The World of Tomorrow

Chicago is a city dedicated to the modern—from the skyscrapers that punctuate its skyline to the spirited style that inflects many of its dwellings and institutions, from the New Bauhaus to Hull-House. Despite this, the city has long been overlooked as a locus for modernism in the arts, its rich tradition of architecture, design, and education disregarded. Still the modern in Chicago continues to thrive, as new generations of artists incorporate its legacy into fresh visions for the future. *Chicago Makes Modern* boldly remaps twentieth-century modernism from our new-century perspective by asking an imperative question: How did the modern mind—deeply reflective, yet simultaneously directed—help to dramatically alter our perspectives on the world and make it new? Returning the city to its rightful position at the heart of a multidimensional movement that changed the face of the twentieth century, *Chicago Makes Modern* applies the missions of a brilliant group of innovators to our own time. From the radical social and artistic perspectives implemented by Jane Addams, John Dewey, and Buckminster Fuller to the avant-garde designs of László Moholy-Nagy and Mies van der Rohe, the prodigious offerings of Chicago's modern minds left an indelible legacy for future generations. Staging the city as a laboratory for some of our most heralded cultural experiments, *Chicago Makes Modern* reimagines the modern as a space of self-realization and social progress—where individual visions triggered profound change. Featuring contributions from an acclaimed roster of contemporary artists, critics, and scholars, this book demonstrates how and why the Windy City continues to drive the modern world.

America's Changing Icons is a discursive examination of the female patriotic icon in the United States. This creative and entertaining work examines her use and decline, particularly in the 20th century, with a particular focus on popular culture icons like Lady Columbia, Rosie the Riveter, and Wonder Woman. These fictional creations, used with advertisements; letters; and literature of the eras work together to craft a multi-layered and dynamic portrait of cultural politics, tides, and perceptions about American women, life, and place.

Stitch 'em up, pile 'em high, and enjoy! These sweet little pillows are irresistibly fun to stitch! Thirty petite bowl fillers are a snap to make with Debbie's easy wool-applique techniques, embroidery stitches, and finishing steps. With a folk-art flair that encourages creativity, you can welcome guests, delight family and friends, and add sweet touches to your decor--simply assemble, arrange, admire, and adore! Or fill them with crushed walnut shells and use them as pincushions instead. Wool-and-cotton cuties in seven heartwarming categories require only scraps of fabric, bits of thread, fiberfill stuffing, and embellishments you may already have on hand.

This is a love song for Sandra Waddell Boylan, my wife of fifty years. She is a quiet woman who has made the world a better place for her family, her friends, for strangers, and for me. This book tells the story of her youth in Canada, her growing up in Ohio, and her marriage and rearing a family in New Orleans and Birmingham. It recounts her history and her interests in hopes that her children, grandkids, and friends who love her will know this woman a little better.

The reason for this book was the recurring gossip and speculation that the Standard Sewhandy machine was the basis of the SINGER 221 Featherweight. After many months of research, I realized that documenting the Sewhandy would take more than 500 pages; I have published before the Featherweight - Sewhandy in two volumes. This book, Volume 1, details before the design (early 1920's) thru production end (late 1938) of the Sewhandy, patents, model identification, Sewhandy ads and brochures, & an OSANN SINGER Sewhandy versus SINGER Featherweight sew-off. The companion book, Volume 2, covers maintenance & repair of all Sewhandy models, mechanical and electrical operation, advice on buying, restoring, shipping, parts, model identification, & a specification comparison of an OSANN SINGER Sewhandy with a SINGER 221 Featherweight. Popular Mechanics

A brilliant tinkerer/inventor and a lawyer/marketing genius partnered to create Singer, a retail colossus that over 120 years grew into a universally recognized brand synonymous with quality and value. Following World War II, four successive CEOs made a series of catastrophic decisions in their efforts to redefine the company as competing in industries other than sewing. Of the four, one was forced out and subsequently murdered, one died of an unexpected heart attack just as he was about to defend the company from a takeover, one succeeded in the takeover, then dismembered the company before going to prison, and one played investors, tax authorities, securities regulators, and banks against each other until he suddenly just vanished. The machinations of these four comprised a quarter-century-long soap opera, with power struggles, hostile takeovers, tax evasion, fraud, and even flight to China just a few steps ahead of the authorities.

Can you really hear from God? Can you really overcome death? You will find the answers in this book.

"The twentieth century loved machines and the speed they made possible. Speeding cars, trains, and planes promised to conquer space and time; their aerodynamic styling and metal skins embodied a new and modern beauty, one that especially enchanted

American designers from the late 1920s through the 1950s. Streamlining became the popular American style for all sorts of objects: from toy scooters to typewriters, from power tools to teakettles." "This book celebrates this beauty as epitomized by the work of Raymond Loewy, Kem Weber, Henry Dreyfuss, Norman Bel Geddes, as well as in works by many lesser-known industrial designers whose products are presented here for the first time. The book also demonstrates the resurgence of interest in streamlining among international vanguard designers from the 1980s to the present." "This volume is illustrated with patent drawings and period photographs showing how these dynamically styled objects were used. The one hundred eighty objects presented here, drawn from the Eric Brill Collection (recently donated to the American Friends of Canada) and supplemented by pieces from the Stewart Collection at the Montreal Museum of Fine Arts, were photographed for this book. A full bibliography, biographies of the designers, and index complete the study."--BOOK JACKET.

In Tails, the animals woof and meow intelligently. That's called anthropomorphism and has an ancient lineage in books - The Uncle Remus stories, for instance, as well as any number of comic strip 'characters' you greet every Sunday in the 'funnies.' Anybody with a dog knows their personal life is constantly scrutinized with accuracy. Just put on those particular shoes and see what happens to Fido's tail! Drop the word 'come' into conversation by accident and see what those ears do! And how you obey when the leash is dropped at your feet! Dogs always had a lot to say. They just needed interpreters who speak people talk. Charles Shultz's Snoopy has known that for years.

A Fractured Life, a true story, reveals Jane's childhood of loneliness, hunger, isolation, shame, and abandonment. When her mother died instantly and unexpectedly, six-year-old Jane was left in the care of her drunken and disinterested father. Without proper guidance, this child put herself in a dangerous situation, narrowly escaping a gang rape. Without supervision, she broke laws, which could have resulted in juvenile

detention. Without love, she yearned for a new mother, only to struggle with a stepmother who was mentally ill. Without fear, she lived on her own through three years of high school, while excelling academically and socially. Jane traveled difficult and hazardous roads through childhood and adolescence in her hometown of Paducah, Kentucky. Though she did not recognize it as a child, God's daily presence protected her and provided her needs, leading her to a beautiful destination in adulthood. Through her memoir, you will learn to examine your daily life, seeing God's presence in every step you take. Your eyes will be opened to powerful blessings occurring in your life--right now, today. Discussion thoughts at the end of the book are excellent resources for book clubs or Bible classes.

House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.
