Seeing A Color Blind Future The Paradox Of Race

In these five eloquent and passionate pieces (which she gave as the prestigious Reith Lectures for the BBC) Patricia J. Williams asks how we might achieve a world where "color doesn't matter"--where whiteness is not equated with normalcy and blackness with exoticism and danger. Drawing on her own experience, Williams delineates the great divide between "the poles of other people's imagination and the nice calm center of oneself where dignity resides," and discusses how it might be

bridged as a first step toward resolving racism. Williams offers us a new starting point--"a sensible and sustained consideration"--from which we might begin to deal honestly with the legacy and current realities of our prejudices.

It had seemed so simple, even fun, when they explained it: New York needed non-satellite-based relay towers. Commco sent me to find towns along the needed pathway, to offer to restore some of the boons of civilization in return for an agreement to build, power and guard the towers. After all, it had only been fifty years. I would never have believed that the countryside would have

turned barbaric so fast. Thus begins Martin Barrister's journey through an unfamiliar landscape, where his training and skills are of little help, and only quick wits and creativity will allow him to survive. When his job turns out to be a ruse, and he becomes bait in a dispute he can barely fathom, Martin discovers what loyalty is worth. And what civilization is - and isn't - comprised of. A collection of lectures which focussed on the small, constant aggressions of racism. "Catanese's beautifully written and cogently argued book addresses one of the

most persistent sociopolitical questions in contemporary culture. She suggests that it is performance and the difference it makes that complicates the terms by which we can even understand 'multicultural' and 'colorblind' concepts. A tremendously illuminating study that promises to break new ground in the fields of theatre and performance studies, African American studies, feminist theory, cultural studies, and film and television studies."

can understand the contradictory aspects of racial discourse and performance as they have emerged during the last two decades. An ambitious, smart, and fascinating book." ---Jennifer DeVere Brody, Duke University

Are we a multicultural nation, or a colorblind one? The Problem of the Color[blind] examines this vexed question in American culture by focusing on black performance in theater, film, and television. The practice of colorblind casting---choosing actors without regard to race---assumes a

File Type PDF Seeing A Color Blind Future The Paradox Of Race

performing body that is somehow race neutral. But where, exactly, is race neutrality located---in the eyes of the spectator, in the body of the performer, in the medium of the performance? In analyzing and theorizing such questions, Brandi Wilkins Catanese explores a range of engaging and provocative subjects, including the infamous debate between playwright August Wilson and drama critic Robert Brustein, the film career of Denzel Washington, Suzan-Lori Parks's play Venus, the phenomenon of postblackness (as

represented in the Studio Museum in Harlem's "Freestyle" exhibition), the performer Ice Cube's transformation from icon of gangsta rap to family movie star, and the controversial reality television series Black. White. Concluding that ideologies of transcendence are ahistorical and therefore unenforceable, Catanese advances the concept of racial transgression---a process of acknowledging rather than ignoring the racialized histories of performance---as her chapters move between readings of dramatic texts,

films, popular culture, and debates in critical race theory and the culture wars. "Does the election of the first Black president mean that the United States is a 'postracial' society? In this volume, scholars in psychology, education, sociology, and related fields dissect the concept of color-blind racial ideology (CBRI), the widely-held belief that skin color does not affect interpersonal interactions, and that interpersonal and institutional racism therefore no longer exists in America. Contributors survey the

theoretical and empirical literature on racial color-blindness; discuss novel ways of assessing and measuring color-blind racial beliefs; examine related characteristics such as lack of empathy and internalized racism; and assess the impact of CBRI across contexts such as education, the workplace, and health care settings"--Provided by publisher.

This study works from the premise that there is little enthusiasm today for massive state ownership, and no trust in the alternative of unbounded capitalism. Third Way proposals have often turned out to be no less sterile.

In this book, Bonilla-Silva explores with systematic interview data the nature and components of post-civil rights racial ideology. Specifically, he documents the existence of a new suave and apparently non-racial racial ideology he labels color-blind racism. He suggests this ideology, anchored on the decontextualized, ahistorical, and abstract extension of liberalism to racial matters, has become the

File Type PDF Seeing A Color Blind Future The Paradox Of Race

organizational matrix whites use to explain and account for racial matters in America.

Every academic discipline has an origin story complicit with white supremacy. Racial hierarchy and colonialism structured the very foundations of most disciplines' research and teaching paradigms. In the early twentieth century, the academy faced rising opposition and correction, evident in the intervention of scholars including W. E. B. Du Bois, Zora Neale Hurston, Carter G. Woodson, and others. By the mid-twentieth century, education itself became a center in the struggle for social justice. Scholars mounted insurgent efforts to discredit some of the most odious

File Type PDF Seeing A Color Blind Future The Paradox Of Race

intellectual defenses of white supremacy in academia, but the disciplines and their keepers remained unwilling to interrogate many of the racist foundations of their fields, instead embracing a framework of racial colorblindness as their default position. This book challenges scholars and students to see race again. Examining the racial histories and colorblindness in fields as diverse as social psychology, the law, musicology, literary studies, sociology, and gender studies, *Seeing Race Again* documents the profoundly contradictory role of the academy in constructing, naturalizing, and reproducing racial hierarchy. It shows how colorblindness compromises the capacity of

disciplines to effectively respond to the wide set of contemporary political, economic, and social crises marking public life today.

