The Galaxy Note 10 isn't just thinner and lighter than the Note 9, but it's one of the most compact phones ever. Samsung built the Galaxy Note brand on delivering the best big-screen phones around. The 6.3-inch Note 10 is one of the most compact big-screen phones yet, thanks to its nearly bezel-free Infinity-O screen - and some features Samsung left on the cutting room floor. The Note 10 also boasts several S-Pen enhancements (including gestures), a better camera for video recording, outstanding hardware, excellent battery life and an easier way to mirror the phone on a PC. However, these devices pack so much inside that setting up and personalizing your Galaxy Note 10 can be an intimidating process - especially if you don't know where the pertinent settings can be found. For instance, all the phone's buttons are on the left side of the Note 10 plus. Pressing and holding the power button activates Bixby instead of offering power options. So there is a learning curve in getting used to the Note 10 Plus' layout. This complete step-by step guide will guide you through all the basics and advance tips and tricks to master your device like a pro. Add this guide to your library now and make the most of your device. The Galaxy A12 was unveiled by Samsung on November 24th 2020. Unsurprisingly, given its designation, the Galaxy A12 is another wonderful and beautiful budget smartphone which belongs to the 2021 Galaxy A lineup gadget. The Galaxy A12 has a good unibody design, this means that it doesn't have a metal frame like many other Galaxy phones on the market, separating the front and back panels. Instead, the case is designed with just a single molded piece that belts around all four edges until it gets to the display. The phone carries some physical buttons on the right side of the edge, and the back panel is also built to accommodate a square-shaped camera module alongside with an LED flash. The Samsung Galaxy A12 is designed to use an Infinity-V display with a V-shaped notch as well. This smartphone measures at 164 x 75.8 x 8.9 mm, it also weighs 205 grams, and its going to be in circulation in four beautiful color options: black, blue, red, and white. The Galaxy A12 comes with a 6.5-inch HD+ TFT display driven by an unspecified octa-core chipset with two unique CPU assembled together, operating at frequencies of 1.8GHz and 2.3GHz.
