Mayan daykeeper Hunbatz Men reveals the multi-calendar system of the Maya that guided the lives of his ancestors and how it can guide us today • The first book to reveal the secrets of the Mayan Pleiades calendar: the Tzek'eb • Explains how the Maya used their astronomical knowledge to guide their lives on Earth The Mayan Calendar has taken on special prominence with the imminent arrival of 2012, a date that many claim is the end of that calendar. However, as Mayan elder and daykeeper Hunbatz Men shows, the cosmological understanding of his ancestors was so sophisticated that they had not one, but many calendars, each based on the cycles of different systems in the cosmos. In this book he reveals for the first time the Tzek'eb, or Pleiades, Calendar of 26,000 years, which charts the revolution of our solar system around Alcyone, the central star of the Pleiades system. He also discusses the K'uuk'ulcan Calendar of the 4 seasons of the solar year and the wheel of the K'altunes Calendar, which is composed of 13 cycles of 20 years each that form a calendar of 260 years. In traditional Mayan culture the computation of time was not determined by simple economic or social motives. The calendars served the higher purpose of synchronizing the lives of human beings and their societies to the great cosmic

pulsation, to the rhythm of the annual seasons, and to the other cycles that dictate changes upon Earth. Mayan understanding of the cosmic cycles was so exact that this knowledge could be used to influence all stages of life--from planning when to conceive (parents could choose not only the sex of their child but its vocation and future destiny) to plotting out the course of the entire society. Pyramids played a crucial role in applying this wisdom because, as Hunbatz Men shows, they were able to produce and transform energy in accordance with the cosmic cycles charted by the calendars. This book reveals for the first time the wisdom of the multi-calendar Mayan system and how it can help guide our modern world.

A personal exploration of the conjunction between ancient Mesoamerican prophesy and New Age higher consciousness. • Selected by the Independent Publisher's Book Awards as one of the top two New Age books of the year. • Explores ancient prophecies and their relevance in the contemporary world. The Incan and Mayan cultures saw themselves as "children of light"--descended from celestial realms--and their prophecies foretell a time of great spiritual awakening. They prophesied a time when the gateways to higher consciousness would open once again. That time is now. Award-winning author Judith Bluestone Polich draws on her extensive research in quantum physics, archeoastronomy, holography, cosmology, and pioneering studies

of human consciousness to show how science and contemporary thought are consistent with this ancient knowledge. As the ancients predicted, the human god-seed is beginning to awaken, and modern civilization is finally beginning to perceive human potential in ways that the ancient cultures accepted as truth. Polich introduces techniques for awakening our own human potential through dreaming, meditations, and the power of sacred sites. This book is a combination of discoveries made during fifteen years of leading women's workshops, patterns observed while offering hundreds of individual healing sessions and an exploration of native prophecies. *The Woman Who Dreams Herself* is a guide for understanding and awakening the feminine to restore balance on an individual, societal and planetary level.

An engaging study that reveals sacred teachings that the Mayan priesthood hid from Spanish conquistadores in Mexico in 1519. The author explores the scientific and spiritual principles underlying the ancient glyphs, numbers, and language of the Maya.

Reveals the common origins of the ancient Egyptian and Mayan civilizations. - Shows how these cultures had the ability to gaze into the heavens to predict the future unfolding of humanity and their place within the cosmic order. - The author's revelations about the Freemasons' connection to this ancient knowledge generated a firestorm of controversy in Europe. - By the author of the bestseller "The Mayan Prophecies." Maurice Cotterell's background as a scientist, mathematician, and engineer helped him to decipher the code of the ancient Maya, revealing the mystery of their science and religion to an extent never before possible. Using the same techniques, the author turns his attention here to deciphering the secrets encoded within the tomb of Tutankhamun. His extensive research revealed that both the ancient Egyptians and the Maya possessed a sophisticated understanding of sun spot activity and other astronomical phenomena--facts recently confirmed by modern science. Knowledge of the connections between solar patterns and human destiny allowed the Egyptians and Maya to harness the energy generated by the sun to achieve spiritual enlightenment and soul growth. The link between reincarnation and solar energy encoded in the tombs of Tutankhamun and the Mayan Lord Pacal is a jealously guarded secret held by a select number of occult groups, including the higher orders of Freemasonry. The author unleashed a firestorm of controversy in Europe when he exposed much of the esoteric knowledge of the Freemasons, including one of the society's most carefully concealed secrets: incarnate gods like Lord Pacal and Tutankhamun

have come to earth to help humans achieve spiritual enlightenment, soul growth, and individual realization as solar beings.

