As young kids, SAVI and VID, as they are popularly known to their followers, dreamt of travelling the world together. In 2013, they turned this dream into reality with the launch of their travel blog, BRUISED PASSPORTS. And now, countless flights, dreamy destinations and beautiful pictures later, the OG couple of travel has decided to reveal the secret of their carefree and footloose life. But this isn't just a book filled with dreamy stories of travel, people and culture; in these pages, Savi and Vid share their insights on how you, too, can live a life full of memories, adventure and the excitement of discovering a new place. With tips, plans and advice inspired by the hurdles and successes they have faced, Savi and Vid tell you how to be successful digital nomads in a post-pandemic world. From financial planning to, risk analysis, to taking that leap of faith, to how to create a brand of your own, BRUISED PASSPORTS promises to be a treasure trove for anyone who wants to take the plunge and set off on a journey to live life on their own terms.

This New York Times bestselling book is filled with hundreds of fun, deceptively simple, budget-friendly ideas for sprucing up your home. With two home renovations under their (tool) belts and millions of hits per month on their blog YoungHouseLove.com, Sherry and John Petersik are home-improvement enthusiasts primed to pass on a slew of projects, tricks, and techniques to do-it-yourselfers of all levels. Packed with 243 tips and ideas—both classic and unexpected—and more than 400 photographs and illustrations, this is a book that readers will return to again and again for the creative projects and easy-to-follow instructions in the relatable voice the Petersiks are known for. Learn to trick out a thrift-store mirror, spice up plain old roller shades, "hack" your Ikea table to create three distinct looks, and so much more.

A systematic introduction to Buddhist ethics aimed at anyone interested in Buddhism.

"You are gods." Blasphemy? No, those mysterious words, spoken by Jesus in the Gospel of John and alluded to in Psalm 82, point to a holy longing deep in our hearts that tells each of us that we were created for more. "Imagine that you were to wake up tomorrow to discover that, by some miracle, you had become a god overnight," writes Dr. Gregory Popcak. "Not THE God—omnipresent, all-knowing, all-powerful—but a god in the classic sense. That is to say, you woke to find that you were perfect, immortal, utterly confident in who you are, where you were going in life, and how you were going to get there. It might seem ridiculous to consider at first, but allow yourself to imagine this truly miraculous transformation. What would it be like to live without fear? How would it feel to be completely at peace with yourself and the people in your life? Imagine what it would be like to be able to resolve—once and for all—the tension that currently exists between all your competing feelings, impulses, desires, and demands. What would change in your life as a result of your having become that sort of divinely actualized person?" Bold questions are in need of bold answers. And in Broken Gods, a work that is both practical and inspirational, Dr. Greg explores what our deepest desires--and even our darkest desires-- tell us about our ultimate destiny and reveals a commonsense approach to fulfilling our true purpose in life.

A Complete Guide to Traditional Thai Massage Therapy and Acupressure

This publication is a result of a 2-year innovative, exploratory, and reflective study of cities as unique urban spaces that support and play. It responds to major issues that affect the quality of life of urban residents. This publication offers practical ways that managers, urban practitioners, businesspeople, and citizens can engage to make cities more livable by building on their distinctive social, cultural, and economic characteristics. With the adoption of the Sustainable Development Goals by the United Nations, this book comes at the right time to offer integrated urban development solutions that can translate global development commitments into actions to achieve livable cities.

