulcers that can be seen at the end of life is the Kennedy Terminal Ulcer (KTU). This type of ulcer is a result of hypoperfusion to the skin. There is a limited amount of literature available on the KTU. Also, some nurses and providers are unaware of this type of ulcer. The purpose of this study was to gather data on the characteristics and location in hospice patients. Sacral/coccyx ulcers identified after hospice admission were used as a proxy for the KTU to gather data on the average onset and prevalence. A retrospective chart review at a local hospice home was completed to gather data on pressure ulcers and the KTU over an 18 month period. The study was also completed using the cognitive load theory to educate nurses and providers on the disease process and implications of the KTU. The pressure ulcer prevalence in a hospice home was found to be 27.8%. The majority of pressure ulcers were stage 2 (43%). The coccyx (45%), buttock (18%) and heels (16%) were the most common areas for pressure ulcers. The average length of life was 17.7 days and the median was 9.5 days after sacral/coccyx ulcer onset. The estimated prevalence in this sample of the KTU was 6.1%. Only 61.5% of participants had previously heard of the KTU. The education session showed a significant difference in participant's knowledge in unavoidable pressure ulcers, the KTU and usual presentation of the KTU. Being aware of the skin changes that occur at the end of life is important for providers and nurses. It gives them the opportunity to educate and patient about the disease process and implications. There is a need for further research on skin changes at life's end.

Fast Facts for the Hospice Nurse, Second Edition

Health Professions Education

Quality Care to the End of Life, Fifth Edition

Handbook of Home Health Standards

A Bridge to Quality

Delivering High-Quality Cancer Care

A Special Way of Caring for the Terminally Ill

*Gerontologic Nursing*, 5th Edition offers comprehensive disorder and wellness coverage to equip you with the essential information you need to provide the best nursing care to older adults. A body-system organization makes information easy to find, and includes discussions on health promotion, psychologic and sociocultural issues, and the common medical-surgical problems associated with aging adults. Written by expert educator and clinician Sue Meiner, EdD, APRN, BC, GNP, this book also emphasizes topics such as nutrition, chronic illness, emergency treatment, patient teaching, home care, and end-of-life care. Case Studies specialty boxes provide realistic situations to expand your knowledge and understanding. UNIQUE! Nursing care plans supply guidance on selecting appropriate nursing activities and interventions for specific conditions. Evidence-Based Practice specialty boxes pull the critical evidence-based information contained in the text into boxes for easy access and identification. UNIQUE! Client/Family Teaching specialty boxes emphasize key aspects of practice and teaching for self-care. UNIQUE! Home Care specialty boxes highlight tips to promote practical, effective home care for the older adult. UNIQUE! Emergency Treatment specialty boxes highlight critical treatment needed in emergency situations. UNIQUE! Nutritional Considerations specialty boxes demonstrate special nutritional needs and concerns facing the aging population. NEW! Completely revised Pharmacologic Management chapter covering substance abuse. NEW! Completely revised Cognitive and Neurologic Function chapter covering mental health. NEW! Up-to-date content equips you with the most current information as the basis of the best possible care for problems affecting the older adult population. Streamlined

focus presents the essential "need to know" information for the most common conditions in older adults in a format that you can easily and quickly grasp. UNIQUE! Disorder index on the inside cover supplies a handy reference to guide students to the information they need quickly and easily. Complex aspects of aging offers detailed and comprehensive coverage of pain, infection, cancer, chronic illness, loss, death, and dying, and substance abuse. Thorough assessment coverage recaps normal, deviations from normal, and abnormal findings of vitals for the older adult for students and practitioners. Palliative care is an essential element of our health care system and is becoming increasingly significant amidst an aging society and organizations struggling to provide both compassionate and cost-effective care. Palliative care is also characterized by a string interdisciplinary approach. Nurses are at the center of the palliative care team across settings and populations. The seventh volume in the HPNA Palliative Nursing Manuals series, Care of the Imminently Dying provides an overview of symptom management when a patient is reaching the end of their life. This volume covers delirium and the advantages of early diagnosis, determining the presence of dyspnea, death rattle, or cough, urgent syndromes that may appear the end of life, palliative sedation, and the withdrawal of life-sustaining therapies. The content of the concise, clinically focused volumes in the HPNA Palliative Nursing Manuals series is one resource for nurses preparing for specialty certification exams and provides a quick-reference in daily practice.

