Technology advances are making tech more . . . human. This changes everything you thought you knew about innovation and strategy. In their groundbreaking book, Human + Machine, Accenture technology leaders Paul R. Daugherty and H. James Wilson showed how leading organizations use the power of human-machine collaboration to transform their processes and their bottom lines. Now, as new AI powered technologies like the metaverse, natural language processing, and digital twins begin to rapidly impact both life and

work, those companies and other pioneers across industries are tipping the balance even more strikingly toward the human side with technology-led strategy that is reshaping the very nature of innovation. In *Radically Human*, Daugherty and Wilson show this profound shift, fast-forwarded by the pandemic, toward more human—and more humane—technology. Artificial intelligence is becoming less artificial and more intelligent. Instead of data-hungry approaches to AI, innovators are pursuing data-efficient approaches that enable

machines to learn as humans do. Instead of replacing workers with machines, they're unleashing human expertise to create human-centered AI. In place of lumbering legacy IT systems, they're building cloud-first IT architectures able to continuously adapt to a world of billions of connected devices. And they're pursuing strategies that will take their place alongside classic, winning business formulas like disruptive innovation. These against-the-grain approaches to the basic building blocks of business—Intelligence, Data, Expertise,

Architecture, and Strategy (IDEAS)—are transforming competition. Industrial giants and startups alike are drawing on this radically human IDEAS framework to create new business models, optimize post-pandemic approaches to work and talent, rebuild trust with their stakeholders, and show the way toward a sustainable future. With compelling insights and fresh examples from a variety of industries, Radically Human will forever change the way you think about, practice, and win with innovation.

A man too dangerous to live. A woman whose survival depends on forgiving him. The Phoenix Institute, Book 2 Philip Drake is immortal by virtue of a psychic power that heals all but the worst injuries. He's needed every bit of it as a black ops agent, a life so violent that the line

And that the expectant mother is a woman from his past who'd consider it her pleasure to spit on his grave. One moment, Delilah Sefton is listening to a seriously hot, seriously deranged man giving her some half-baked explanation as to why she's pregnant with no memory of how she got that way. The next, armed men swarm into her bar, and she and Mr. Sexy-Crazy are on the run. Safety at the Phoenix Institute is only temporary,

but it's long enough to put the pieces together. A madman plans to steal her son in a plot to take over the world. And to stop him, she must learn to trust the baby's father—a man she blames for her greatest loss. Warning: This novel contains fast cars (that are driven), numerous guns (that are shot), a hero who prefers pain over love, and a heroine determined to fight for those she loves.