'Without vision the people perish.' So wrote the poet William Blake. Lord Northbourne (1896-1982) was a man of exceptional comprehensive vision, who diagnosed the sickness of modern society as stemming from the severance of its organic links with the wholeness of life. But like his better-known younger contemporary E. F. Schumacher (author of Small is Beautiful), whose work developed on similar lines, Northbourne's occupation as a practicing organic farmer (he coined the term) was joined to a deep conviction that we do not live by bread alone, and that the fullness of life properly integral to human nature demands obedience to sacred laws. His vision of life came to embrace the interrelationship of God, humanity, and the soil as a unity presupposing a way of life in stark contrast to that of the myopic, mechanistic world he saw encroaching on all sides. And so, as it becomes increasingly evident that such a world stands to imperil our very future and that of the delicate ecosystem on which all life depends, it is time to re-examine the vision of a pioneering thinker. In an age of specialization and fragmentation, we have much to learn from Northbourne, whose vision of a life required by a truly meaningful and sustainable society embraced religion, farming, the arts, the rural crafts, monetary form, and metaphysics. Northbourne's later works, Religion in the Modern World and Looking Back on Progress, present his wider reflections on the relationship between Divine and human society, but always with the sensibility of a man who knows the soil, recalling in many ways the writings of Wendell Berry. He corresponded with Thomas Merton, as well as mountaineer and Tibetan Buddhist Marco Pallis (The Way and the Mountain), who introduced him to the school of perennialist writers. Northbourne translated René Guénon's The Reign of Quantity and the Decay of Spirituality, which the Times, described by Huston Smith as one of the truly seminal books of the twentieth century, as well as Frithjof Schuon's The Sacred and the Profane, Ancient Worlds and Titus Burckhardt's Sacred Art in East and West. He was also an accomplished flower gardener and water gardener, and a frequent contributor to the British periodical Studies in Comparative Religion, described by Schumacher as one of the two most important journals to read. Sophia Perennis is republishing all three of Northbourne's works, a fourth volume of uncollected essays spanning religion, agriculture and metaphysics, as well as the 23-volume Collected Writings of René Guénon, including The Reign of Quantity. Lord Northbourne (1896-1982) was a man of exceptional vision, who already in the 1940s diagnosed in detail the sickness of modern society as stemming from the severance of its organic links with the wholeness of life. A leading figure in the early organic farming movement, his writings profoundly affected such other pioneers as Sir Albert Howard, Rolf Gardiner, Ehrenfried Pfeiffer, and H. J. Massingham.

led him on to a profound study of comparative religion, traditional metaphysics, and the science of symbols, which he employed in his observations on the character of modern society. His later writings exercised considerable influence on his younger contemporaries, including Schumacher and Thomas Merton, and in many ways anticipate the essays of Wendell Berry. The republication of this milestone text will be followed by three volumes of Northbourne's later metaphysical and cultural writings. "A major text in the organic movement, long out-of-print" - Philip Conford, *The Origins of the Organic Movement* "We have tried to conquer nature by force and by inhumanity, now remains for us to try the way of love." - From the book (possibly for front cover, if not too long?)

Graffiti. It can be a diverse form of expression and thoughtprovoking art; whether painted on the side of a train or on a canvas in a gallery. Or, as you will see immortalised in the glorious pages of *Crap Graffiti*, it can be crude drunken daubing, nonsensical scribbles, hilarious outpourings of uncontained rage. *Crap Graffiti* documents these bizarre and puerile creations, celebrates the inept and enthusiastically applauds creative dyslexia. This is definitely not art, but really awful, lame graffiti: the incompetent attempts at art or the 'profound' musings of lunatics scrawled on the back of toilet cubicle doors. Welcome to the Cream of the Crap.

Set in an alternative 1845 with France and Britain locked in a war for global supremacy. This is a steampunk adventure which takes place in an alternative 19th century of giant airships, steam-powered automata, floating cities and giant mechanical birds. Napoleon's invasion threatens to invade Britain, his secret weapon a titanic airship. Can 18-year-old Lady Arabella West leader of the all-female spies team the "Sky Sisters" save Britain.

The 21st Century Maritime Silk Road is a key component of China's Belt and Road Initiative and, as such, can play a crucial role in the development of maritime infrastructure throughout Asia and the Pacific in the coming years. This report, developed with the kind support of Sunny International, looks into the overall impacts of the Maritime Silk Road on tourism and assesses the tourism potential of Maritime Silk Road thematic routes across Asia and beyond. The report shows that cruise tourism, targeted investments in decayed maritime infrastructure and the reutilization of ancient port cities can reinvigorate available heritage, support local communities and help diversify a country's tourism sector.

