From the heart of The Velvet a writing community built around the fervent love of neo-noir fiction comes an original anthology. Stacked with brilliant emerging writers alongside some of the strongest established voices in contemporary literature, WARMED AND BOUND crosses literary boundaries on all sides, to deliver an altogether unique reading experience. Through seemingly opposed conventions, beautiful prose makes a hard impression on the short story form. From a scary love story to a nostalgic thriller, a hardboiled pursuit of salvation to the black humor that is existentialism, WARMED AND BOUND is rogue humility and lovesick noir, where humanity is a dirty puzzle. It 's Velvet Noir. Welcome. Once upon a time, he was everything to her, except for one thing: her future Christmas sparkles from every bough and window at the cozy Four Winds Ski Resort, where single mother Eden Kendall and her eight-year-old son are spending the holiday. A surprise marriage proposal from her boss's son wasn't on her Christmas list, but it's the perfect excuse to get away and weigh her options. She never imagined her son's ski instructor/Santa impersonator would be the gorgeous, charismatic dreamer she left behind years ago, the one who still owns a piece of her heart. Cole Hagan has never stopped loving Eden and he's spent the last eight years proving her wrong on every count about his potential. While he fights to save the resort that he helped to build by organizing a holiday concert, he decides it's about time that Eden puts aside her list-making pragmatism so that she and her skeptical son can experience the true magic of Christmas. Can a not-so-perfect angel help this unlikely pair get a second chance at happily ever after?

Interviews describe ghetto life

In the first installment of the A Fire Beneath the Skin trilogy, the city of Klaar has never fallen. No enemy has ever made it across the Long Bridge or penetrated the city's mighty walls. Even when a powerful invading army shows up at the gates, the duke and his daughter, Rina Veraiin, are certain that it poses little threat. But they are cruelly betrayed from within and, in a horrific spasm of violence, the city is brought to its knees. With the help of her bodyguard, Kork, the battle-trained young Rina narrowly escapes the slaughter and makes her way to the lair of an ancient sorcerer--the Ink Mage--who gifts her with a strange, beautiful set of magical tattoos. Now a duchess in exile, Rina sets out on a quest to reclaim what is rightfully hers, aided by a motley assortment of followers who will help her in her cause--some for noble reasons and others for their own dark purposes. With the enemy's agents nipping at her heels, Rina must learn to harness her new and startling magical powers if she is to assert her rightful place as ruler of Klaar.

Norman Birnbaum has contributed to Toward a Critical Sociology as an author. Norman Birnbaum is University Professor at Georgetown University Law School and the author of The Crisis of Industrial Society and Toward a Critical Sociology (both from OUP). A founding editor of New Left Review, he has served on the board of Partisan Review and The Nation . He lives in Washington, D.C. 'Arabiyyat al-Naas (Part One) offers a groundbreaking introduction to Arabic as it is written and spoken by native speakers. It combines a progressive and rigorous grounding in Modern Standard Arabic (MSA) – the form employed for reading, writing and formal speaking – with an innovative integration of the spoken Levantine variety used in everyday situations in Syria, Lebanon, Jordan and Palestine. Introducing the two simultaneously 'Arabiyyat al Naas (Part One) uses each in its proper context: Levantine for conversations and MSA for reading and writing activities. In this way, the course efficiently prepares students for the practical realities of learning and "living" Arabic today. Features include: 21 theme-based units covering all the core topics expected in a first-year Arabic course, such as countries, clothes, colors, family and professions a broad range of stimulating activities and exercises fostering active engagement with the course and the development of comprehension and communication skills comprehensively covers the 5 Cs: communication, culture, connections, comparisons and communities a free DVD filmed on location in Jordan, presenting over 40 videos and incorporating a wide variety of entertaining and realistic scenarios a free companion website (www.routledge.com/cw/younes) offering a wealth of additional instructor and student resources, including a teacher's guide, an introduction to the letters and sounds of Arabic (with audiovisual aid and writing demonstrations), audio recordings of songs and listening passages, video clips, sample tests, an answer key and language games clear explanations of grammatical structures and concepts as they occur in the reading and listening materials to encourage progressive learning and active interaction with the text a user-friendly and vibrant full colour text design, richly illustrated throughout with over 200 illustrations and photographs songs with simple lyrics tied to the themes of the course to help advance vocabulary acquisition and understanding of basic grammatical structures. Written by a dynamic author team and tested over a number of years at Cornell University, 'Arabiyyat al-Naas (Part One) will be an essential resource for students beginning to learn Arabic. While primarily designed for classroom use, the accessibility of the course and website also renders it highly suitable for independent study. The materials are designed to bring students from the novice low level to the intermediate low level on the ACTFL scale (American Council on the Teaching of Foreign Languages), and from A1 to A2/B1 on the CEFR scale (Common European Framework Reference). This volume is the first in an exciting three-part series of Arabic textbooks which together provide a complete three-year undergraduate language program.

