Excerpt from Biographical Sketch of Linton Stephens: Containing a Selection of His Letters, Speeches, State Papers, Etc The life of linton stephens was one of character rather than of incident - more the life of a thinker than an actor upon the stage of human affairs. He chose to be a spec tator of passing events, and was content to weigh their sig nificance and watch their succession through the loopholes of retreat, so as not to feel the pressure of the crowd. He had little relish for the hot arena of the world-strife. The mild dignity that environs the good citizen was more beautiful and more attractive in his eyes, and more grateful to his tastes and habitudes, than the applause of listening senates, or the Victor's wreath of laurel. The blaze of public notoriety he shunned. He shrunk from all manner of self-exposition or display. Vain-glory was not among the imperfections of his nature. He was perfectly satisfied with knowing the truth of anything, or any fact, kimsel uncaring whether the outside world appreciated his knowl edge thereof or not; hence, he had no ambition to make history: he was content to study its lessons, interpret its facts, and learn wisdom from its teachings. Although it was impossible for a man of the parts he had, not to be conspicuous among men; and although his opinions upon every subject - large enough to agitate a free people - were anxiously sought after, impatiently waited for, and eagerly canvassed, yet he never held, nor - left to his own volition ever aspired to hold, high political station. For this rea son, the general reader of these pages will remark the lack ing, somewhat, of that significance of events in the story of his life which imparts the chief interest, attraction, and charm to biography. Excerpt from A Biographical Sketch of John Riggs Murdock Among those who dedicated to the Church and its cause their best efforts, efforts of in tense patriotism, and whose endurance was the crowning glory of those times, the name of John R. Murdock plays an important part. Had others not drawn out from him the story of his life, its inspiration and its example would have been lost to the world. When the manuscript prepared from facts given by him' was read for his approval his only remark was: They have made quite a man of me. He made himself, but the value of his life to others he had perhaps never realized. When asked how many books he wanted, his reply was an edition just enough for his family. Certain that the book would find interest and value beyond the confines of his home and rela tions, a larger edition is published. The story of his life is one which all who would emulate his integrity and his example may desire to read. The author. Practitioners in informal science settings--museums, after-school programs, science and technology centers, media enterprises, libraries, aquariums, zoos, and botanical gardens--are interested in finding out what learning looks like, how to measure it, and what they can do to ensure that people of all ages, from different backgrounds and cultures, have a positive learning experience. Surrounded by Science: Learning Science in Informal Environments, is designed to make that task easier. Based on the National Research Council study, Learning Science in Informal Environments: People, Places, and Pursuits, this book is a tool that provides case studies, illustrative examples, and probing questions for practitioners. In short, this book makes valuable research accessible to those working in informal science: educators, museum professionals, university faculty, youth leaders, media specialists, publishers, broadcast journalists, and many others.

