Putting Greece back on the cultural and political map of the "Long 1960s," this book traces the dissent and activism of anti-regime students during the dictatorship of the Colonels (1967-74). It explores the cultural as well as ideological protest of Greek student activists, illustrating how these "children of the dictatorship" managed to re-appropriate indigenous folk tradition for their "progressive" purposes and how their transnational exchange molded a particular local protest culture. It examines how the students' social and political practices became a major source of pressure on the Colonels' regime, finding its apogee in the three day Polytechnic uprising of November 1973 which laid the foundations for a total reshaping of Greek political culture in the following decades.

The Book Deals With The Administration And Economic Life Of The People In The Southern Maratha Country Which Was Generally Situated Between The Krishna And Tungabhadra Rivers, Mostly In North Karnataka During The Wlaratha Period. This Region Had An Admixture Of Vijayanagara, Adilshahi, Maratha And Indigenous Systems Of Administration. The Author Has For The First Time Made A Searching Analysis Of The Maratha Rule In This Region, Basing His Conclusions On

A Study Of The Primary Documents Lying Scattered In Various Archives. This Book Explains The Administrative System Obtaining In This Area Under The Marathas, Focuses Our Attention On The Land Revenue System, Highlights The Commercial Activities, And Brings Into Relief The Monetary System In The Southern Maratha Country. A Special Feature Of The Book Is That It Gives Four Important Examples To Illustrate The Administrative And Land Systems Of The Land, Besides Giving Two Appendices To Chapter Ii Which Make The Subject Matter More Explicit. The Importance Of The Book Is Further Enhanced By Two Maps, One On The Southern Maratha Country Itself, And The Other On The Nargund-Ramdurg Principality Showing All The Intricacies Of The Situation Of This Double Principality Which Occupied An Important Place In This Area. The Region Was Honey-Combed With Numerous Jagirs, Desgats, Samsthans And Saranjams Scattered In Different Places And Ruled Or Enjoyed By Princes, Desais, Nadgaudas And Saranjamdars Such As The Patwardhans, The Rastes, The Ghorpades, The Bhaves And The Like. It Is Thus A Highly Intricate Study Of A Strange Complex Of Different Territories Under Different Rulers Or Administrators Called By A Common Name Of Southern Maratha Country. Briefly, It Gives Us A Clear Picture Of The Complicated Power Structure, Complex Administrative System, Intriguing Land System With Its Queer Land Terms And Minute Revenue Figures And Finally The Trading And Financial Activities Of The People In The Southern Maratha Country Under The Marathas.

A brand new and fully updated edition of this seminal work on archival preservation. Access to archival material - the documentary heritage of people all over the world that gives them their identity and ensures their rights - is dependent on the survival of fragile materials: paper, parchment, photographic materials, audiovisual materials and, most recently, magnetic, optical and increasingly digital formats. The primary importance of such survival is widely acknowledged but sometimes overlooked in a rush to provide ever better means of access. But without the basic material, no services can be offered. Preservation is at the heart of archival activity. Archivists in all types of organizations face questions on how to plan a preservation strategy in less than perfect circumstances, or deal with a sudden emergency. This book considers the causes of threats to the basic material, outlines the preservation options available and offers flexible solutions applicable in a variety of situations. It offers a wide range of case studies and examples from international specialists. This revised edition includes additional material on digital preservation and green building as well as a new chapter on the management and training of volunteers, reflecting a key concern for many archival institutions. Key topics are:

- Understanding archival materials and their characteristics
- Managing digital preservation
- Archive buildings and their characteristics
- Safeguarding the building and its contents
- Managing archival storage
- Managing risks and avoiding disaster
- Creating and using surrogates
- Exhibiting archives
- Handling the records
- Managing a pest control programme
- Training and the use of volunteers
- Putting preservation

into practice. Readership: Archivists, librarians, curators and enthusiasts, trained and untrained, in museums, local studies centres and voluntary societies in need of good clear advice.

This authoritative guide to the principles and practice of archives management in private and public sector organizations has been substantially revised. It now provides detailed advice on changes in national and international standards and approaches, in particular ISAD(G) (International Standard Archival Description) and ISASAR(CPF) (International Standard Archive Authority Record). The new edition also includes guidance on the interpretation of the Manual of Archival Description, also published by Gower. Michael Cook takes the reader through the history, definition and function of archives and archival services, international service models, staffing and resource issues. He explains how to set up and run a records management programme, manage the interface with archival management, conduct a records survey, set up retention schedules and organize appraisal, acquisition and disposal in a way which ensures the service meets organizational and individual needs. Chapters covering the arrangement, coding and description of archival material, and the administration of its physical storage, demonstrate how efficient management facilitates the accessibility of archival information. The book concludes with chapters on computing and user issues, such as rights of access, Freedom of Information, security and data protection standards. This key reference on best practice is intended for students and lecturers in archives administration and records management, and for archives and records managers, particularly those newly qualified or seeking professional registration. Managers without formal qualifications but responsible for records or archives management, and information managers working with archivists and records managers, will find it helps to improve working methods and to run a more effective archives service within the modern information management environment.

