His work is endorsed by Chicago Tribune career columnist Lindsey Novak, as well as top executives from the Fortune 500, including Motorola, Coca-Cola and other firms. You may email your resume direct to the author for a free review, to the email provided on the back cover.

In this provocative and illuminating account, Richard McGregor offers a captivating portrait of China's Communist Party, its grip on power and control over China, and its future. China's political and economic growth in the past three decades has been one of astonishing, epochal dimensions. The most remarkable part of this transformation, however, has been left largely untold—the central role of the Chinese Communist Party. In *The Party*, Richard McGregor delves deeply into China's inner sanctum for the first time, showing how the Communist Party controls the government, courts, media, and military and keeps all corruption accusations against its members in-house. The Party's decisions have a global impact, yet the CCP remains a deeply secretive body, hostile to the law and unaccountable to anyone or anything other than its own internal tribunals. It is the world's only geopolitical rival of the United States, and is primed to think the worst of the West.

What People Have Said About Human Competence "Human Competence" stands not only as a tribute to Tom's genius, but also as the best single source of ideas about performance technology. It is a 'must have' for anyone serious about changing the performance of individuals or organizations." --Dick Lincoln, Centers for Disease Control "Human Competence" is the crowning achievement of a most remarkable man. But more than that, it is the performance technologist's foundation. Read it with zest, but read it with the intent of learning as much as you possibly can." --Odin Westgaard, Hale Associates "Tom's work has given me the framework to help others in a powerful way--it is a big part of my message of respecting and valuing people at work." --Elizabeth Guman, Performance Insights "Human Competence" is a must read for anyone wishing to become a true performance improvement professional." --Peter Dean, University of Tennessee at Knoxville "Among the ideas bulging from this classic work: performance exemplars, potential for improving performance, behavior-accomplishment distinction, performance matrix, ACORN troubleshooting test, performance audits, states, Worth = Value - Cost, knowledge maps, mediators, and job aids. The great accomplishments he left behind will continue to profit behavior analysis and performance improvement for a long, long time." --Ogden Lindsley, Behavior Research Company "Human Competence" is probably the most borrowed and least returned book in my library. It's good to have it in print once more, so that I can keep replacing it, and rereading it for new insights from the original master of HPT." --Rob Foshay, TRO Learning, Inc.

A "THINK DIFFERENT" APPROACH TO INNOVATION-- Based on the Seven Guiding Principles of Apple CEO Steve Jobs In his acclaimed bestseller *The Presentation Secrets of Steve Jobs* author Carmine Gallo laid out a simple step-by-step program of powerful tools and proven techniques inspired by Steve Jobs's legendary presentations. Now, he shares the Apple CEO's most famous, most original, and most effective strategies for sparking true creativity--and real innovation--in any workplace. *THE INNOVATION SECRETS OF STEVE JOBS* Learn how to RETHINK your business, REINVENT your products, and REVITALIZE your vision of success--the Steve Jobs way. When it comes to innovation, Apple CEO Steve Jobs is legendary. His company slogan "Think Different" is more than a marketing tool. It's a way of life--a powerful, positive, game-changing approach to innovation that anyone can apply to any field of endeavor. These are the Seven Principles of Innovation, inspired by the master himself: Do What You Love. Think differently about your career. Put a Dent in the Universe. Think differently about your vision. Kick Start Your Brain. Think differently about how you think. Sell Dreams, Not Products. Think differently about your customers. Say No to 1,000 Things. Think differently about design. Create Insanely Great Experiences. Think differently about your brand experience. Master the Message. Think differently about your story. By following Steve Jobs's visionary example, you'll discover exciting new ways to unlock your creative potential and to foster an environment that encourages innovation and allows it to flourish. You'll learn how to match--and beat--the most powerful competitors, develop the most revolutionary products, attract the most loyal customers, and thrive in the most challenging times. Bestselling business journalist Carmine Gallo has interviewed hundreds of successful professionals--from CEOs, managers, and entrepreneurs to teachers, consultants, and stay-at-home moms--to get to the core of Steve Jobs's innovative philosophies. These are the simple, meaningful, and attainable principles that drive us all to "Think Different." These are *The Innovation Secrets of Steve Jobs*. An enhanced ebook is now available with 10 demonstration videos of Jobs' sure-fire innovation secrets. Select the Kindle Edition with Audio/Video from the available formats.

