America ' s Persecuted Minority: Big Business was a lecture delivered by Ayn Rand at the Ford Hall Forum, Boston, on December 17, 1961, and at Columbia University on February 15, 1962. Rand argues that " every ugly, brutal aspect of injustice toward racial or religious minorities is being practiced towards businessmen " under America ' s antitrust laws. Rand catalogues the injustices of antitrust, decries the scapegoating of businessmen, analyzes particular cases, rejects antitrust laws as non-objective and calls for their ultimate repeal.

What is your dream? You can achieve it if you have a strong desire, a plan, and never give up. One of your plans should be to get excellent grades in every exam you take. After all, you need to do well in different types of exams before you can move on to the next level in your academic career. No one will give you a scholarship to college or grad school is you don't get excellent grades.If you are a straight A student: -You get offers of scholarships, which means you could go to college or grad school for free-Employers scramble for you even before you finish your studies-You can choose your dream job or school instead of taking what is available-You are considered hardworking and intelligent-You get ahead a lot faster in lifeIn this book you will learn how to: -Set achievable academic goals and prioritize your activities-Develop the right attitude towards your studies-Manage your time effectively and make use of study groups-Learn and retain any material effectively -Use past questions to your advantage-Approach any exam with easeThis is a familiar story. T wo buddies are seniors in high school, they have similar IQ scores. John uses proper study habits, test taking and academic skills that enable him to pass his exams with A's. James does not use effective study skills or the best methods available and gets mostly B's. They both get into college. John gets a scholarship but James does not. At the end of 4 years, James is in debt tens of thousands of dollars. John is debt free. What made the difference is not their intelligence, but their grades! Can you imagine that? Simple grades saving you years of debt and stress? Therefore, it is critical to use the best test taking skills. It may just prevent you from taking those expensive student loans for college or grad school.My hope is that this book will motivate you to focus, manage your time and use the best study techniques out there to help you excel in every exam or test you take. Minority-targeted scholarships, for which some form of minority status is an eligibility requirement, have become controversial in recent years. This report examines the use and perceived value of minority-targeted scholarships by undergraduate, graduate, and professional schools. It found that minority-targeted scholarships accounted for a small proportion of total scholarships and scholarship dollars in academic year 1991-92. However, race or ethnicity was rarely the sole criterion; most minority-targeted scholarships used additional criteria, such as financial need or academic merit, for awarding funds. Every year almost half a million people start a graduate program of some sort. For many, grad school is the critical step toward a career as a researcher or teacher in higher education. Others might be pursuing a masters or a doctorate for personal fulfillment or to obtain the skills and credentials for a career outside the academy. No matter which group you are in, this book provides brilliant and unflinching advice about how to make a disaster out of graduate school. Kevin D. Haggerty and Aaron Doyle--two veteran directors of graduate programs and recipients of mentoring awards--have seen it all, the good and the bad. Here in this funny and shrewd book they lay out the fifty-seven ways to screw up grad school...so that you can avoid them. Their litanies of foul-ups are organized by theme and cover the grad school experience from beginning to end: from how to select your university and program, to your interactions with your advisor, committee, and fellow students, to balancing your personal and academic lives, through the pitfalls of completing your thesis and hunting for a job or postdoctoral fellowship. Although the authors guarantee that following their 57 step program will result in a spectacular crash and burn, their primary goal is to breathe some life and humor into a concise, accessible, and engaging guide for students and potential students on how to navigate and ultimately succeed in graduate school.