Drawing from Thai history, cultural studies, Buddhist religion, and yogic practices, as well as a modern understanding of anatomy and physiology, this guidebook bridges the gap between theory and practice while presenting bodywork as it is understood in Thailand—as a therapeutic medical science. Presenting detailed analysis of each step in a Thai massage routine, the history, spiritual traditions, and ethical codes are offered in an engaging, informal style. Numerous photographs and diagrams illustrate the variety of techniques used, and examples of routines for treating specific disorders are discussed. Updated with new layout, photos, and expanded text, this exhaustive handbook is complete with a section on the main energy meridians and diagrams of acupressure points, making it the perfect tool to accompany anyone studying this popular healing modality.

Innovative markets for sustainable agriculture

When Noot is finally allowed to paint umbrellas like the other women and girls in her village, she secretly hopes that she might be chosen as this year's Umbrella Queen. Carefully, she creates serene flowers and butterflies exactly as she has seen her mother and grandmother do for years. But soon her imagination takes over, and Noot finds herself straying from the old patterns, to the dismay of her family, who depend on the traditionally painted umbrellas for their livelihood. Her parents tell her she must go back to the old designs and Noot obeys, knowing that the King is coming soon to name the one who has painted the most beautiful umbrella. After all, the King would never choose a queen who breaks from tradition . . . would he?

Accessible, succinct, and including numerous student-friendly features, this introductory textbook offers an exceptional foundation to the field for those who are coming to it for the first time. Provides an ideal first course book in phonology, written by a renowned phonologist. Developed and tested in the classroom through years of experience and use. Emphasizes analysis of phonological data, placing this in its scientific context, and explains the relevant methodology. Guides students through the larger questions of what phonological patterns reveal about language. Includes numerous course-friendly features, including multi-part exercises and annotated suggestions for further reading at the end of each chapter.

This volume examines contemporary Thailand. It captures aspects of Thai society that have changed dramatically over the past years and that have turned Thailand into a society that is different from what most people outside the country know and expect. The social transition of Thailand has been marked by economic growth, population restructuring, social and cultural development, political movements, and many reforms including the national health care system. The book covers the social, cultural, and economic changes as well as political situations. It discusses both historical contexts and emerging issues. It includes chapters on social and public health concerns, and on ethnicity, gender, sexuality and social class. Most chapters use information from empirical-based and historical research. They describe real life experiences of the contributors and Thai people who participated in the research.

The easy way to transition to the raw food lifestyle Celebrities like Demi Moore, Sting, Madonna, and Woody Harrelson as well as experts in diet and nutrition have drawn attention to the newest trend in eating: raw foods. As the demand for raw foods increases, so does the demand for informative and supportive facts about this way of life. Raw Food For Dummies shares reasons for incorporating raw food into your diet and life, tips on how to do it, and includes nearly 100 recipes. Whether you're interested in incorporating raw foods into an existing meal plan, or transitioning to a raw foods-only diet, Raw Food For Dummies will help. Main areas of coverage include the benefits of eating raw foods, tips for avoiding undernourishment and hunger, information on transitioning to the raw food lifestyle (including where to buy and how to store raw foods), along with coverage of the popular methods of preparing meals, including sprouting, dehydrating, juicing, and greening. Features nearly 100 recipes covering breakfast, lunch, dinner, appetizers, and snacks Includes advice on transitioning to the raw food lifestyle Written by a veteran vegan chef and culinary arts teacher Raw Food For Dummies is for anyone interested in incorporating raw foods into an existing meal plan, as well as people interested in transitioning to a raw foods-only diet.

