"From award-winning actor and food obsessive Stanley Tucci comes an intimate and charming memoir of life in and out of the kitchen"--  
A longtime professor at the Naval War College who once directed strategic and long-range planning for the Navy and Marine Corps in Europe considers the transformation of the U.S. Navy from a defensive-minded coastal defense force into an offensive risk-taking navy in the very early stages of World War II. Noting that none of the navy's most significant World War II leaders were commissioned before the Spanish-American War and none participated in any important offensive operations in World War I, Douglas Smith examines the premise that education, rather than experience in battle, accounts for that transformation. In this book, Smith evaluates his premise by focusing on the five carrier battles of the second world war to determine the extent to which the inter-war education of the major operational commanders translated into their decision processes, and the extent to which their interaction during their educational experiences transformed them from risk-adverse to risk-accepting in their operational concepts. His book will interest students of the Pacific War, naval aviation, education, and leadership.

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

The Advocate is a lesbian, gay, bisexual, transgender (LGBT) monthly newsmagazine. Established in 1967, it is the oldest continuing LGBT publication in the United States.

The Life of Thomas Telford, Civil Engineer

**Analyzing the crucial period of the Cuban Revolution from 1959 to 1961, Samuel Farber challenges dominant scholarly and popular views of the revolution's sources, shape, and historical trajectory. Unlike many observers, who treat Cuba's revolutionary leaders as having merely reacted to U.S. policies or domestic socioeconomic conditions, Farber shows that revolutionary leaders, while acting under serious constraints, were nevertheless autonomous agents pursuing their own independent ideological visions, although not necessarily according to a master plan. Exploring how historical conflicts between U.S. and Cuban interests colored the reactions of both nations' leaders after the overthrow of Fulgencio Batista, Farber argues that the structure of Cuba's economy and politics in the first half of the twentieth century made the island ripe for radical social and economic change, and the ascendant Soviet Union was on hand to provide early assistance. Taking advantage of recently declassified U.S. and Soviet documents as well as biographical and narrative literature from Cuba, Farber focuses on three key years to explain how the Cuban rebellion rapidly evolved from a multiclass, antidictatorial movement into a full-fledged social revolution.**

**Nina Sankovitch's American Rebels explores, for the first time, the intertwined lives of the Hancock, Quincy, and Adams families, and the role each person played in sparking the American Revolution. Before they were central figures in American history, John Hancock, John Adams, Josiah Quincy Junior, Abigail Smith Adams, and Dorothy Quincy Hancock had forged intimate connections during their childhood in Braintree, Massachusetts. Raised as loyal British subjects who quickly saw the need to rebel, their collaborations against the Crown and Parliament were formed years before the revolution and became stronger during the period of rising taxes and increasing British troop presence in Boston. Together, the families witnessed the horrors of the Boston Massacre, the Battles of Lexington and Concord, and Bunker Hill; the trials and tribulations of the Siege of Boston; meetings of the Continental Congress; transatlantic missions for peace and their abysmal failures; and the final steps that led to the signing of the Declaration of Independence. American Rebels explores how the desire for independence cut across class lines, binding people together as well as dividing them—rebels versus loyalists—as they pursued commonly-held goals of opportunity, liberty, and stability. Nina Sankovitch's new book is a fresh history of our revolution that makes readers look more closely at Massachusetts and the small town of Braintree when they think about the story of America's early years.**

Los Angeles magazine is a regional magazine of national stature. Our combination of award-winning feature writing, investigative reporting, service journalism, and design covers the people, lifestyle, culture, entertainment, fashion, art and architecture, and news that define Southern California. Started in the spring of 1961, Los Angeles magazine has been addressing the needs and interests of our region for 48 years. The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian.

This interdisciplinary book is written for government and industry professionals who need a comprehensive, accessible guide to modern energy security. Introducing the ten predominant energy types, both renewable and non-renewable, the book illustrates the modern energy landscape from a geopolitical, commercial, economic and technological perspective. Energy is presented as the powerhouse of global economic activities. To ensure the uninterrupted supply of energy, nations, industries and consumers need to have options. Efficient energy security planning ensures that when a primary energy source is depleted, compromised or interrupted, an alternative energy source must be readily available. For this reason, the foundations of energy security are built upon the five pillars of Sustainability, Independence, Efficiency, Affordability and Accessibility. The numerous case studies presented in this book demonstrate that energy security may be compromised in the absence of one out of these five ingredients. The book also entertains the Triple-E notion of Energy Efficiency, Environmental integrity and Economies of scale, used by governments and corporations for energy optimization. One of the key strengths of the book is its ability effectively to cover various scientific disciplines, and several energy types, while remaining comprehensible. This book will be of much interest to security or logistics professionals, economists and engineers, as well as policymakers.

The Monthly Review

*The whole life of some people is a kind of partial death--a long, lingering death-bed, so to speak, of stagnation and nonentity on which death is but the seal, or solemn signing, as the abnegation of all further act and deed on the part of the signer. Death robs these people of even that little strength which they appeared to have and gives them nothing but repose.*
