The number of students victimized by violent crimes rose by nearly 25% between 1989-1995. Screening, along with good clinical judgment by counselors, should be the source for identifying children and adolescents at risk. This book is designed as a guidebook to help counselors develop skills in learning about the etiology of violence, identifying individuals at risk, preventing violent episodes with survivors. It is divided into six sections, grouped by chapters on similar themes. Section 1, "Defining the Problem," defines the problem from a statistical perspective by describing the nature and extent of violence in schools; discusses psychological and cultural characteristics of violent students; and describes school violence from socioecological perspectives. Section 2, "The Etiology of Violence" Section 3, "School Violence Prevention Strategies," is comprised of nine chapters, and highlights prevention programs that are in place and working. Section 4, "Violence in Special Populations," discusses adolescent suicide: violence against gay, lesbian, and transgender youths; and hate crimes and counselors' role in prevention them. Section 5, "Violence Intervention Strategies: Individual, Family, School, and Community" addresses the issues and concerns on what to do when violence has already occurred. Section 6, "Summary and Implications for Practice," summarizes how counselors can use this book to learn how to recognize violence-precipitating environments; screen for children at risk for violence; remediate those who have a high violence potential; and work with parents to ensure a consistent response (appendixes, and 865 references.) This key resource is often referred to as the "Green Book". Federal policymakers and program managers are continually seeking ways to better achieve agencies' missions and program results, in other words, they are seeking ways to improve accountability. A key factor in helping achieve such outcomes and minimize operational problems is to implement appropriate internal control. Effective internal control also helps in managing change to cope with shifting environments and evolving demands and priorities. As programs change and as agencies strive to improve operational processes and implement new technological developments, management must continually assess and evaluate its internal control to assure that the control activities being used are effective and updated when necessary. The Federal Managers' Financial Integrity Act of 1982 (FMFIA) requires the General Accounting Office (GAO) to issue standards for internal control in government. The standards provide the overall framework for establishing and maintaining internal control and for identifying and addressing major performance and management challenges, and areas at greatest risk of fraud, waste, abuse and mismanagement. This report explores the Five Standards for Internal Control as identified by GAO for policymakers and program managers: - Control Environment - Risk Assessment - Control Activities - Information and Communications - Monitoring These standards apply to all aspects of an agency's operations: programmatic, financial, and compliance. However, they are not intended to limit or interfere with duly granted authority related to developing legislation, rule-making, or other discretionary policy-making in an agency. These standards provide a general framework. In implementing these standards, management is responsible for developing the detailed policies, procedures, and practices to fit their agency's operations and to ensure that they are built into and an integral part of operations. This authoritative edition of the complete texts of the Federalist Papers, the Articles of Confederation, the U.S. Constitution, and the Amendments to the U.S. Constitution features supporting essays in which leading scholars provide historical context and analysis. In three additional essays, John Dunn explores the composition of the Federalist Papers and the conflicting agendas of its authors; Eileen Hunt Botting explains how early advocates of women's rights, most prominently Mercy Otis Warren, Judith Sargent Murray, and Charles Brockden Brown, responded to the Federalist-Antifederalist debates; and Donald Horowitz discusses the Federalist Papers from the perspective of recent experiments with democracy and constitution-making around the world. These essays both illuminate the original texts and encourage active engagement with them.

With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens. The organization and pedagogical features were developed and vetted with feedback from American government instructors dedicated to the project."--BC Campus website.

This chapter is designed to address the needs of individuals with visual and multiple disabilities who may not be able to follow all parts of a traditional academic curriculum. As educators, our primary goal should be to provide students with skills that will be of use throughout their lives. Skill acquisition often takes longer for students with multiple disabilities, and they are not always able to generalize them into other settings. For this reason it is important to identify skills that will help prepare students to lead the most independent lives possible and to provide many opportunities to practice them.

The African American Guide to the Bible makes the case for the relevance of the Bible from the perspective of people of color. It presents a comprehensive biblical view of topics of interest to African Americans and clarifies racial issues for white people. Part 1 addresses the inspiration of the Bible by giving evidence for its authenticity. A considerable amount of time is spent on examining the original text of the Bible, the archeological evidence, and the evidence from predictive prophecy to demonstrate the uniqueness of the Bible. Part 2 deals with the black presence in the Bible by demonstrating the prominence of people of color and black people in particular by highlighting their importance in the plan of God. It explains what it means to be black and demonstrates that the scientific and biblical evidence are both consistent with respect to race. Part 3 is a response to the arguments of racism used by critics of the Bible, for example, "Christianity is the white man's religion" and "Bible supports slavery and racism." These arguments are examined and evaluated in light of scripture and the context of history. Part 4 deals with the unity of humanity from a biblical perspective. It shows why racism is not only unbiblical but is evil when understood from the perspective of God.
