The True Stories Behind the Discovery of Egypt's Greatest Monuments

A Novel

Scholars in Egyptology have often debated the following question: was the ancient Egyptian society organized along patrilineal or matrilineal lines? In taking a fresh and innovative look at the ancient Egyptian family, Allen attempts to solve this long-standing puzzle. Allen argues that the matrilineal nature

of the ancient Egyptian family and social organization provides us with the key to understanding why and how ancient Egyptian women were able to rise to power, study medicine, and enjoy basic freedoms that did not emerge in Western Civilization until the twentieth century. More importantly, by examining the types of families that existed in ancient Egypt along with highlighting the ancient Egyptians' kinship terms, we can place the ancient Egyptian civilization in the cultural context and incubator of Black Africa. This groundbreaking text is a must-read for Historians and those working in African Studies and Egyptology.

General Loring was one of many Confederate officers who after the close of the War of the Rebellion offered their services to foreign rulers. A number of these officers took their way to Egypt, and the author of this book was one of the most successful of them all. He was made Pasha by the Khedive, and he rendered that ruler honorable and efficient service. It was natural that Loring Pasha should have been led to give his Egyptian experiences durable shape, and his book gives a clear and agreeably written account of the country. Such a writer has much more authority than the mere traveler. General Loring lived long in the country, and in intimate relations with persons at the centre of affairs; being withal a man of thought and intelligence he could not, with his opportunities, fail to acquire and retain impressions and facts of interest and value.

With this new lectionary commentary series, Westminster John Knox offers the most extensive resource for preaching on the market today. When complete, the twelve volumes of the series will cover all the Sundays in the three-year lectionary cycle, along with movable occasions, such as Christmas Day, Epiphany, Holy Week, and All Saints' Day. For each lectionary text, preachers will find four brief essays--one each on the theological, pastoral, exegetical, and homiletical challenges of the text. This gives preachers sixteen different approaches to the proclamation of the Word on any given occasion. The editors and contributors to this series are world-class scholars, pastors, and writers representing a variety of denominations and traditions. And while the twelve volumes of the series will follow the pattern of the Revised Common Lectionary, each volume will contain an index of biblical passages so that nonlectionary preachers, as well as teachers and students, may make use of its contents.

It is astonishing to think that many great archaeological

discoveries occurred in Egypt only by way of accident during the 19th and 20th centuries. Even today accidents still play a vital, frequent and sometimes comical role, with new discoveries happening almost weekly and with many more secrets of the ancient Egyptian civilization still remaining. This book takes readers beyond these discoveries and their associated accidents. This book cannot be considered purely as an Egyptological and archaeological reading or even as dry history pages covering Egypt's modern era of the 19th and 20th centuries. Rather, it is a book that sheds light on the intimate links between the birth of Egyptology after the deciphering of the famous Rosetta Stone and the raging world politics and regional power shifts in Egypt and its surroundings. The book ties together the political storms of colonialism in the first half of the 19th century and the unsettling effect these upheavals had on Egypt during the reign of Mohamed Ali Pasha. In a storytelling style, the book is a journey through time and place. The book takes readers on a guided tour to most of Egypt's well-known monuments that were mainly discovered by simple accident or in which an accident played a major part leading to discovery. In addition, the book leads readers through time exploring ancient Egypt, the days of the pharaohs, ancient gods, rituals and public ceremonial festivals, with old and new stories that shed light on the true value of such discoveries in antiquity and modern day.

This study of Egyptian theatre and its narrative construction explores the ways representations of Egypt are created of and within theatrical means, from the 19th century to the present day. Essays address the narratives that structure theatrical, textual, and performative representations and the ways the rewriting process has varied in different contexts and at different times.

Drawing on concepts from Theatre and Performance Studies, Translation Studies, Cultural Studies, Postcolonial Studies, and Diaspora Studies, scholars and practitioners from Egypt and the West enter into dialogue with one another, expanding understanding of the different fields. The articles focus on the ways theatre texts and performances change (are rewritten) when crossing borders between different worlds. The concept of rewriting is seen to include translation, transformation, and reconstruction, and the different borders may be cultural and national, between languages and dramaturgies, or borders that are present in

people's everyday lives. Essays consider how rewritings and performances cross borders from one culture, nation, country, and language to another. They also study the process of rewriting, the resulting representations of foreign plays on stage, and representations of the Egyptian revolution on stage and in Tahrir Square. This assessment of the relationship between theatre practices, exchanges, and rewritings in Egyptian theatre brings vital coverage to an undervisited area and will be of interest to developments in theatre translation and beyond.

Everything changes in a single moment for Dawn Edelstein. She's on a plane when the flight attendant makes an announcement: Prepare for a crash landing. She braces herself as thoughts flash through her mind. The shocking thing is, the thoughts are not of her husband but of a man she last saw fifteen years ago: Wyatt Armstrong. Dawn,

miraculously, survives the crash, but so do all the doubts that have suddenly been raised. She has led a good life. Back in Boston, there is her husband, Brian, their beloved daughter, and her work as a death doula, in which she helps ease the transition between life and death for her clients. But somewhere in Egypt is Wyatt Armstrong, who works as an archaeologist unearthing ancient burial sites, a career Dawn once studied for but was forced to abandon when life suddenly intervened. And now, when it seems that fate is offering her second chances, she is not as sure of the choice she once made. After the crash landing, the airline ensures that the survivors are seen by a doctor, then offers transportation to wherever they want to go. The obvious destination is to fly home, but she could take another path: return to the archaeological site she left years before, reconnect with Wyatt and their unresolved history, and maybe even complete her research on *The Book of Two Ways*—the first known map of the afterlife. As the story unfolds, Dawn's two possible futures unspool side by side, as do the secrets and doubts long buried with them. Dawn must confront the questions she's never truly asked: What does a life well lived look like? When we leave

This qualitative evaluation of the Takaful cash transfer program was conducted between January and April 2018 by a team of researchers trained in qualitative methods. The evaluation sought to further delve into and explain dimensions of the Takaful transfers' impact on beneficiaries that were previously under-investigated in the quantitative survey. In so doing, the quantitative components' findings were also further contextualized and clarified. This qualitative component's main goals, therefore, were to explore the differences between the transfers' impact on ultra-poor households and households near the threshold, the differences in how the two household types use the transfer, and the impact of the transfers on intrahousehold decision making

Of major interest is the relationship between the political and military leaders and how that affected the buildup and course of the conflict. Taking this as a starting place, the author concentrates on how Soviet military doctrinal changes presented themselves between the conclusion of the Six-Day War and the Yom Kippur War.
