 ? Case Analysis of CIRP & Liquidation / Individual Insolvency Resolution / Business and Professional Ethics
 ? MCQs based on Various decisions of Courts
 ? Model Question Papers**

**1. Introduction, 2. Spiritual Heritage Tourist Centres in Tamil Nadu, 3. Cultural Heritage Tourist Centres in Tamil Nadu, 4. Natural Heritage Tourist Centres in Tamil Nadu, 5. Fairs, Festivals and Folk Entertainments in Tamil Nadu, 6. Tourism Plant Facilities in Tamil Nadu, 7. Conclusion and Suggestions. - PREFACE: “Tourism in Tamil Nadu - Growth and Development” is a captivating theme. Man has been fascinated by travel and tourism from the earliest historical period. He always has had the urge to discover the unknown, to explore new and strange places, to seek changes of environment and to undergo new experiences. Travelling to achieve these ends is not new, but tourism is of a relatively modern origin. Tourism is distinguishable by its mass character from the travel undertaken in the past. This is largely a post-second world war phenomenon. Until recently only affluent people participated in tourism. Increased leisure, higher incomes and greatly enhanced mobility have combined to enable more people to participate in Tourism. Revolution in transport, technological progress and the emergence of a middle class with time and money to spare for recreation, has led to the growth of tourism—“the modern holiday industry”. Thus tourism is no longer the prerogative of a few but is an accepted part of life of a large number of people. India is one of the oldest civilizations with a kaleidoscopic variety and rich cultural heritage. For centuries India has been a centre of attraction for different people for different reasons. The ancient invaders viewed it as a goldmine with unlimited wealth to plunder; the learned were fascinated by its mystic spiritualism and profound philosophy; the uninitiated saw it as a land of naked fakirs and snake charmers; while the others were simply charmed by the sheer beauty of its natural attractions and amazing variety of its flora and fauna.**

This book marks a decade of a column that appears every Monday in The Hindu's Metro Plus, Madras edition. Madras Miscellany has, over that decade, created an awareness and a greater appreciation of the significant past of Madras and of the events and the people who over the years made Madras "the first city of modern India", a description of the City the way the column, S.Muthiah, never tires of reiterating. Over a 1500 or so items that appeared in the 514 columns published during Madras Miscellany's first decade appear in the book in three sections:'People', 'Places' and 'Potpourri', the last named being everything else that doesn't fit into the other two sections. And in them there develops a rather comprehensive story of Madras over its nearly 375 years of history.In sum, this is a book for anyone interested in the development of Madras and its considerable contribution to modern India.

QRS for BDS 1st Year is an extremely exam-oriented book. The book contains a collection of the last 10 15 years' solved questions of General Human Anatomy, Embryology and Histology; Human Physiology and Biochemistry; and Dental Anatomy, Embryology and Oral Histology in accordance with the new syllabus of BDS 1st year. The book will serve the requirements of BDS 1st year students to prepare for their examinations and help PG aspirants in quick review of important topics. It would also be helpful for PG students in a quick rush through the preclinical subjects About the Author : - Dr. Jyotsna Rao, is a senior faculty, currently working as an Associate Professor (Reader) in the Department of Oral and Maxillofacial Surgery, The Oxford Dental College, Hospital and Research Centre, Bangalore. She is also the founder and chairperson of Raghasal Institute of Postgraduate Entrance Examinations (RIPEE), Bangalore.Dr Rao has immense experience in teaching undergraduate and postgraduate students. She also keeps herself actively involved in researching innovative and practical ways of coaching the budding professionals for various state and national level postgraduate entrance examinations.

Like to walk through one of the hathivanas (elephant forests) maintained by Mauryan king Chandragupta? Wish to be part of the royal dinner of a Mughal Emperor, with the palate containing a variety of forty meat dishes? Desirous of having a glimpse of the head on the shield and full-mount trophies of tigers and lions, decorating the halls and walls of the military houses of the British Raj? Conservation Conundrum - Journey of India's wildlife through ages is a pen-picture of the glory and good times, the trials and tribulations, persecution and perturbation of the country's wild animals in its recorded history. The author has captured the theme through a historian's kaleidoscope, where from a period of plenty in the ancient India to its lowest, when the country was into its first two decades of independence. From a situation of no-hope, how most of the iconic wildlife species registered a turn around and smart recovery in a span of half a century, despite the odds working against them forms the central thread. The author takes the reader through the pages in finding an answer to the unending need and interest or the future of the wild denizens that is important to a developing nation like India.

