relevant to language test users such as language program directors, testing centers, and language teachers, as well as teachers-in-training in Graduate Diploma and Master of Arts in Applied Linguistics programs. These issues involve aspects of language testing such as test development, test administration, scoring, and interpretation/use of test results. Chapters in this volume discuss insights about language testing policy, testing world languages, developing program-level language tests and tests of specific language skills, and language assessment literacy. In addition, this book identifies two needs in language testing for further examination: the need for collaboration

Assessment, mainly in the form of tests and examinations, plays a critical role in the schooling of Singaporean students. The results are often used to make irrevocable decisions on the students' future education careers. This book is written with school leaders, teachers, and parents in mind, with the view of helping them to better understand the processes and products of assessment via tests and exams. It is written in simple terms, using minimal technical terms, and introduces school leaders, teachers, and parents to essential concepts and principles of educational measurements which are relevant in the school context in Singapore. While existing books on educational measurement are academically-oriented and meant for formal training courses, this book makes self-study simple by using practical examples couched in layman's language. In addition, this book uses concrete examples and analogies to make the text reader-friendly. Contents:

Singapore under the ruling People's Action Party government has been categorized as a developmental state which has utilized education as an instrument of its economic policies and nation-building agenda. However, contrary to accepted assumptions, the use of education by the state to promote economic growth did not begin with the coming to power of the People's Action Party in 1959. In Singapore, the colonial state had been using education to meet the demands of its colonial economy well before the rise of the post-independence developmental state. Education,

Industrialization and the End of Empire in Singapore examines how the state's use of education as an instrument of economic policy had its origins in the colonial economy and intensified during the process of decolonization. By covering this process the history of vocational and technical education and its relationship with the economy is traced from the colonial era through to decolonization and into the early postcolonial period.

Mathematics and Science education have both grown in fertile directions in different geographic regions. Yet, the mainstream discourse in international handbooks does not lend voice to developments in cognition, curriculum, teacher development, assessment, policy and implementation of mathematics and science in many countries. Paradoxically, in spite of advances in information technology and the “flat earth” syndrome, old

distinctions and biases between different groups of researcher's persist. In addition limited accessibility to conferences and journals also contribute to this problem. The International Sourcebooks in Mathematics and Science Education focus on under-represented regions of the world and provides a platform for researchers to showcase their research and development in areas within mathematics and science education. The First Sourcebook on Asian Research in Mathematics Education: China, Korea, Singapore, Japan, Malaysia and India provides the first synthesized treatment of mathematics education that has both developed and is now prominently emerging in the Asian and South Asian

world. The book is organized in sections coordinated by leaders in mathematics education in these countries and editorial teams for each country affiliated with them. The purpose of unique sourcebook is to both consolidate and survey the established body of research in these countries with findings that have influenced ongoing research agendas and informed practices in Europe, North America (and other countries) in addition to serving as a platform to showcase existing research that has shaped teacher education, curricula and policy in these Asian countries. The book will serve as a standard reference for mathematics education researchers, policy makers, practitioners and students both in and outside Asia, and

Philippines, Singapore, and Thailand. The book describes the type of present-day schooling in these countries and, to some extent, their cooperative efforts to pursue common goals. The text discusses the aims of schooling; the structure and process of schooling; and the cooperative education ventures present in the ASEAN region. The book describes the social conditions and government efforts toward developing education in each of the five countries. The text summarizes the historical background of the country as it relates to education, the quality and supply of teachers, the curriculum, administrative structure of the educational system, and some data on school enrollment. The book also notes the

problems that are present in the educational system of each country, and the existence of non-formal education in some countries. The book then addresses the education trend and future of education. The last chapter then evaluates the performance and achievements of these five countries toward reaching the goals they had set. The book also lists the challenges that these countries face in the future, such as expanding educational needs, improved quality of learning, effective educational structure, administrative efficiency, teacher supply, and better intercountry cooperation. The text can prove informative for historians, educators, school administrators, government policymakers in education,

internal management, provision, enrollment, employment, financing, examinations, evaluation and quality assurance. In addition, this important and timely book discusses the educational system at all levels, from primary and secondary schools to colleges and universities, and each chapter ends with a discussion of the status quo, problems facing China and coping strategies for further reform. The past 68 years (1949-2016) have seen a sea change in social, economic, cultural, political and educational fields. Systematically describing the educational landscape in China, the book also reveals how the

context. It illustrates and discusses the essentials of educational statistics that will help educational practitioners to do this part of their job properly, i.e., without making conceptual mistakes. The examples are cast in the school/classroom contexts, based on realistic rather than theoretical examples. “The strongest aspect of the work or author’s view is that the author can put himself in the shoes of teachers and make the work a very practical guide for teachers and school leaders. As a very experienced educator and researcher, the author knows very well about the knowledge skills that are essential for the

professional development of teachers. He is able to explain the statistical and measurement concepts in plain language and with examples that are highly relevant to the target audience. In addition, the author also conveyed an important message to the target audience throughout the work... by pointing out the mistakes and misunderstandings of the interpretation of test scores and measurement design. The author reminds the audience about the importance of proper use of tests and test scores when teachers and school leaders make any education decisions, which has much implication on

Mathematics Education

English in Singapore provides an up-to-date, detailed and comprehensive investigation into the various issues surrounding the sociolinguistics of English in Singapore.

Rather than attempting to cover the usual topics in an overview of a variety of English in a particular country, the essays in this volume are important for identifying some of the most significant issues pertaining to the state and status of English in Singapore in modern times, and for doing so in a treatment that involves a critical evaluation of work in the field and new and thought-provoking angles for reviewing such issues in the context of Singapore in the twenty-first century.

The contributions address the historical trajectory of English

Download File PDF Secondary Exam Papers Singapore

(past, present and possible future), its position in relation to language policy and multiculturalism, the relationship between the standard and colloquial varieties, and how English can and should be taught. This book is thus essential reading for scholars and students concerned with how the dynamics of the English language are played out and managed in a modern society such as Singapore. It will also interest readers who have a more general interest in Asian studies, the sociology of language, and World Englishes.

Labouring to Learn examines academic mobility pathways among ethnic minority Tamil youths in public secondary schools and vocational institutions in Singapore. This book qualitatively examines the interactive effects of race and class

on the educational performance of these youths through the lens of social capital. Despite their numerical majoritarian position within the Indian population in Singapore, the foreclosed access for Tamils to diverse class networks within the ethnic community as well as limited inter-ethnic interactions has historically truncated the means to resources and opportunities for social mobility. In schools, the narratives shared by Tamil boys and girls from the lower academic streams and economically disadvantaged backgrounds reveal that they typically experience exclusion on account of racial, economic and academic marginalisation in their everyday lives. Turning to bonding ties among peers and family members provides social support resources that offer some

respite from marginalisation. On the flipside, articulations of resistance ensue among Tamil youths that tangibly take time away from learning, and run the danger of strengthening the cultural deficit rhetoric for mainstream society to explain the poor academic performance among ethnic minorities. This account of educational marginalisation amongst Singaporean Tamil youths contributes towards understanding social inequality in a non-liberal multicultural context where marginalisation is differentially experienced across ethnic minority groups and traced to broader socio-historical contexts of migration, assimilation and minority – majority relations. Furthermore, it also articulates the utility of a social capital framework in historically revealing how educational inequality