THE MAYA BOOK OF LIFE: UNDERSTANDING THE XULTUN TAROT is the companion book to the Xultun Tarot Classic Edition. It explores the archetypes and alchemy of the major arcana of the Xultun Tarot through indigenous teachings and the analytical psychology of C G Jung and casts new light on the meaning of 2012. The Xultun Tarot was created by Peter Balin in 1976 based on images from Maya history and culture. Taken from a single painting, it is the only tarot deck where the major arcana form a complete picture. This picture is a symbolic image of the alchemical marriage of spirit and matter and a map of what Jung called the individuation process. Only 500 copies of the original Xultun Tarot were ever printed. Now Kahurangi Press (xultun.com) has recreated this classic, long out-of-print deck true to its original large size and vibrant colours together with a book that explains the profound symbolism of the cards. Michael Owen is a clinical psychologist in private practice and author of *Jung and the Native American Moon Cycles*. He lives in New Zealand. A cataclysmic change to our way of life is looming as the winter solstice of 2012 heralds the end of the 5,000-year Mayan "Fourth Age". With its conclusion, will we see the end of the world as we know it, or the dawning of a new golden age?

Offers a close-up look at the Mayan calendar and its prophecy about the end of the world on December 21, 2012,

addressing Mayan predictions concerning global warming and climate change, the implications of Mayan teachings regarding the future of humankind, and more. Original.

Understanding the Xultun Tarot

Bestselling author of The Tutankhamun Prophecies decodes the spiritual mysteries hidden within the recently discovered Mochian pyramids in Sipan • Reveals that ancient Inca sun-kings possessed the same solar science as Lord Pacal of Mexico and Tutankhamun of Egypt • Solves the mystery of the ancient Inca legend concerning a white god who traveled through ancient Peru, healing the sick and restoring sight to the blind Inca mythology tells of a tall, white leader who wandered along the coast performing miracles, a man they called Viracocha Pachamac, which means "God of the World."

Centuries later another great miracle worker, similar to the first, appeared and wandered the countryside, healing the sick and restoring sight to the blind. He, too, was named Viracocha. These accounts have long baffled scholars, as have the carvings left by the people of Tiahuanaco who preserved these

legends. Now Maurice Cotterell, who cracked the codes hidden in both ancient Maya carvings and the treasures of Tutankhamun, unlocks the secrets concealed within the treasure-filled tombs of Viracocha Pachamac and Viracocha. His investigation of these tombs, held within the long-lost pyramids of Peru, proves that these two figures were not myth but actually existed 1,500 years ago. The two Viracocha sun-kings had much in common with Lord Pacal of Mexico and Tutankhamun of Egypt and, like them, left the secrets of a super solar science encoded in their treasures. This science reveals the intimate connection between the cycles of life and birth on Earth and solar activity such as sunspots. More important, it holds the key to reincarnation and human spiritual realization, with answers to the spiritual mysteries of life and death. Explores the central role played by the galaxy in both ancient and modern times in the transformation of the human spirit. • Extends Jenkins' groundbreaking research in Maya Cosmogenesis 2012. • Reveals how the coming Galactic Alignment of era-2012 promises a renewal of human consciousness. • Uncovers the galactic vision of Mayan, Egyptian, Greek, and Vedic cosmologies. The Galactic Alignment is a rare astronomical event that brings the solstice sun into alignment with the center of the Milky Way galaxy every 12,960 years. Building on the discoveries of his book Maya Cosmogenesis 2012, Jenkins demonstrates that the end-date of 2012 does not signal the end of time but

rather the beginning of a new stage in the development of human consciousness. He recovers a striking common thread that connects the ancient cosmological insights of the Maya not only to Egyptian thought and Vedic philosophy but also to the diversity of humankind's metaphysical traditions ranging from Celtic sacred topography and Medieval alchemy to the Kabbalah and Islamic astrology. His work presents us with a groundbreaking synthesis of lost wisdom once common to ancient cosmologies that will help us understand the significance of this transformative cosmic milestone. Discover What the Prophecy of 2012 Means for Your Life According to the Mayan Elders, at the moment of birth every human being is given a destiny. Our life challenge is to develop ourselves and our skills in order to fulfill this destiny, thus fueling our individual contribution to the planet. At the heart of The Book of Destiny is the sacred Mayan calendar, an extraordinary tool that allows the reader to discover this destiny, along with one's special Mayan symbol, origin, as well as the protection spirits that accompany them through life. Poetically narrated, the book describes how the calendar contains the scientific legacy of the Mayan people, preserved and transmitted over the centuries through oral tradition and written texts. Written at the request of the Mayan Elders, by member of the Guatemalan Elders Council and Mayan Priest Carlos Barrios, The Book of Destiny is a tool to help people understand their life purpose and to use this profound knowledge to make the best of their time on earth.