I'm the first Mage born in 200 years. I've turned a city into an island, erected a barrier around an entire country, and awakened a war hero from a 200 year old slumber. Prophecies have marked my coming. Kings and nations have begged for my aid in times of peril. I hold the power to create and destroy nations. My name is Rhebengarthen. To my friends and family, I'm just Garth. The world knows me as the Advent Mage. And despite the rumors that you might have heard about me, this is what really happened.

This is indeed an incredible endeavor. For sure the most comprehensive collection of rebel workers' songs and poems ever compiled in English. It includes ALL the songs that appeared in the IWW's celebrated "little red songbook" from 1909 through 1973, plus dozens of others that never made it into the songbook. Here are the songs of Joe Hill, T-Bone slim, Dick Brazier, Ralph Chaplin, Covington Hall and other Wobbly legends; lesser knowns, but ought to be legends such as Eugene Barnett, Paul Walker, and Henry Pfaff; for the first time anywhere, a good selection of songs by women Wobblies: Anges Thecla Fair, Laura Payne Emerson, Sophie Fagin, Jane Street, Laura Tanne and others; songwriters from other continents, including Australians Bill Casey and Harry Hooton, the Englishman Leon Rosselson, Germans Ernest Riebe and John Olday, and the Scotsman Douglas Robson. A special section focuses on variants and parodies of IWW songs: a Depression-era version of "Hallelujah I'm a Bum," Jack Langan's 1960s version of "Solidarity Forever," an Earth First! adaptation of Joe Hill's "There is Power" by Walkin' Jim Stoltz, and Hazel Dickens' bold update of "The Rebel Girl." Best of all, perhaps is the wealth of essays, analysis, references, bibliographies, and discographies, provided by Archie Green, his coeditors, and other collaborators, providing not only historical/biographical context, but also a wide range of perspectives on the Wobbly counterculture and its enduring legacies. And there's an afterword by Utah Phillips!

This is an invaluable companion for any professional needing to know about restorative justice.

Ask Dr. Mueller captures the glamour and grittiness of Cookie Mueller's life and times. Here are previously unpublished stories – wacky as they are enlightening – along with favorites from Walking Through Clear Water in a Pool Painted Black and other publications. Also the best of Cookie's art columns from Details magazine, and the funniest of her advice columns from the East Village Eye, on everything from homeopathic medicine to how to cut your cocaine with a healthy substance. This collection is as much an autobiography as it is a map of downtown New York in the early '80s – that moment before Bright Lights, Big City, before the art world exploded, before New York changed into a yuppie metropolis, while it still had a glimmer of bohemian life.