Hinduism flourished in the districts around Poona in Bombay to a far greater extent than in the rest of India, hence the problems facing the British administrators of Maharashtra were quite different from those confronting them in other parts of India. The solutions they proposed and the policies which emerged determined the social changes which took place in the Maharashtra in the nineteenth century. This book analyses these changes by focussing on the rise of new social groups and the dissemination of new values and shows how these social groups and values interacted with the traditional order in Maharashtra to create a stable regional society. Originally published in 1968.

Cyberspace is everywhere in today's world and has significant implications not only for global economic activity, but also for international politics and transnational social relations. This compilation addresses for the first time the "cyberization" of international relations - the growing dependence of actors in IR on the infrastructure and instruments of the internet, and the penetration of cyberspace into all fields of their activities. The volume approaches this topical issue in a comprehensive and interdisciplinary fashion, bringing together scholars from disciplines such as IR, security studies, ICT studies and philosophy as well as experts from everyday cyber-practice. In the first part, concepts and theories are presented to shed light on the relationship between cyberspace and international relations, discussing implications for the discipline and presenting fresh and innovative theoretical approaches. Contributions in the second part focus on specific empirical fields of activity (security, economy, diplomacy, cultural activity, transnational communication, critical infrastructure, cyber espionage, social media, and more) and address emerging challenges and prospects for international politics and relations.

The Arab Awakening and other nonviolent insurrections have often failed to produce lasting democratic change. A believer in empowerment, Lakey

proposes a stage-by-stage developmental framework to get better, more transformational results. Still incorporating the nonviolent coercive force that has brought down dictators, Lakey uses historical “best practices” from movements to show how people can grow a revolution that roots itself even while it confronts. The five stages begin with consciousness change, lifting an intersectional vision that inspires and provides the basis for a critical mass to join the movement as it pushes through each developmental stage. Lakey shows how to reconcile pre-figurative alternative institutions with confrontive direct action teams, making the most of inherent synergistic potentials. With actual stories from confrontation with violent authorities he describes what works best for unifying and building the movement to the point where it can carry out the mass noncooperation that opens a power vacuum. Earlier democratic organizing structures—growing as the strategy unfolds—can then fill the vacuum. This stage prevents a relapse into the old oppression and defends the new society against counterrevolutionary forces. Although focused on how each society can realize its own revolution, this book acknowledges the context of global power and proposes a vision for transformed world institutions that are on the side of peace and justice. The principles in the book have particular application in the climate crisis humanity now faces, which is why the book describes a living revolution.

Mr. Heimsath presents here an intellectual history of the social reform movement among Hindus in India in the century between Ram Mohun Roy and Gandhi. Treating separately each major province in which reform movements flourished, he shows the many ways in which social reform was effected. Originally published in 1964. The Need For Following The Correct And Standard Research Methodology Is Increasingly Felt When More And More Research Works And Learned Monographs Are Coming Out On History Dealing With Social, Economic, Cultural And Other Varied Aspects Of Life, And Thus The Writing Of A Critical, Unbiased And Authentic History Is The Need Of The Hour. It Has Been Well Said In This Book That The Life Breath Of History Is Interpretation, Which Also Gives A Definite Viewpoint To A Work Of History. It Lays That Objectivity, If Carried To An Extreme, Results In Dry And Lifeless Cataloguing Of Events And Subjectivity, If Carried To An Extreme, Results In A Highly Biased Work Often Divorced From Reality,

And That An Ideal Work Would Be One That Combines Subjectivity With Objectivity In Due Proportion Without Upholding The One At The Cost Of The Other. The Present Book Deals With The Different Processes Involved In Writing A Good And Authentic Historical Work. Right From The Heuristic Or The Search For Reliable And Credible Historical Sources Such As Archaeological, Epigraphical, Numismatic, Literary, And Archival, It Brings Into Relief The Important Features Of Analytical Operations Aimed At Ascertaining The Credibility Of Sources By Way Of External And Internal Criticism, Synthetic Operations Aimed At Finding Out A Connected, Meaningful And, If Possible, Enlightening Account Of Facts And Forces, Interpreting Them Properly, And Finally The Exposition, In A Powerful And Impressive Style, Of The Fruits Of All This Research And Thinking. The Book Further Shows How Interpretation Itself Is Properly Done By Means Of Various Processes Such As Generalisation, The Argument From Statistics, Analogy, Hypothesis And The Like. A Special Feature Of The Work Is That The Examples Of Books, Authors, References, Etc. Are Mostly Indian. It Gives Minute Rules And Regulations Essential While Writing A Good Research Work. It Is A Constant Companion To The History Scholars In Their Research Journey While For The Teachers Of The Subject It Is An Ideal Reference Book.