Customer Relationship Management (CRM) product vendor professional services know some secrets. So do their integrators. Perhaps they are not so much clandestine as they are rarely recognized as truths that should be considered as manageable risks by the firms that plan to implement CRM as enterprise wide solutions. This book uses Customer Relationship Management (CRM) technologies as the vehicle to provide a structured approach to managing enterprise wide solutions. However, the concepts and constructs explained are just as applicable to the management of other complex information technology solutions, such as Enterprise Resource Planning (ERP). For those who are advanced in the art and science of managing I/T projects, CRM or not, enterprise wide not withstanding, and independent of the technology or critical impact upon the enterprise, this book is likely to provide perspectives that have yet to be encountered or considered. With ultimate success riding on the ability to relate many management and technical disciplines within one complex program, management would be well advised to think twice about absolute reliance upon a trusted advisor who has personally managed one or more entire CRM projects, though an advisor will obviously be a key cog in the machinery that must be put in place. So will those that possess extended formal education and years of experience tainted with professional certifications and the school of Hard Knocks. Concentrate on the well-intentioned content provided here to supplement talented resources. The combination will make CRM endeavors as successful as will be technically and managerially feasible. Customer Relationship Management (CRM) product vendor professional services know some secrets. So do their integrators. Perhaps they are not so much clandestine as they are rarely recognized as truths that should be considered as manageable risks by the firms that plan to implement CRM as enterprise wide solutions. Concentrate on the well-intentioned content provided here to supplement talented resources. The combination will make CRM endeavors as successful as will be technically and managerially feasible.

The job market continues to change. Highly skilled and specialized workers are in demand. Traditional education cannot meet all the needs to create specialty skill workers. Certification provides up-to-date training and development while promoting individual or professional skills and knowledge in a focused manner. Certification as a way of continuing professional education can also be more cost effective.

"How do rebels give up arms and return to the same political processes that they had once sought to overthrow? The question of weaning rebels away from extremist groups is highly significant in the context of counterinsurgency as well as pacification of insurgencies. Existing explanations focus mostly on state capacity, counterinsurgency operations, or on socioeconomic development. This book, drawing primarily on several rounds of interviews with Maoist rebels as well as other stakeholders in conflict zones, shows that from the rebel's perspective, what is of paramount importance in whether or not they quit extremism is the ease with which they can exit and lay down their arms without getting killed in the process. This fear is further exacerbated by the belief that while they could lose their lives, the Indian state, they believed, would lose nothing even if it failed to protect retired rebels and keep its side of the bargain. This created a problem of credible commitment, which, in the absence of institutional mechanisms, is addressed locally by informal exit networks that grow out of grassroots civic associations in the gray zones of democracy-insurgency interface. The book shows that a lot of Maoist rebels quit in the South of India because robust and harmonic exit networks in the South resolve the problem of credible commitment locally and create conditions for safety and reintegration of former Maoists. In the North, on the other hand, very few rebels quit the same insurgent organization during the same time because scrawny, discordant exit networks in the North exacerbate rebels' fear, discouraging retirement and impeding reintegration. This book also highlights how the various steps in the process of disengagement from extremism are linked more fundamentally to the nature of societal linkages between insurgencies and society, thereby bringing civil society into the study of insurgency in a theoretically coherent way"--

Illuminates the contradictions that emerge within conscious capitalism initiatives that are designed to empower women. Winner of the 2018 Gloria E. Anzaldúa Book Prize presented by the National Women's Studies Association Winner of the 2018 Global Development Studies Book Award presented by the Global Development Studies Section of the International Studies Association Everyday Sustainability takes readers to ground zero of market-based sustainability initiatives—Darjeeling, India—where Fair Trade ostensibly promises gender justice to minority Nepali women engaged in organic tea production. These women tea farmers and plantation workers have distinct entrepreneurial strategies and everyday practices of social justice that at times dovetail with and at other times rub against the tenets of the emerging global morality market. The author questions why women beneficiaries of transnational justice-making projects remain skeptical about the potential for economic and social empowerment through Fair Trade while simultaneously seeking to use the movement to give voice to their situated demands for mobility, economic advancement, and community level social justice. Debarati Sen is Assistant Professor of Anthropology and International Conflict Management at Kennesaw State University.