In Flesh and Fish Blood Subramanian Shankar breaks new ground in postcolonial studies by exploring the rich potential of vernacular literary expressions. Shankar pushes beyond the postcolonial Anglophone canon and works with Indian literature and film in English, Tamil, and Hindi to present one of the first extended explorations of representations of caste, including a critical consideration of Tamil Dalit (so-called untouchable) literature. Shankar shows how these vernacular materials are often unexpectedly politically progressive and feminist, and provides insight on these oft-overlooked—but nonetheless sophisticated—South Asian cultural spaces. With its calls for renewed attention to translation issues and comparative methods in uncovering disregarded aspects of postcolonial societies, and provocative remarks on humanism and cosmopolitanism, Flesh and Fish Blood opens up new horizons of theoretical possibility for postcolonial studies and cultural analysis.

'A glossary of colloquial Anglo-Indian words and phrases, and of kindred terms, etymological, historical, geographical and discursive.' Hobson-Jobson is a unique work of maverick scholarship. Compiled in 1886 by two India enthusiasts, it documents the words and phrases that entered English from Arabic, Persian, Indian, and Chinese sources - and vice versa. Described by Salman Rushdie as ‘the legendary dictionary of British India’ it shows how words of Indian origin were absorbed into the English language and records not only the vocabulary but the culture of the Raj. Illustrative quotations from a wide range of travel texts, histories, memoirs, and novels create a canon of English writing about India. The definitions frequently slip into anecdote, reminiscence, and digression, and they offer intriguing insights into Victorian attitudes to India and its people and customs. With its delight in language, etymology, and puns, Hobson-Jobson has fascinated generations of writers from Rudyard Kipling to Tom Stoppard and Amitav Ghosh. This selected edition retains the range and idiosyncrasy of the original, and includes fascinating information on the glossary's creation and its significance for the English language. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

This book presents select proceedings of the International Conference on Futuristic Communication and Network Technologies (CFCNT 2020) conducted at Vellore Institute of Technology, Chennai. It covers various domains in communication engineering and networking technologies. This volume comprises of recent research in areas like optical communication, optical networks, optics and optical computing, emerging trends in photonics, MEMS and sensors, active and passive RF components and devices, antenna systems and applications, RF devices and antennas for microwave emerging technologies, wireless communication for future networks, signal and image processing, machine learning/AI for networks, internet of intelligent things, network security and blockchain technologies. This book will be useful for researchers, professionals, and engineers working in the core areas of electronics and communication.

This well-received book, now in its second edition, incorporates a new chapter on PHP as Chapter 13 based on the readers' demand in todays world PHP which is an important web programming technology. This text provides students with a comprehensible introduction to the programming and scripting languages currently used to create web pages. It teaches the programming concepts of various Web technologies and the fundamentals needed to program on the Internet. The book emphasises the underlying fundamentals of Web page development and prepares students to build real-world, industrial strength Web-based applications, and use a wide variety of Web development tools effectively. It covers the concepts of Internet Protocols, Java networking, JavaScript, VBScript and PHP. The material presented on Java network programming contains an elaborate description with examples to help the reader clearly understand the networking concepts. The book is intended as a text for students of Computer Science and Engineering, Information

Key Features • Presents well-designed material on HTML, DHTML, XML and PHP with many practical exercises. • Explains the development of servlets with simple examples. • Explores the programming features of JSPs. • Introduces the elements of ASPs with worked-out exercises. • Includes Review Questions and Objective Type Questions

In a world where the husband-wife relationship is good fodder for stand-up comedy, this easy-to-read book offers fresh insight into the inner workings of a "husband's mind".

This book is a collection of peer-reviewed best selected research papers presented at 3rd International Conference on Computer Networks and Inventive Communication Technologies (ICCNCT 2020). The book covers new results in theory, methodology, and applications of computer networks and data communications. It includes original papers on wireless networks, data communication technologies, and network security. The proceedings of this conference is a valuable resource, dealing with both the important core and the specialized issues in the areas of next generation wireless network design, control, and management, as well as in the areas of protection, assurance, and trust. This book is a valuable resource for researchers, instructors, students, scientists, engineers, managers, and industry practitioners for advance work in the area.
