By piecing the lives of selected individuals into a grand mosaic, Pulitzer Prize-winning historian Daniel J. Boorstin explores the development of artistic innovation over 3,000 years. A hugely ambitious chronicle of the arts that Boorstin delivers with the scope that made his Discoverers a national bestseller. Even as he tells the stories of such individual creators as Homer, Joyce, Giotto, Picasso, Handel, Wagner, and Virginia Woolf, Boorstin assembles them into a grand mosaic of aesthetic and intellectual invention. In the process he tells us not only how great art (and great architecture and philosophy) is created, but where it comes from and how it has shaped and mirrored societies from Vedic India to the twentieth-century United States.

Narrator Gladys Cailiff is eleven years old in 1938 when a worldly schoolteacher turns the small town of Threestep, Georgia, upside down. Miss Grace Spivey defies the traditional curriculum and racial boundaries alike, regaling her charges with readings from the Thousand Nights and a Night and casting a gifted African American student as "chief engineer" of the town's annual festival, newly reinvented as the Baghdad Bazaar. But her progressive actions are not without consequence and ultimately culminate in a night of death-defying stories that take readers on a magic carpet ride from a schoolroom in the South to the banks of the Tigris (and back again).