Human Competence

Farewell to Arms

Introduction to Materials Management

The Party

Are ideologies a pair of binoculars that enable us to see far? Or are they a pair of blinkers that keep us from seeing even that which is at hand? How is it that communists; equipped as they are with the one great Theory that explains everything; fumble ever so often in seeing the obvious? How did the Theory lead them to declare the Second World War as an 'Imperialist War' one day; and a 'People's War' the next? How did it lead them to undertake to sabotage the Quit India Movement for the British? How did it lead them to trumpet the demand for Pakistan 'better than the Muslim League'? To declare in 1947 that India had not really become independent? To insist that Pandit Nehru was just "a running dog of imperialism"? To launch an insurrection in 1949 on the premise that India was ripe for an armed revolution? To fumble so much in their response to the end of the communist bloc? Arun Shourie; one of the most respected commentators on current affairs in India today; illustrates the malady by reconstructing what the communists did during the Quit India Movement. In the process he uncovers the secret negotiations they conducted and the secret understanding they struck with the British; the reports they submitted to the imperial rulers about the work they were doing to subvert the movement Mahatma Gandhi had launched. He concludes with a review of the reactions of Indian communists to the break-up of the Soviet empire; showing how their mental make-up and habits have not changed in the six decades since independence.

What are the forces that have been zealously trying to portray the 19 years of anarchic rule; supported by dacoits; criminals; and murderers; as the regime of the 'Messiah of the poor'? Isn't it highly strange and surprising that none from the journalist community has even dared to write against Manik Sarkar; who has given patronage to political mafias and corrupt politicians in the state of Tripura? Why a person who have been enjoying a lavish lifestyle with the money of the poor is portrayed as someone as simple as Mahatma Gandhi? All these questions have been disturbing my mind. The purpose of this book is to seek the answers of these very questions. The real motto of this book is to expose; at the national level; the intellectual and ideological hollowness of the communist parties; to unravel the anti-national activities of the communists; to unveil the real face of so-called 'Mr. Clean' Manik Sarkar; and to highlight the crimes and misdeeds of the communists of Tripura in the last decades.

Shortlisted for the Man Booker Prize, this "dazzling" (Entertainment Weekly) saga of epic scope is both a family and a political drama. The aging patriarch and matriarch of the Ghosh family preside over their large household, made up of their five adult children and their respective children, unaware that beneath the barely ruffled surface of their lives the sands are shifting. Each set of family members occupies a floor of the home, in accordance to their standing within the family. Poisonous rivalries between sisters-in-law, destructive secrets, and the implosion of the family business threaten to unravel bonds of kinship as social unrest brews in greater Indian society. This is a moment of turbulence, of inevitable and unstoppable change: the chasm between the generations, and between those who have and those who have not, has never been wider. The eldest grandchild, Supratik, compelled by his idealism, becomes dangerously involved in extremist political activism—an action that further catalyzes the decay of the Ghosh home. Ambitious, rich, and compassionate, *The Lives of Others* anatomizes the soul of a nation as it unfolds a family history, at the same time as it questions the nature of political action and the limits of empathy. It is a novel of unflinching power and emotional force.

This is the perfect companion for exploring the hidden, tranquil corners that form the rural heart of France.

2021 Hardcover Reprint of 1932 Edition. Full facsimile of the original edition, not reproduced with Optical Recognition Software. "State and Revolution" (1917) describes the role of the State in society, the necessity of proletarian revolution, and the theoretic inadequacies of social democracy in achieving revolution. It describes the inherent nature of the State as a tool for class oppression, a creation born of one social class's desire to control all other social classes. Whether a dictatorship or a democracy, the State remains in the control of the ruling class. Even in a democratic capitalist republic, the ruling class will never willingly relinquish political power, maintaining it via various strategies.

Hence, according to this view, communist revolution is the sole remedy for the abolition of the state.