Compiled from more than four hundred hours of channeling by Barbara Marciniak, *Bringers of the Dawn* imparts to us the wisdom of the Pleiadians, a group of enlightened beings who have come to Earth to help us discover how to reach a new stage of evolution. Master storytellers and humorists, they advise us to become media free, to work in teams, and to eliminate the words "should" and "try" from our vocabularies. We learn how to go beyond fear, how the original human was a magnificent being with twelve strands of DNA and twelve chakra centers, and who our "gods" are. Startling, intense, intelligent, and controversial, these teachings offer essential reading for anyone questioning their existence on this planet and the direction of our collective conscious--and unconscious. By remembering that we are Family of Light, that we share an ancient ancestry with the universe around us, we become "bringers of the dawn," consciously creating a new reality, a new Earth.

Sojourns of the Soul differs from other inspirational travel books by providing a rare mix of in-depth wisdom and literary insights from the holistic view of one experienced female traveler. Dana Micucci gives a compelling account of her growing spiritual illumination through visits to some of the most sacred places on earth. Her lively, engaging narrative takes us to seven sites in all: the Australian outback, Angkor in Cambodia, the Valley of the Kings in Egypt, Lhasa in Tibet, Chichen Itza in the Yucatan; the Monastery of Christ in the Desert in New Mexico, and Machu Picchu in Peru. Micucci links each visit with the awakening of a particular chakra- the

chakras being the seven energy centers of the body associated in Hinduism with progressive enlightenment. In the afterword, she reflects on how her experiences continue to shape her life after resuming her career as a journalist in New York City: she finds she is more tolerant, can engage in daily activities with more heart-centered awareness, and can sustain states of joy and gratitude for longer periods of time. The book will be a page turner for readers who yearn for long-delayed adventure, with the added benefit that it is not just a journey log but more of a seeker's manual; travel is simply the vehicle. Readers will find that they don't have to travel to far-flung places for the spiritual inspiration available in their everyday lives. As Micucci says, "Each day brings new remembrances of our divinity, of the Divine presence in all beings, and of our eternal connection to each other. I am so grateful to be here NOW . . . with you.

A growing interest in all things Maya brings an increasing number of visitors to prehistoric Maya ruins and contemporary Maya communities in Guatemala, Belize, El Salvador, western Honduras, the Yucatán Peninsula, and the southern areas of Chiapas and Tabasco, Mexico. For these visitors and indeed everyone with an interest in the Maya, this field guide highlights nearly 100 species of plants and animals that were significant to the ancient Maya and that continue to inhabit the Maya region today. Drawing from the disciplines of biology, ecology, and anthropology, Victoria Schlesinger describes each plant or animal's habitat and natural history, identifying characteristics (also shown in a black-

and-white drawing), and cultural significance to the ancient and contemporary Maya. An introductory section explains how to use the book and offers a concise overview of the history, lifeways, and cosmology of the ancient Maya. The concluding section describes the collapse of ancient Maya society and briefly traces the history of the Maya region from colonial times to the present.

Ancient Maya comes to life in this new holistic and theoretical study.

This unique encyclopedia explores the historical and contemporary controversies between science and religion. It is designed to offer multicultural and multi-religious views, and provide wide-ranging perspectives. "Science, Religion, and Society" covers all aspects of the religion and science dichotomy, from humanities to social sciences to natural sciences, and includes articles by theologians, religion scholars, physicians, scientists, historians, and psychologists, among others. The first section, General Overviews, contains essays that provide a road map for exploring the major

challenges and questions in science and religion. Following this, the Historical Perspectives section grounds these major questions in the past, and demonstrates how they have developed into the six broad areas of contemporary research and discussion that follow. These sections - Creation, the Cosmos, and Origins of the Universe; Ecology, Evolution, and the Natural World; Consciousness, Mind, and the Brain; Healers and Healing; Dying and Death; and Genetics and Religion - organize the questions and research that are the foundation of the enormous interest, and controversy, in science and religion today.

