students and  
qualified therapists. It  
begins by defining  
what is meant by  
assessment,  
outcome, evaluation  
and measurement  
and discussing the  
complexity of therapy  
assessment and  
measurement,  
including the  
challenge of

Methods of data  
collection (e.g.  
observation,  
interview,  
standardised testing)  
and sources (e.g. self-  
report, proxy) for  
collecting information

about clients are then reviewed, and the main purposes of assessment (e.g. descriptive, evaluative, predictive, discriminative) presented. The book then addresses the topics of standardisation, levels of measurement,

# Where To Download School Function

reliability, validity  
and clinical utility.

There is a chapter  
describing and  
applying models for  
categorizing levels of  
function to aid  
assessment and  
measurement. The  
concept of clinical  
reasoning and  
reflective practice is  
then explored.

Application of

principles is supported through detailed case studies and worksheets and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed.