Hospice & Palliative Care Handbook, Third Edition, offers concise, focused coverage of all aspects of hospice and palliative care for clinicians, managers, and other team members who provide important care while meeting difficult multilevel regulations. Author Tina M. Marrelli, Director of the first U.S. hospice program to attain Joint Commission accreditation for hospice services, helps caregivers meet quality, coverage, and reimbursement requirements in daily practice and documentation. Filled with key topics such as professional standards and guidelines, bereavement services considerations, outcomes, and goals, and quality control, this comprehensible book provides the tools hospice caregivers need for success. 2nd Place 2018 AJN Book of the Year

For patients and their loved ones, no care decisions are more profound than those made near the end of life. Unfortunately, the experience of dying in the United States is often characterized by fragmented care, inadequate treatment of distressing symptoms, frequent transitions among care settings, and enormous care responsibilities for families. According to this report, the current health care system of rendering more intensive services than are necessary and desired by patients, and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families. Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life. Death is not a strictly medical event. Ideally, health care for those nearing the end of life harmonizes with social, psychological, and spiritual support. All people with advanced illnesses who may be approaching the end of life are entitled to access to high-quality, compassionate, evidence-based care, consistent with their wishes. Dying in America evaluates strategies to integrate care into a person- and family-centered, team-based framework, and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families. The findings and recommendations of this report will address the needs of patients and their families and assist policy makers, clinicians and their educational and credentialing bodies, leaders of health care delivery and financing organizations, researchers, public and private funders, religious and community leaders, advocates of better care, journalists, and the public to provide the best care possible for people nearing the end of life.

Charting Spiritual Care

The CMS Hospital Conditions of Participation and Interpretive Guidelines

Home care clinicians everywhere depend on "the little red book" for essential, everyday information: detailed standards and documentation guidelines including ICD-9-CM codes, current NANDA-I and OASIS information, factors justifying homebound status, interdisciplinary goals and outcomes, reimbursement considerations, and evidence-based resources for practice and education. Completely revised and updated, this indispensable handbook now includes the most recently revised Federal Register Final Rule coding guidelines.

Hospice & Palliative Care Handbook, Third Edition Quality, Compliance, and Reimbursement Sigma Theta Tau

Covers key social problems and practice-related issues The last two decades in social work have seen tremendous strides in field research, from the development of innovative designs to more accurate methods of problem measurement and outcome analysis. Drawing upon these significant advances, the two-volume handbook of Empirical Social Work Practice brings together empirically validated interventions for many of the psychosocial problems most frequently encountered by social workers in their daily practice. These books in the field that employ a theory-based approach to treatment, this handbook focuses on the best-supported methods of helping clients with particular problems. Free of theoretical biases, offering clinicians a valuable compendium of practice guidelines for treatment. Edited and authored by recognized experts in the field, the Handbook of Empirical Social Work Practice is clearly written and organized for easy reference. Volume Two covers key social problems and practice-related issues including: \* Crime, homelessness, unemployment \* Domestic violence and sexual abuse \* Family conflict and preservation \* Practice approaches for older clients \* Empirically based supervision With information that is at once accessible and up to date, the Handbook of Empirical Social Work Practice is a vital source of guidance for today's clinical social workers and other practicing social work professionals, as well as students. "One of the best tools to promote the values of the [social work] profession is that of empirical social work practice. 'Telling the truth about the values, and discovering the truth is something that empirical research is very good at. This book presents credible reviews of contemporary empirical literature pertaining to behavioral, affective, and intellectual disorders, and their psychosocial assessment and treatment. That such a book is now possible is a striking affirmation of the merit of the empirical approach to social work called empirical clinical practice." ---- from the Handbook of Empirical Social Work Practice

This open access volume is the first academic book on the controversial issue of including spiritual care in integrated electronic medical records (EMR). Based on an in-

group comprising researchers from Europe (The Netherlands, Belgium and Switzerland), the United States, Canada, and Australia, this edited collection provides an overview of different charting practices and experiences in various countries and healthcare contexts. Encompassing case studies and analyses of theological, ethical, legal, health, and practical issues, the volume is a groundbreaking reference for future discussion, research, and strategic planning for inter- or multi-faith healthcare chaplains and other providers involved in the new field of documenting spiritual care in EMR. Topics explored among the chapters include: Spiritual Care Charting/Documenting/Recording/Charting Spiritual Care: Psychiatric and Psychotherapeutic Aspects Palliative Chaplain Spiritual Assessment Progress Notes Charting Spiritual Care: Ethical Perspectives Spiritual Care in Digital Health: Analyses and Perspectives Charting Spiritual Care: The Emerging Role of Chaplaincy Records in Global Health Care is an essential resource for researchers in interprofessional spiritual care and healthcare chaplaincy, healthcare chaplains and other spiritual caregivers (nurses, physicians, psychologists, etc.), practitioners, theologians and health ethicists, and church and denominational representatives.