Between 2013 and 2015, the Food and Agriculture Organization of the United Nations (FAO) and the French National Institute for Agricultural Research (INRA) undertook a survey of innovative approaches that enable markets to act as incentives in the transition towards sustainable agriculture in developing countries. Through a competitive selection process, 15 cases from around the world provide insights into how small-scale initiatives that use sustainable production practices are supported by market demand, and create innovations in the institutions that govern sustainable practices and market exchanges. These cases respond to both local and distant consumers' concerns about the quality of the food that they eat. The book evidences that the initiatives rely upon social values (e.g. trustworthiness, health [nutrition and food safety], food sovereignty, promotion of youth and rural development, farmer and community livelihoods) to adapt sustainable practices to local contexts, while creating new market outlets for food products. Specifically, private sector and civil society actors are leading partnerships with the public sector to build market infrastructure, integrate sustainable agriculture into private and public education and extension programmes, and ensure the exchange of transparent information about market opportunities. The results are: (i) system innovations that allow new rules for marketing and assuring the sustainable qualities of products; (ii) new forms of organization that permit actors to play multiple roles in the food system (e.g. farmer and auditor, farmer and researcher, consumer and auditor, consumer and intermediary); (iii) new forms of market exchange, such as box schemes, university kiosks, public procurement or systems of seed exchanges; and (iv) new technologies for sustainable agriculture (e.g. effective micro-organisms, biopesticides and soil analysis techniques). The public sector plays a key role in providing legitimate political and physical spaces for multiple actors to jointly create and share sustainable agricultural knowledge, practices and products.

Trails and routes have been indispensable to travel and tourism over the centuries, helping to form the basis of mobility patterns of the past and the present. This book is the first to comprehensively examine these tourism trails from a tourism and recreation perspective. This cutting-edge volume is global in scope and discusses a wide range of natural, cultural and developed linear resources for tourism and recreation. The book will be suitable for both researchers and students who are interested in cultural heritage-based tourism, recreation and leisure studies, landscape and change, human mobility, geography, environmental management, and broader interests in destination planning, development and management.

Traveler's Choice Award in 2012, 2013, 2014, and 2015. Important Notice: The digital edition of this book may not contain all of the images of the physical edition.

The documents in this series originated with a proposal made by R. Buckminster Fuller to the International Union of Architects (I. U. A.) at the Congress in London, England in July, 1961, launching the World Design Science Decade. He proposed then that the architectural schools of the world be encouraged by the I. U. A. to invest the next ten years in a continuing problem of how to make the total world's resources which only 40% serve 100% of humanity through competent design despite a continuing decrease of material resources per capita. In essence, The Design Science Decade series of documents suggests, in great detail, ways in which world architectural schools, and specifically their students, should assume The Design Science Decade. The total series includes many of Fuller's most prescient ideas. A note from the series editor, John M. R. Fuller, says: "The language of some of the texts may seem difficult at first approach, it should be borne in mind that one of our major problems in this century is the use of language systems which still represent a fixed, structurally compartmentalized world view. The terms available to us for the expression of dynamic, rather than static, concepts are far from satisfactory. Fuller's language is particularly representative of the 'transitional state' (of the world) between the older, traditional, noun-centered culture to its present day, changing, verb-centered culture'. In his search for an adequate terminology he tends to employ concepts and usages from many different fields juxtaposed in ways which may be unfamiliar to those more restrained within the vocabularies of particular disciplines." Description by the Buckminster Fuller Institute, courtesy of The Estate of R. B. Fuller