In this visionary memoir, author Michael Drake recounts his spiritual journey into shamanism. Drake's engaging narrative moves from his first ecstatic experience as a youth at a church revival to his mystical shamanic awakening, transformational pilgrimages to sacred places, working with indigenous wisdom keepers, to the experiences that prompted his writing, particularly his trance experiences "riding the drum" or Spirit Horse. The pioneering archaeo-engineer uncovers the advanced technologies of the Maya—from ancient highways to the concept of zero. The mysteries of the Maya have been a source of fascination since the ancient civilization was

discovered in the 19th century. Far more advanced than any civilization in Europe, Maya developed an elegant mathematic system, an incredibly accurate astronomy, and one of the world's first written languages. The lost principles of Maya technology allowed ancient engineers to construct grand cities that towered above the rainforest, water systems with underground reservoirs, miles of all-weather paved roads tracking through the jungle, and the longest bridge in the ancient world. Pioneering archeologist and engineer James O'Kon combined research, field exploration, forensic engineering, and 3-D virtual reconstruction to discover the secrets of Maya technology. Here, O'Kon recounts how Maya engineers developed structural mechanics for multi-story buildings that were not exceeded in height until the first "skyscraper" built in Chicago in 1885; invented the blast furnace 2,000 years before it was patented in England; and developed the vulcanization of rubber more than 2,600 years before Charles Goodyear. Exploring Ancient Skies brings together

the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope. The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean, the Far East, and the New World (particularly Mesoamerica), putting the ancient astronomical materials into their archaeological and cultural contexts. The authors begin with an overview of the field and proceed to essential aspects of naked-eye astronomy, followed by an examination of specific cultures. The book concludes by taking into account the purposes of ancient astronomy: astrology, navigation, calendar regulation, and (not least) the understanding of our place and role in the universe. Skies are recreated to display critical events as they would have appeared to ancient observers--events such as the supernova of 1054 A.D., the "lion horoscope," and the Star of Bethlehem. Exploring Ancient Skies provides a comprehensive overview of the relationships between

astronomy and other areas of human investigation. It will be useful as a reference for scholars and as a text for students in both astronomy and archaeology, and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history.

as parables and legends, as well as calendars and mathematics, a new doorway opens. Beginning with the lost worlds of Lemuria and Atlantis we find ourselves caught up in the story of an empire that has left its impact. An adventure awaits, true, but this glimpse of a future more creative and hopeful takes us to the wonders of a world unknown. From a false belief of envisioning our native forefathers and mothers as primitive natives we gain an awesome recognition of the wonders of encoded hieroglyphs; we move into respect and understanding through parables, legends, and oral teachings. A major aspect of the author's perspective is to integrate the contribution of the Maya with other wisdom traditions. Many of the lingering myths of "questionable" ideas are clearly included in the mythology of these people. Terms avoided in the rational and intellectual community rest in the psyche of all America and as we stir these ideas come alive. The goal of evolution is presented clearly in the unfolding of these long secreted concepts, such as "sky-people", "hollow earth theory", and others.. From "spirit/space" to "science/religion" we get an amazing understanding of what is in store for humanity at the close of the Ninth Hell; Has Humanity achieved its goal or has it

20 day-signs of the Mayan calendar • Explains the many cycles of Mayan astrology, such as the 9-day cycle of the Night Lords and the 13-day trecena • Contains extensive tables of Mayan astrological data, allowing readers to cast their own Mayan horoscopes

How to Practice Mayan Astrology presents a contemporary guide to one of the most sophisticated astrological systems ever developed. Like other ancient peoples, the Maya looked to the cycles of the planets as markers of time and designators of order. The predictable cycles they observed became codified in the Mayan calendar and astrological system as a way of organizing the seeming chaos of human life. Mayan astrology is based on 20 named days that are cycled 13 times to create a 260-day calendar, the Tzolkin. The authors explain the symbolism, logic, and meaning of the 20 day-signs; how these signs reflect 260 possible personality types; and how they can be used for divination. They also explain the important role of the Four Directions and the planet Venus in one's personality matrix and life

issues. Included are extensive, easy-to-use tables of Mayan astrological data, allowing readers to determine their day-signs, to see how these signs are also influenced by the cycle of the Night Lords and the 13-day trecena, and to cast their own horoscopes.
