A series of titles written to cover the complete Cambridge IGCSE Mathematics (0580) syllabus and endorsed by Cambridge International Examinations.

Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications—in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

A memoir of Cassie's life leading up to, and during her Expedition around the world. At age twenty-seven, Cassie De Pecol accomplished something remarkable. She became the first woman on record to travel to every country on Earth, and did it faster than anyone in history, male or female. She was inspired by her experiences on the Discovery Channel's Naked and Afraid both the three weeks she spent in the Panamanian wilderness and the cyberbullying she endured after the show. And it opened her eyes to the need for women to make a difference in the world. In Expedition 196, Cassie shares the secrets behind her personal triumphs and miraculous achievements. It's the story of a dreamer and a doer who went from restless college dropout to fearless adventurer to philanthropist and humanitarian activist dedicated to female empowerment and global sustainability. Thrilling, inspiring, and unforgettable, Expedition 196 views the world through the eyes of one extraordinary young woman whose heart took her farther than most people can even imagine.

The author, an American anthropologist, describes her experiences during the year she spent as a Japanese geisha, and looks at the role of women, and geishas, in modern Japan

Dr. Jang's SAT 800 Math Workbook provides all the material you need to know to get a perfect score on the math section of the SAT exam. It was designed for students of any level to get an excellent math score on the SAT in a short period of time by helping them focus on the content required for the test and the skills to tackle the questions

quickly and easily. This book divides the required content knowledge into three chapters. Within each chapter, all necessary sub-concepts are given in-depth instruction as well as numerous practice questions provided to mimic those on the actual SAT. Each section has questions grouped into three levels: easy, medium, and hard. Problem

solving tips and answers are located to the right of the problem. This makes it easy for students to references the answer but can be easily covered if the student wants to attempt the problem first before consulting the solutions. In addition to a thorough overview of materials, this book provides over 1500 practice problems for students to

reinforce their understanding of the material and pinpoint their weak areas you need to improve on. This book also showcases proven advice that aid in the critical thinking and problem solving process. The ten SAT math mock tests located at the back of book closely mimic the actual exam and provide even more practice. By taking these

mock exams with a timer under test-like conditions, students will be even more prepared to master the real test. The redesigned SAT, which will be launched in 2016, will increase its focus on data analysis, problem solving, algebra and the topics leading into advanced math. The top score will return to 1600, which includes 800 points from the

math section. The problems in this book help you prepare for both versions of the SAT. Working on the problem solving skills section in this book will help you build up a strong sense of intuition for when you need to make educated guesses on problems you do not immediately know how to solve.