A Retrospective Chart Review of Ulcers in the Hospice Setting and Educating Providers and Nurses on the Importance of Skin Changes at Life's End

**Complete your charting at your patient's home and stay organized. EASY and CONVENIENT to use. 6x9 Inches with 120 pages and Matte Finish.**

**This practical guide briefly covers the historical and epidemiological background of palliative care and the growth of palliative medicine as a specialty, before dealing with major physical, psychological, spiritual, and symptom management issues from diagnosis to bereavement care.**

**The Institute of Medicine study Crossing the Quality Chasm (2001) recommended that an interdisciplinary summit be held to further reform of health professions education in order to enhance quality and patient safety. Health Professions Education: A Bridge to Quality is the follow up to that summit, held in June 2002, where 150 participants across disciplines and occupations developed ideas about how to integrate a core set of competencies into health professions education. These core competencies include patient-centered care, interdisciplinary teams, evidence-based practice, quality improvement, and informatics. This book recommends a mix of approaches to health education improvement, including those related to oversight processes, the training environment, research, public reporting, and leadership. Educators, administrators, and health professionals can use this book to help achieve an approach to education that better prepares clinicians to meet both the needs of patients and the requirements of a changing health care system.**

**As humanitarian aid organizations have evolved, there is a growing recognition that incorporating palliative care into aid efforts is an essential part of providing the best care possible. A Field Manual for Palliative Care in Humanitarian Crises represents the first-ever effort at educating and providing guidance for clinicians not formally trained in palliative care in how to incorporate its principles into their work in crisis situations. Written by a team of international experts, this pocket-sized manual identifies the needs of people affected by natural hazards, political or ethnic conflict, epidemics of life-threatening infections, and other humanitarian crises. Later chapters explore topics including pain management, skin conditions, non-communicable diseases, palliative care emergencies, the law and ethics of end of life care, and more. Concise and highly accessible, this manual is an ideal educational tool pre-deployment or during fieldwork for clinicians involved in planning and providing humanitarian aid, local care providers, and medical trainees.**

In the United States, approximately 14 million people have had cancer and more than 1.6 million new cases are diagnosed each year. However, more than a decade after the Institute of Medicine (IOM) first studied the quality of cancer care, the barriers to achieving excellent care for all cancer patients remain daunting. Care often is not patient-centered, many patients do not receive palliative care to manage their symptoms and side effects from treatment, and decisions about care often are not based on the latest scientific evidence. The cost of cancer care also is rising faster than many sectors of medicine--having increased to \$125 billion in 2010 from \$72 billion in 2004--and is projected to reach \$173 billion by 2020. Rising costs are making cancer care less affordable for patients and their families and are creating disparities in patients' access to high-quality cancer care. There also are growing shortages of health professionals skilled in providing cancer care, and the number of adults age 65 and older--the group most susceptible to cancer--is expected to double by 2030, contributing to a 45 percent increase in the number of people developing cancer. The current care delivery system is poorly prepared to address the care needs of this population, which are complex due to altered physiology, functional and cognitive impairment, multiple coexisting diseases, increased side effects from treatment, and greater need for social support. Delivering High-Quality Cancer Care: Charting a New Course for a System in Crisis presents a conceptual framework for improving the quality of cancer care. This study proposes improvements to six interconnected components of care: (1) engaged patients; (2) an

adequately staffed, trained, and coordinated workforce; (3) evidence-based care; (4) learning health care information technology (IT); (5) translation of evidence into clinical practice, quality measurement and performance improvement; and (6) accessible and affordable care. This report recommends changes across the board in these areas to improve the quality of care. Delivering High-Quality Cancer Care: Charting a New Course for a System in Crisis provides information for cancer care teams, patients and their families, researchers, quality metrics developers, and payers, as well as HHS, other federal agencies, and industry to reevaluate their current roles and responsibilities in cancer care and work together to develop a higher quality care delivery system. By working toward this shared goal, the cancer care community can improve the quality of life and outcomes for people facing a cancer diagnosis.

As Hospice Nurses, we all know 'Bedside Charting' is optimal, but it's not always practical in the real, fast-paced world of Hospice Care. This notebook (6" x 9", 126 pages) will help you keep track of important patient visit info like VS, Last BM, MAC and it even helps you document your car mileage for each visit. Created by nationally known Hospice Nurse/Author/Speaker, Derek J. Flores, RN. It's a simple and easy way to stay organized. It's a great gift for a new or experienced Hospice Nurse.