The Globus Toolkit is a key technology in Grid Computing, the exciting new computing paradigm that allows users to share processing power, data, storage, and other computing resources across institutional and geographic boundaries. Globus Toolkit 4: Programming Java Services provides an introduction to the latest version of this widely acclaimed toolkit. Based on the popular web-based The Globus Toolkit 4 Programmer's Tutorial, this book far surpasses that document, providing greater detail, quick reference appendices, and many additional examples. If you're making the leap into

Grid Computing using the Globus Toolkit, you'll want Globus Toolkit 4: Programming Java Services at your side as you take your first steps. Written for newcomers to Globus Toolkit, but filled with useful information for experienced users. Clearly situates Globus application development within the context of Web Services and evolving Grid standards. Provides detailed coverage of Web Services programming with the Globus Toolkit's Java WS Core component. Covers basic aspects of developing secure services using the Grid Security Infrastructure (GSI). Uses simple, didactic examples throughout the book, but also includes a more elaborate example, the FileBuy application, that showcases common design patterns found in Globus applications. Concludes with useful reference appendices.

She's on the sheriff's most wanted list. Waking up with a naked woman holding a knife at his throat is just about the last thing Sheriff Travis Flynn expected. And the brother she's looking for? A murderer. And dead. Probably. But the real shock comes when she insists she's not a Lycan. LeAnn Wilcox isn't looking for love...especially not from some wolf in sheriff's clothing. She operates on the other side of the law. Once she finds her brother-alive-she'll get out of the pack's territory and go back to her regular, normal, non-furry life of changing jobs and her name whenever her past closes in. The cool, logical Sheriff has finally met his match, but LeAnn's life is at stake if she won't claim her place in the pack, especially once his control over the pack is challenged and her brother's fate is questioned.

Since the first edition was published in 1983, this highly-regarded introductory textbook has been used by many generations of students worldwide. It is specifically tailored to the requirements of first or second year geology undergraduates. The third edition has been extensively revised and updated to include many new sections and over 50 new or redrawn illustrations. There are now over 220 illustrations, many incorporating a second colour to highlight essential features. The format has been changed to enhance the visual attractiveness of the book. The tripartite organization of the first and second editions has been modified by combining the purely descriptive or factual aspects of fault and fold structure in the earlier chapters with a simple treatment of mechanisms, leaving the more geometrically complex treatment until after the relevant sections on stress and strain, as before. Some subjects are introduced for the first time, e.g. inversion and orogen collapse, and others have been extensively modified, e.g. the chapter on gravity controlled structures now emphasises modern work on salt tectonics. The last third of the book is devoted to the wider context of geological structures and how they relate to plate tectonics. The final two chapters have been considerably expanded and give examples of various types of geological structures in their plate tectonic settings in both modern and ancient orogenic belts.

NAMED A BEST BOOK OF THE YEAR BY BOOKPAGE AND LIBRARY JOURNAL The Crimson Petal and the White meets Fight Club: A page-turning novel set in the world of female pugilists and their patrons in late eighteenth-century England. Moving from a filthy brothel to a fine manor house, from the world of street fighters to the world of champions, The Fair Fight is a vivid, propulsive historical novel announcing the arrival of a dynamic new talent. Born in a brothel, Ruth doesn't expect much for herself beyond abuse. While her sister's beauty affords a certain degree of comfort, Ruth's harsh looks set her on a path of drudgery. That is until she meets pugilist patron George Dryer and discovers her true calling—fighting bare knuckles in the prize rings of Bristol. Manor-born Charlotte has a different cross to bear. Scarred by smallpox, stifled by her social and romantic options, and trapped in twisted power games with her wastrel brother, she is desperate for an escape. After a disastrous, life-changing fight sidelines Ruth, the two women meet, and it alters the perspectives of both of them. When Charlotte presents Ruth with an extraordinary proposition, Ruth pushes dainty Charlotte to enter the ring herself and learn the power of her own strength. A gripping, page-turning story about people struggling to transcend the circumstances into which they were born and fighting for their own places in society, The Fair Fight is a raucous, intoxicating tale of courage, reinvention, and fighting one's way to the top.

