With the increased interest in and demands for compost from commercial horticultural industries, composting is on the verge of becoming an economically feasible option for waste management. While horticultural producers can create some of the compost to meet their own needs, demand has grown beyond what they can supply for themselves and others. Compost Utilization in Horticultural Cropping Systems gives you the tools to meet the needs of this growing industry. Consider these statistics: Americans generate about 200 million megagrams of municipal solid waste per year The

Real World Psychology, a brief version of Huffman's Psychology in Action, reflects Huffman's core "student/active classroom" philosophy and is designed specifically for the unique needs of those who demand big things from a small package. This text ties every single concept to a real-world, in-text example by utilizing case studies, photos, graphs, news stories and charts. This brief approach allows readers to grasp the "big picture" in psychology without an abundance of supplementary details.