This introductory textbook describes the basics of supply chain management, manufacturing planning and control systems, purchasing, and physical distribution. The fourth edition makes additions in kanban, supply chain concepts, system selection, theory of constraints and drum-buffer-rope, and need f

Perestroika, Glasnost and Socialism is a collection of twenty articles written during the past quarter century. The book derives its socialist inspiration from the celebrated essay of Albert Einstein ' s " Why Socialism? Reaction Strikes Europe. " The opening article written on the eve of disintegration of socialist camp gives a graphic picture on how the intellectual classes could engineer a counterrevolution with the help of USA and other developed countries. Liberation of a hundred nationalities from Czarist oppression and creation of a multinational state based on the principle of peaceful coexistence of diverse cultures was the most significant historical contribution by Soviet revolution. India, as a multinational country, has many things to learn from the Soviet experiment as well as the experience of CIS and the erstwhile CMEA countries. Articles on the development experience of India, reproduced in this collection, highlight the unfinished tasks of national liberation in a multinational country, ruled for long by anti-people coalitions of elite classes under the influence of imperialism and global monopoly capital. Experience of the post-Soviet era teaches that completion of national liberation is an essential precondition for the re-envisioning of socialism. Your definitive reference for manufacturing planning and control professionals—updated for the 2-part version of the CPIM exam Written by a team of recognized experts, Manufacturing Planning and Control for Supply Chain Management: The CPIM Reference, Second Edition, features hundreds of practice questions for the CPIM exams. A Guide to Achieving Certification on Your First Attempt

Driving Operational Excellence

A supply chain is a network of retailers, distributors, transporters, storage facilities and suppliers that participate in the sale, delivery and production of a particular product. The concept of supply chain often involves backward integration - acquiring ownership of one's supply chain (in the hope of reducing supplier power and thus reducing input costs). The four major functional components are: demand planning manufacturing planning and scheduling supply planning transportation planning The reconfigured module 1 BSCM exam covers the basics. The exam attempts to test your basic understanding towards supply chain and the various PIM (production and inventory management) concepts. Many people consider this exam as the easiest one. To assure exam success, you need to read and learn as much as possible. Our ExamFOCUS notes provides knowledge material to enhance your exam readiness - we help answer those tough questions that cover advanced knowledge and concepts not commonly found in the standard study material. Still, the coverage of the exam is huge. Expecting full and complete coverage of all the knowledge items from a single source is unrealistic. You are therefore advised to use this book together with other study resources for the best possible preparation!

SMR was the final module to take in the past. Now it becomes module 1 of the new part 2 exam. Is it tough? Well, in a sense, yes. It is tough because there is no fixed answer to the test questions. You are asked to choose the best possible answer among all potentially OK answers. Also, most questions are long and with complicated scenarios to confuse you. To pick up the "politically correct" answers you have to use your business sense to make judgment on a case by case basis. SMR is all about supply-side management at a higher global and strategic level. What is serious supply management all about?

Accenture has developed seven principles of supply-chain management: 1. Segment customers based on their service needs. 2. Design the logistics network based on service requirements. 3. Listen to the signals of market demand and plan accordingly. 4. Differentiate products based on actual consumer demand. 5. Strategically manage the sources of supply. 6. Develop a supply-chain-wide technology strategy. 7. Adopt measures that apply to every link in the supply chain. Because of advances in manufacturing and distribution, the cost of developing new products and services is dropping, and time to market is speeding up. This has resulted in increasing customer demands, local and global competition, and increased pressure on the supply chain. To stay competitive, companies must reinvent themselves so that the supply chain-sourcing and procurement, production scheduling, order fulfillment, inventory management, and customer care-is no longer a cost-based back-office exercise, but rather a flexible operation designed to effectively address today's challenges. If you have been specializing in manufacturing or shop floor functions, it is now the time to move yourself to a managerial position - you need to see things from a broader MBA style perspective.