Excerpt from A Biographical Sketch of William Franklin Gentlemen - Although I have consented to occupy a part of your time at this meeting, yet I feel that I should ask your indulgence for the imperfections which may be observed in what I am about to read. For being only a portion of a manuscript of miscellaneous gleanings in the forgotten past, prepared with no view of being laid before the Society, it is in some respects of a different character from what it would have been had it been designed for a distinct paper. It may however afford some information not generally known respecting the individual of whom it treats, and serve to refresh the memory of those already to some extent acquainted with his life and character. Dr. Franklin, identified with so much that is interesting in the history of America had one son. That son, William Franklin, was Governor of New Jersey at the period when, through the blessing of Providence upon earnest self devoting efforts, our country was happily enabled to throw off the oppressive burdens which the short sighted policy of England's rulers would have fastened upon her, and assumed 'among the nations of the earth the separate and equal station to which the laws of nature and of nature's God entitled her.' William Franklin was born in the Province of Pennsylvania in 1731 - but of his youth little is known. He early showed a marked predilection for books, which his father of course encouraged; but with advancing years the quiet walks of an academic life appear to have lost their charm? in some measure, and a disposition was manifested by him to seek employment in the stirring pursuits of a military career. Disappointed in an attempt made to connect himself clandestinely with a privateer fitting out at Philadelphia, he was subsequently gratified by the receipt of a commission in the Pennsylvania forces, and served in one or more campaigns on the northern frontier before he was of age, rising from a subordinate station to the rank of Captain. Excerpt from The American Biographical Sketch Book Andrew fuller once remarked that he would rather be like the moon, which, although full of spots and imperfections, lends a useful light to men, than a meteor, with its dazzling but transient glare, exciting only the wonder of mankind. It was in the spirit of this sentiment that we compiled the following pages, embracing brief sketches, for the most part, of the lives of men who, by unwearied perseverance, have triumphed over difficulties. Born in an humble sphere, which precluded the advantages of a liberal education, we resolved, that although unable to write a learned work, we would attempt to produce a useful one. Hence, the fastidious critic who shall search for faults, will be rewarded with an abundant harvest. If, however, this volume shall serve as a hint to those so well able to write a better, a valuable end will have been attained. But, in the absence of such, we flatter ourself that the biographical sketch Boox, with all its defects, will not be entirely unacceptable to a discerning public. The needle, although unpolished, may yet serve to point the way to the pole 5 and if the examples set forth shall cheer but one sufferer, and enable him to wait with patience for the bright dawning of to-morrow, the labor will not have been in vain. Excerpt from Edwin P. Morrow Kentuckian: A Contemporaneous Biographical Sketch During the revision of the last page proofs of this little book, the thought has come to my mind that some may thoughtlessly accuse me of planning a de liberate appreciation of Governor Morrow and his party. This is not so, and nothing could be more contrary to the fact. While I admire Governor Mor row for many of his excellent traits and abilities, I do not agree with many of his policies and executive decisions. My real purpose has been to set down in readable form some of the outstanding facts of re cent Kentucky history, and to do so I have used both narrative and biography. The historical period of this book ends. Dec. 9, 1920, the complement of Gov. Mor row 's first year in office. Events transpiring subse quently have not been considered. Though handling. Most scholars consider Melanchthon to be a Reformation enigma. He, the developer of the Reformation doctrine of forensic justification, is contrarily condemned as a synergist. Known well as the Protestant preceptor of Germany, he was Martin Luther's lifelong friend, colleague, teacher of Greek, and fellow reformer. Upon arriving at Wittenberg, Melanchthon was a theologian neither by trade nor by training. He was a classically trained expert in classical languages, neo-Latin poet, textbook author, Greek scholar, humanist, and above all, an educator Though he was offered a doctorate on several occasions, he was not a doctor of theology. Yet his influence on the protestant reformation of the 16th century is profound, both through the LocI Communes (the first Lutheran systematic theology) and the Augsburg Confession both of which came from his pen. Dr. Scott Keith, who has spent much time studying and translating this great reformer, has written this short biography by way of introduction. Also, Melanchthon speaks for himself in fresh translations of his work.

The advice in this book is useful for many types of grant applications, business plans, journal articles, and research reports.

This volume summarizes a range of scientific perspectives on the important goal of achieving high educational standards for all students. Based on a conference held at the request of the U.S. Department of Education, it addresses three questions: What progress has been made in advancing the education of minority and disadvantaged students since the historic Brown v. Board of Education decision nearly 50 years ago? What does research say about the reasons of successes and failures? What are some of the strategies and practices that hold the promise of producing continued improvements? The volume draws on the conclusions of a number of important recent NRC reports, including How People Learn, Preventing Reading Difficulties in Young Children, Eager to Learn, and From Neurons to Neighborhoods, among others. It includes an overview of the conference presentations and discussions, the perspectives of the two co-moderators, and a set of background papers on more detailed issues.

Excerpt from A Biographical Sketch of James Jensen It was the intention originally to summarize briefly the leading events in the life of James Jensen. Contrary to all expectations, the sub ject matter of this small volume grew beyond the limitations put upon it. The writer, believ ing that many of the events connected with this biography and belonging to the history of Forest Dale would be a source of interest to the people generally of the Ward, therefore obtained the consent of the Bishop to the publi cation of his biography in book form. This consent was given with great reluctance on the part of Bishop Jensen whose fears about be coming modesty, undue pretentious, and adverse criticism had to be overcome by per sistent effort and persuasion. The author as sumes all responsibility for whatever publicity this volume may acquire. If its subject matter should prove as interesting to the reader as it has been to the writer, the latter will have no apology to make for offering this book to the members of the Ward and the friends of its worthy Bishop.