In this unique volume, James Hackney invites readers to enter the minds of 10 legal experts that in the late 20th century changed the way we understand and use theory in law today. True to the title of the book, Hackney spent hours in conversation with legal intellectuals, interviewing them about their early lives as thinkers and scholars, their contributions to American legal theory, and their thoughts regarding some fundamental theoretical questions in legal academe, particularly the law/politics debate. Challenging the fundamental tenet of the multicultural

movement -- that social struggles turning upon race, gender, and sexuality are struggles for recognition -- this work offers a powerful critique of current conceptions of identity and subjectivity based on Hegelian notions of recognition. The author's critical engagement with major texts of contemporary philosophy prepares the way for a highly original conception of ethics based on witnessing. Central to this project is Oliver's contention that the demand for recognition is a symptom of the pathology of oppression that perpetuates subject-object and same-different hierarchies. While theorists across the disciplines of the humanities and social sciences focus

File Type PDF Seeing A Color Blind Future The Paradox Of Race

their research on multiculturalism around the struggle for recognition, Oliver argues that the actual texts and survivors' accounts from the aftermath of the Holocaust and slavery are testimonials to a pathos that is "beyond recognition". Oliver traces many of the problems with the recognition model of subjective identity to a particular notion of vision presupposed in theories of recognition and misrecognition. Contesting the idea of an objectifying gaze, she reformulates vision as a loving look that facilitates connection rather than necessitates alienation. As an alternative, Oliver develops a theory of witnessing subjectivity. She suggests that the notion of witnessing, with its

File Type PDF Seeing A Color Blind Future The Paradox Of Race

double meaning as either eyewitness or bearing witness to the unseen, is more promising than recognition for describing the onset and sustenance of subjectivity. Subjectivity is born out of and sustained by the process of witnessing -- the possibility of address and response -- which puts ethical obligations at its heart.

Patricia J. Williams, whose acclaimed book The Alchemy of Race and Rights offered a vision for healing the ailing spirit of the law, here broadens her focus to address the wounds in America's public soul, the sense of community that rhetoric so subtly but surely makes and unmakes. In these pages we encounter figures and images plucked from headlines--from Tonya Harding to Lani Guinier, Rush Limbaugh to

Hillary Clinton, Clarence Thomas to Dan Quayle--and see how their portrayal, encoding certain stereotypes, often reveals more about us than about them. What are we really talking about when we talk about welfare mothers, for instance? Why is calling someone a "redneck" okay, and what does that say about our society? When young women appear on Phil Donahue to represent themselves as Jewish American Princesses, what else are they doing? These are among the questions Williams considers as she uncovers the shifting, often covert rules of conversation that determine who "we" are as a nation.

The myth of a color-blind society is deconstructed in this powerful new look at race in America that consults sociologists, economists, criminologists, political scientists, and legal scholars in the search for answers to why so many white Americans think racism is no longer a problem. (Social Science)

How can colorblindness – the idea that race does not matter –

File Type PDF Seeing A Color Blind Future The Paradox Of Race

be racist? This illuminating book introduces the paradox of colorblind racism: how dismissing or downplaying the realities of race and racism can perpetuate inequality and violence. Drawing on a range of theoretical approaches and real-life examples, Meghan Burke reveals colorblind racism to be an insidious presence in many areas of institutional and everyday life in the United States. She explains what is meant by colorblind racism, uncovers its role in the history of racial discrimination, and explores its effects on how we talk about and treat race today. The book also engages with recent critiques of colorblind racism to show the limitations of this framework and how a deeper, more careful study of colorblindness is needed to understand the persistence of

racism and how it may be challenged. This accessible book will be an invaluable overview of a key phenomenon for students across the social sciences, and its far-reaching insights will appeal to all interested in the social life of race and racism.

Critics of color-blind constitutionalism are in this sense captured by the object of their critique. Our lives are spent watching the clock. We go to sleep by it. Wake up to it. Rely on it. Race it. It's easy to forget that we're only given so much. We ignore it because we're convinced we'll always have more. I am proof that we aren't promised anything. The clock owes us nothing. I know this because not only was Time my name, I wasn't given enough of it. Sure I had challenges but I vowed to make

Then he walked in and changed everything. He gave me a reason to fight. He helped me prepare. Like others before me, when time slowed I wasn't ready. I begged for more. But the clock, it stopped for no one. On the day my world went black, I refused to take him with me. Only he didn't listen. I was a doctor. A bringer of bad news. I read the

Life was easier when you didn't see. But they were open now. They saw her. They saw everything. Suddenly invisible lines ceased to matter. For me, Time