Our original research reveals specific weaknesses that you can exploit to increase your exam score more than you've ever imagined. CMRP Exam Secrets includes: The 5 Secret Keys to CMRP Exam Success: Time is Your Greatest Enemy, Guessing is Not Guesswork, Practice Smarter, Not Harder, Prepare, Don't Procrastinate, Test Yourself; A comprehensive General Strategy review including: Make Predictions, Answer the Question, Benchmark, Valid Information, Avoid Fact Traps, Milk the Question, The Trap of Familiarity, Eliminate Answers, Tough Questions, Brainstorm, Read Carefully, Face Value, Prefixes, Hedge Phrases, Switchback Words, New Information, Time Management, Contextual Clues, Don't Panic, Pace Yourself, Answer Selection, Check Your Work, Beware of Directly Quoted Answers, Slang, Extreme Statements, Answer Choice Families; A comprehensive Content review including: Requisition and Electronic Requisition, Purchasing Process, Fundamental Principles of Purchasing, Traveling Purchase Request, Purchase Order and Standing Order, Free on Board (FOB), Payment Terms, Purchase Orders, Capital Terms, Liabilities and Warranties, Uniform Commercial Code, Activity Based Costing (ABC), Activity Based Management (ABM), Category Management and Cross Docking, Inventory Distribution Management, Economic Order Quantity (EOQ), First In, First Out (FIFO), Just-In-Time System, Materials Management Professional, Operating Room, Support Services, Material Safety Data Sheet (MSDS), Chemical Hazard Communication Standard (CHCS), Infectious Waste, Hazardous Materials and Waste System, JCAHO, National Fire Protection Agency, Linens, and much more...

The first of its kind—a Value Stream Mapping book written for those in service and office environments who need to streamline operations Value Stream Mapping is a practical, how-to guide that helps decision-makers improve value stream efficiency in virtually any setting, including construction, energy, financial service, government, healthcare, R&D, retail, and technology. It gives you the tools to address a wider range of important VSM issues than any other such book, including the psychology of change, leadership, creating teams, building consensus, and charter development. Karen Martin is principal consultant for Karen Martin & Associates, LLC, instructor for the University of California, San Diego's Lean Enterprise program, and industry advisor to the University of San Diego's Industrial and Systems Engineering program. Mike Osterling provides support and leadership to manufacturing and non-manufacturing organizations on their Lean Transformation Journey. In a continuous improvement leadership role for six years, Mike played a key role in Square D Company's lean transformation in the 1990s.

If you take 24 Lean Six Sigma gurus and ask them to reveal their most closely-guarded secrets... to uncover their most valuable tips, techniques, and tactics for creating Lean speed and Six Sigma quality in any organization... what would these experts give to you? They would give you this book. Here are the very best Lean Six Sigma strategies, methodologies, and tools... condensed, stripped down, and taught in a jargon-free style that not only teaches you how to revolutionize your organization... but prepares you to transform yourself into the kind of game-changing leader who is able to run ahead of the pack and inspire others to work together to drive real and lasting changes within your organization.

It was hot at Padachina even for a summer day. In this village were many houses, but not a soul could be seen anywhere. The bazaar was full of shops and the lanes were lined with houses built either of brick or of mud. Every house was quiet. The shops were closed, and no one knew where the shopkeepers had gone. Even the street beggars were absent. The weavers wove no more. The merchants had no business. Philanthropic persons had nothing to give. Teachers closed their schools. Things had come to such a pass that children were even afraid to cry. The streets were empty. There were no bathers in the river. There were no human beings about the houses, no birds in the trees, no cattle in the pastures. Jackals and dogs morosely prowled in the graveyards and in the cremation grounds. One great house stood in this village. Its colossal pillars could be seen from a distance. But its doors were closed so tight that it was almost impossible for even a breath of air to enter. Within the house a man and his wife sat deeply absorbed in thought. Mahendra Singh and his wife were face to face with famine. The year before the harvests had been below normal. So rice was expensive this year and people began to suffer. Then during the rainy season it rained plentifully. The villagers at first looked upon this as a special mercy of God. Cowherds sang in joy, and the wives of the peasants began to pester their husbands for silver ornaments. All of a sudden, God frowned again. Not a drop of rain fell during the remaining months of the season. The rice fields dried into heaps of straw. Here and there a few fields yielded poor crops, but government agents bought these up for the army. So people began to starve again. At first they lived on one meal a day. Soon, even that became scarce, and they began to go without any food at all. The crop was too scanty, but the government revenue collector sought to advance his personal prestige by increasing the land revenue by ten per cent. And in dire misery Bengal shed bitter tears. Beggars increased in such numbers that charity soon became the most difficult thing to practise. Then disease began to spread. Farmers sold their cattle and their ploughs and ate up the seed grain. Then they sold their homes and farms. For lack of food they soon took to eating leaves of trees, then grass and when the grass was gone they ate weeds. People of certain castes began to eat cats, dogs and rats.