Jews and humor is for most people a natural and felicitous collocation. In spite of or perhaps because of a history of crises and living on the edge, Jews have often created or resorted to humor. But what is "humor"? and what makes certain types instances or performances of humor "Jewish"? Among the myriad queries addressed by the fourteen authors whose essays are collected in this volume, and thankfully their observations are often witty are expressed with a lightness of style and a depth of analysis that are appropriate to the many topics they cover. The chronological range of these essays is vast: from the Hebrew Bible to the 2000s with many stops in between for Talmudic texts medieval parodies eighteenth century and twentieth century popular entertainment. The subject matter is equally impressive. In addition to rounding up many of the "usual suspects" like Woody Allen the Marx Brothers and Gilda Radner these authors also scout out some unlikely comic resources like the author of the biblical story of the rabbinic writer of Genesis Rabbah and the party records star Belle Barth. Without forcing any of these characters into a pre-constructed mold, the scholars who contributed to this collection allow readers both to discern the common features that make up "Jewish humor" and to delight in the individualism and eccentricities of the many figures whose lives and accomplishments are narrated here. Because these essays are written in a free style they will appeal to everyone-even those who don't usually crack a smile!

This novel is a precious gem based on true events. You will delight as Sunshine takes you back through the memories of her life with Fields. The death of Fields brings their relationship into another dimension. Field Notes is an insightful, fictional memoir and compelling novel chronicling a woman's triumph over a lifetime of living. Sunshine takes you back to a time she and Fields shared memorable moments together. After he is gone, she looks to the future. Sunshine's strong narrative personality has a deep insight into the human condition and gives to you people who are dimensionally challenged. Sunshine looks at the world through a very original eye and she is clear about her views. She is not equivocal and not self-doubting, which makes her an appealing character in this day and age of too much fretful self-examination. She makes sense of her world and does not much quarrel with it. She is as skillful as she weaves the characters and the events of their lives into a tapestry of living a life in which there is philosophizing and the realization of a purpose.

One of the leading texts in the field, The Economics of Recreation, Leisure and Tourism is the ideal introduction to the fundamentals of economics in these industries, helping you to enjoy and pass an economics module as part of tourism, recreation, events or sport management degrees. International in its outlook, it will equip you with vital skills and knowledge for your future career as well as critical skills to help you understand and help tackle crucial challenges facing the world. It is written in a clear and engaging style that assumes no prior knowledge of economics. It applies economic theory to a range of tourism industry issues at the consumer, business, national and international level by using topical examples to give the theory real-world context. This book is richly illustrated with diagrams and contains a range of features such as international case studies showcasing current issues, review questions and extracts from journals to aid understanding and further knowledge, as well as new data and statistics. It concludes with a powerful critique of traditional economics and a set of twenty-one issues that demand action. This sixth edition has been revised and updated to include: recent and time series international economic data to provide a sense of the dynamics of world economies topical analysis to aid decision making for industry, governments and pressure groups a renewed emphasis on environmental and climate change issues new and revised international case studies that demonstrate theoretical principles of economics as applied to the sector a companion website with PowerPoint slides. Presents the 1972 predictions of what life would be like in the future year 2011, including automatic showers, online shopping, electronic thumbprint identification programs, complex computers, and worldwide air travel.

This book provides a hands-on, practical guide to understanding derivatives pricing. Aimed at the less quantitative practitioner, it provides a balanced account of options, Greeks and hedging techniques avoiding the complicated mathematics inherent to many texts, and with a focus on modelling, market practice and intuition.

Third edition of International Conference on Intelligent Computing and Optimization and as a premium fruit, this book, pursue to gather research leaders, experts and scientists on Intelligent Computing and Optimization to share knowledge, experience and current research achievements.

Conference and book provide a unique opportunity for the global community to interact and share novel research results, explorations and innovations among colleagues and friends. This book is published by SPRINGER, Advances in Intelligent Systems and Computing. Ca. 100 authors submitted full papers to ICO'2020. That global representation demonstrates the growing interest of the research community here. The book covers innovative and creative research on sustainability, smart cities, meta-heuristics optimization, cyber-security, block chain, big data analytics, IoTs, renewable energy, artificial intelligence, Industry 4.0, modeling and simulation. We editors thank all authors and reviewers for their important service. Best high-quality papers have been selected by the International PC for our premium series with SPRINGER.
