The unfathomable rate of Black males in education should result in a national call to action. Across the country Black males represent only 2% of the teaching workforce. By the year 2024, minority students will be the majority, yet our current education workforce does not reflect this growing trend in what has been called "The Browning of America." Why is it acceptable that a student can matriculate from Kindergarten through twelfth grade and not have one Black male as his or her teacher? Why has it been a challenge to recruit and in many instances retain Black males in the classroom? Unopened Books explains what is referenced in the book as the Five Black Male Deterrents in Education. Through the personal narrative of Jermaine D. Gassaway, a native Washingtonian, educator, and school leader; coupled with practical solutions, Unopened Books provides insight to multiply the 2%. It is intended to not only be a provocative conversation starter but an actionable approach to increase the number of Black men in the classroom.

One week after arriving on Scream Street, Luke Watson is even more determined to find the six relics that will let him return home, but he and his friends must first face problems with the vampires' vital blood supply and with raging sewer rats.

Elena

By turns humorous, poignant, and moving, this tale of a girl who comes back to Earth as a dog is a nuanced portrait of death, love, grief, and hope. When my death came it was swift. Swift as a running horse. It wasted no time. Daisy, age twelve, has died in a car accident. She finds herself in the afterworld, which resembles nothing more than a job center. Her soul is being returned to Earth,

but not as a human being—she's returning as a dog. A dog who retains Daisy's thoughts and pluck and is determined to get back to her parents and to get back home. What she doesn't expect is that life as a dog named Ray would come with such worries—and moments of jubilation—as she grows to care for others in a whole new way. Told in a compelling first-person voice, Linda Coggin's incredible novel touches on loyalty and freedom, connection and acceptance, and is sure to stay with readers long after the story is done.

In essence, this story is about how a certain person was searching his bookshelf for something to read and in the end found a book, which turned out to be the source, from which it is possible to obtain absolutely any kind of information about absolutely any person. Meaning, information to the smallest particulars and details about what his or her qualities of personality are, how he or she lives, what he or she really wants to achieve, what he or she hides, and much more. And, it does not matter, if the subject is some person, who lived in the distant past or lives in the present or someone, who will live in the future. Since, as it turned out later on, this literary monument is nothing other than the Catalog of human population. In other words, the encyclopedia of Homo sapiens; in essence, the same as encyclopedias, reference books for specialists, which contain complete information about representatives of a particular subspecies of animals, plants, etc. Although at some point, the course of this story turned banal: "bad guys" from security services, intelligence services, politics decided to not only use this source of knowledge for their dirty deeds, but also to appropriate it solely for their personal use. And, the way they tried to do this is also banal: by physically destroying the author of discovery of the Catalog of human population and all of his colleagues. However, the ending of this story makes it stand out from the category of ordinary spy stories. At least because the main characters of this story managed to survive not due to favorable concatenation of circumstances or someone's help, but thanks to that knowledge, which they discovered in the ancient text, which turned out to be the Catalog of human population. Of course, such an outcome upset and continues to upset not only the Russian special services, but also all those people in whose way developers of the Catalog of human population got. And, in this civilization, there are countless numbers of such people: from psychologists (who become no longer needed by anyone) to organizers of this civilization themselves. Since from the standpoint of the Catalog of human population—technogenic civilization without a human, which they lovingly built for many centuries, is simply trash, to put it mildly, and beneath all criticism. And, they themselves are also trash. However, regular people, who (thanks to the scientific discovery made by Andrey

Davydov) got the source with answers to all of their questions and individual recipes, now no longer need to pay "experts on the human soul" for being shamelessly fooled. Therefore, whoever tries to kill developers of the Catalog of human population in the future must know that it is no longer possible, as they already became part of history of humanity. After all, at the current stage of development, a Homo sapiens has only one possibility to continue to live after death, to live through the ages: in the product that he/she created. And, those, who tried and continue to try to kill them, were nobodies and will remain nobodies, who one day will cease to exist without leaving a trace. As for organizers of this "civilization" — maybe instead of trying to find new recipes to destroy "excess billions" and trying to examine human potential using Neanderthal methods, it would be more reasonable not only to find out the recipe of how to make Homo sapiens a 100% controllable producer and consumer from the source (which, by the way, seems to have been left to humanity by creators of nature and a human on this planet), but also how to build a civilization without quotes? After all, it only seems to them that they are the main deceivers, while in reality they were fooled, and fooled majorly.

Dr. Brooke Spencer always felt different from other girls. Now a successful scientist, she is finally discovering where she belongs: working alongside the brilliant, trailblazing researcher Dr. Charles Samuelson. Dr. Samuelson has recently made a discovery that has eluded philosophers and dreamers for centuries: How to transmute iron into gold. Determined to use the knowledge for good, Dr. Samuelson recruits Brooke to assist him with his new plan, his "Golden Manifesto." But humans are not alone and his discovery has not gone unnoticed. Extraterrestrial visitors seek to control Dr. Samuelson's Breakthrough, and before long, Brooke is all that stands between Earth and total Destruction. Will she be able to hold her ground? Or will the timeless temptation of gold prove too much for even the strongest of spirits? Brooke will soon face a choice that will make her question her background, her career, and the fate of the planet.

Scream Street Book #2 – the quest for the relics continues. What better way to feed the neighborhood vampires than to pipe blood from residents' cuts and nosebleeds straight into kitchen taps? And how better to foil Luke's mission to free his folks than to cut off this vital (if icky) blood supply to Luke's best vampire friend? What's more, the local sewer rats have been accidentally turned into raging vampire rodents. Now Luke and his pals must keep the critters at bay while searching for the second crucial relic – a vial of witch's blood – while avoiding being turned into vampires themselves.

In Scream Street Book #6 Luke is closing in on the final relic – will he survive the most dangerous adventure yet? Luke is just one relic away from opening the doorway back to his own world and taking his parents away from the terrors of Scream Street! But this search threatens to plunge him into the most dangerous adventure yet. With the help of Resus and Cleo, Luke is desperately hunting for the claw of a werewolf—and in the process he learns something most unexpected about Samuel Skipstone, the author who has helped them so much on their quest. This forces the trio into making a difficult decision, made harder by the witch convention taking place on Scream Street. The sixth relic is almost in Luke's grasp, but will it ever be his? Xandra believes Sirens are creatures of myth. At least, she does until they escape from the prison that has held them for centuries and they come seeking revenge. Now, their magic is unstoppable. Even a Witch Fairy's magic isn't strong enough to stop the Sirens from singing their death call. With only six nights to find a solution before all the males she loves are taken from her, Xandra must find a way to stop them.
