You may not have to worry about the guy next door putting three or four cars up on cinder blocks in the front yard, but now you have to worry about nosy Nazi neighbors, parking in your own driveway, the color you paint your door, the weight of your dog, and how much you are libel for when a bully board loses a lawsuit. You have to worry about embezzlement and bullies! You have to worry about tiny infractions of the CC&Rs that may lead to you losing your home. To help you prepare your defense, here are over 101 forms and documents to use and share with your neighbors. You can edit every form that comes with this book in a word document. NASA maintains a planetary protection policy to avoid the forward biological contamination of other worlds by terrestrial organisms, and back biological contamination of Earth from the return of extraterrestrial materials by spaceflight missions. Forward-contamination issues related to Mars missions were addressed in a 2006 National Research Council (NRC) book, Preventing the Forward Contamination of Mars. However, it has been more than 10 years since back-contamination issues were last examined. Driven by a renewed interest in Mars sample return missions, this book reviews, updates, and replaces the planetary protection conclusions and recommendations contained in the NRC's 1997 report Mars Sample Return: Issues and Recommendations. The specific issues addressed in this book include the following: The potential for living entities to be included in samples returned from Mars; Scientific investigations that should be conducted to reduce uncertainty in the above assessment; The potential for large-scale effects on Earth's environment by any returned entity released to the

environment; Criteria for intentional sample release, taking note of current and anticipated regulatory frameworks; and The status of technological measures that could be taken on a mission to prevent the inadvertent release of a returned sample into Earth's biosphere.

The manual is highly organized for ease of use and divided into the following major sections: -

Astrobiology is a scientific discipline devoted to the study of life in the universe - its origin, evolution, distribution, and future. In 1997, NASA established an Astrobiology program (the NASA Astrobiology Institute - NAI) as a result of a series of new results from solar system exploration and astronomical research in the mid-1990s together with advances in the biological sciences. To help evaluate the NAI, NASA asked the NRC to review progress made by the Institute in developing the field of astrobiology. This book presents an evaluation of NAI's success in meeting its goals for fostering interdisciplinary research, training future astrobiology researchers, providing scientific and technical leadership, exploring new research approaches with information technology, and supporting outreach to K-12 education programs.

Everyday life, no whether the issues or events arise next-door or a continent away, raises questions and concerns that the public counts on journalists to answer and, more important, confront. More than ever before, we all rely on the news media for warnings, explanations and insights. The profession - and society - cannot afford lazy, inept, uncommitted journalists. Today's reporters must learn how to cover public affairs intelligently and thoroughly. First you must learn about the institutions and people who influence the news; understanding how a legislative conference committee functions or how a trial is conducted remain important pre-requisites. But it is not enough merely to know how to report. Journalists must also understand how they see, define and influence the news. Don't be fooled by the daily dose of fluffy stories about fads, fashions or fetishes. People love to revel in celebrity gossip or fantasize about extreme makeovers. But Donald Trump's love life or the South Beach Diet don't satisfy when people worry about a home invasion in their neighborhood or a rezoning proposal to bring a Wal-Mart super center to town or a Department of Education report that their child's school scored bottom-most in reading achievement. *Public Affairs Reporting Now* is intended to teach you the best practices and give you the best advice for covering what's generically known as "public affairs reporting. It's a term that's neither inspiring nor precise, but it's long been a convenient way of describing the kind of news coverage that keeps people informed as citizens and keeps our institutions, public and private, focused on the public good.