This book introduces first hand witness and whistleblower testimonies revealing that the USA, Britain, Russia and other major national governments have been secretly conducting, or known about, diplomatic relations with different extraterrestrial civilizations since at least 1952. Galactic diplomacy (aka 'exodiplomacy') with extraterrestrial visitors began with discussions over the development of thermonuclear weapons, the first of which was detonated by the Truman administration in November, 1952. Diplomatic discussions then expanded to include issues such as technology development, alien bases, extraterrestrials living on Earth, human rights, and use of earth resources. In frustration over lack of government transparency with their citizens, some extraterrestrials began contacting private citizens to inform them of the true nature of alien activities on Earth, and relations with governments. The reader will be introduced to the basic principles of international diplomacy and how these apply to different extraterrestrial civilizations visiting Earth. Those desiring to expose secret government activity in diplomatic relations with extraterrestrial life, will be given the necessary information to hold responsible government, military and corporate officials accountable for past policies; and to ensure government transparency in the future. Alternatively, those desiring to become active in citizen diplomacy

initiatives, will be given essential information for discerning the motivations and activities of visiting extraterrestrial civilizations. This is indispensable for practicing a citizen based form of galactic diplomacy. This book prepares readers for the grandest adventure of all - the journey to galactic citizenship!

A fresh look at Iraqi history through the twentieth century until today, this book identifies continuities and breaks in the Iraqi experience. It combines chapters that provide each an expansive bird's-eye view of a key issue spanning a century with chapters that focus on more specific case studies that have been largely overlooked so far but such that are of great significance for Iraq's present and future. Some of the events and developments discussed were enforced from the outside and some grew out of particular and historically changing configurations within Iraqi society, but all are highly relevant to the understanding of contemporary Iraq. Written by leading scholars in the field, the chapters focus on such topics as the changing features of the of Iraqi identity, the rise of Iraqi nationalism alongside competing identities, ethnic and sectarian communalism, the role of women, Iraq's military history, the Iraqi economy, state building after the 2003 invasion, and a comparative discussion of the British and U.S. colonial adventures and the implications of those developments for the future of the country. The volume raises some pertinent questions on the way Iraqi history and present are interpreted and adds knowledge to the existing scholarship.

"The media has recently been abuzz with cases of citizens around the world using digital technologies to push for social and political change: from the use of Twitter to amplify protests in Iran and Moldova to the thousands of American non-profits creating Facebook accounts in the hopes of luring supporters. These stories have been published, discussed, extolled, and derided, but have not yet been viewed holistically as a new field of human endeavor. We call this field "digital activism" and its dynamics, practices, misconceptions, and possible futures are presented together for the first time in this book."--Pub. desc.

The image of a woman bearing arms is a potent symbol of modern Greece's nation-building conflicts. Margaret Poulos traces the influence of this image on Greek feminist discourse from the mid-nineteenth century to the 1970s and 1980s. The study begins with the heroines of the 1821 Revolution and the extent to which Greek protofeminism capitalized on this legacy. Poulos then explores the role of partisan women in the communist-led resistance movement during World War II and Greece's subsequent collapse into Civil War, which saw a striking and controversial increase in the number of women fighting in the ranks of the partisan army. In conclusion, Poulos

examines the way in which postwar feminism engaged, ignored, or reconciled this fraught history. Poulos's unique focus coherently connects a series of historical events otherwise separated by a hundred and fifty years at both extremes. The image of a woman-in-arms has long been a source of fascination for its embodiment of an inherent contradiction—the fragility and passivity of the feminine and the menace and violence of the gun. Poulos probes both the myth and reality of these representations within the context of Greek history, and the specific ways in which their symbolic power has been utilized by feminists, nationalists, and others to advance at times diametrically opposed political agendas. Therefore, while demystifying highly celebrated images, she also illuminates the contributions and experiences of the marginalized, shedding important light on the historical significance of women's agency.

Tourism has long been a neglected sector for the government of India. Earlier, it was considered to be an elitist activity and the socialist dispensation of the official establishment coaxed it to put on the back burner. The advent of globalization and the market forces brought India on the world tourism map. Both the hospitality and the travel industries revamped its utility and there appears to be a phenomenal growth in infrastructure and services for the world travelers. This book also points out the conspicuous absence of the domestic traveler for long. This book raises all possible issues in Indian tourism and suggests ways and means how Indian philosophy of Vasudhev Kutumbkam (World is a family). The salient feature of the book are the travelogues that will expose the Indian reader to a global world-view that provides him the pleasure of travel while sitting at home.