The Only Guide to Alternative Investments You'll Ever Need

The rewards of carefully chosen alternative investments can be great. But many investors don't know enough about unfamiliar investments to make wise choices. For that reason, financial advisers Larry Swedroe and Jared Kizer designed this book to bring investors up to speed on the twenty most popular alternative investments: Real estate, Inflation-

protected securities, Commodities, International equities, Fixed annuities, Stable-value funds, High-yield (junk) bonds, Private equity (venture capital), Covered calls, Socially responsible mutual funds, Precious metals equities, Preferred stocks, Convertible bonds, Emerging market bonds, Hedge funds, Leveraged buyouts, Variable annuities, Equity-indexed annuities, Structured investment products, Leveraged funds The authors describe how the investments work, the pros and cons of each, which to consider, which to avoid, and how to get started. Swedroe and Kizer evaluate each investment in terms of: Expected returns Volatility Distribution of returns Diversification potential Fees Trading and operating expenses Liquidity Tax efficiency Account location Role in an asset-allocation program Any investor who is considering or just curious about investment opportunities outside the traditional world of stocks, bonds, and bank certificates of deposit would be well-advised to read this book.

Why is fashion "in fashion" in museums today? This timely volume brings together expert scholars and curators to examine the reasons behind fashion's popularity in the twenty-first century museum and the impact this has had on wider museum practice. Chapters explore the role of fashion in the museum across a range of international case studies including the Costume Institute at the Metropolitan Museum of Art in New York, The Fashion Museum at Bath, ModeMuseum in Antwerp and many more. Contributions look at topics such as how fashion has made museums accessible to diverse audiences and how curators present broader themes and issues such as gender, class and technology innovatively through exhibiting fashion. Drawing on approaches from dress history, fashion studies, museum studies and curatorship, this engaging book will be key reading for students and scholars across a range of disciplines.

From #1 New York Times bestselling author Lauren Blakely comes the final book in the sexy, emotional and deliciously addictive No Regrets trilogy... It started as one night. It turned into a friendship. Then Harley became my everything. She owns me, heart, mind and body. And for a few brief days, our future seems bright and certain. Until, the past wraps its arms around us in so many terrible ways. Someone I never expected to see again reappears in my life. Trying to keep us apart. I'll do anything for her, but the question is – will anything even be enough? Every Second With You is the final novel in the No Regrets Trilogy and should be enjoyed following The Thrill of It.

Build your own intelligent agent system... Intelligent agent technology is a tool of modern computer science that can be used to engineer complex computer programmes that behave rationally in dynamic and changing environments. Applications range from small programmes that intelligently search the Web buying and selling goods via electronic commerce, to autonomous space probes. This powerful technology is not widely used, however, as developing intelligent agent software requires high levels of training and skill. The authors of this book have developed and tested a methodology and tools for developing intelligent agent systems. With this methodology (Prometheus) developers can start agent-oriented designs and implementations easily from scratch saving valuable time and resources. Developing Intelligent Agent Systems not only answers the questions "what are agents?" and "why are they useful?" but also the crucial question: "how do I design and build intelligent agent systems?" The book covers everything a practitioner needs to know to begin to effectively use this technology - including an introduction to the notion of agents, a description of the concepts involved, and a software engineering methodology. Read on for: a practical step-by-step introduction to designing and building intelligent agent systems. a full life-cycle methodology for developing intelligent agent systems covering specification, analysis, design and implementation of agents. PDT: Prometheus Design Tool – software support for the Prometheus design process. the example of an electronic bookstore to illustrate the design process throughout the book. Electronic resources including the Prometheus Design Tool (PDT), can be found at: <http://www.cs.rmit.edu.au/agents/prometheus> This book is aimed at industrial software developers, software engineers and at advanced undergraduate students. It assumes knowledge of basic software engineering but does not require knowledge of Artificial Intelligence or of mathematics. Familiarity with Java will help in reading the examples in chapter 10.

In this volume, a distinguished set of international scholars examine the nature of collaboration between life partners in the sciences, with particular attention to the ways in which personal and professional dynamics can foster or inhibit scientific practice. Breaking from traditional gender analyses which focus on divisions of labor and the assignment of credit, the studies scrutinize collaboration as a variable process between partners living in the nineteenth and twentieth centuries who were married and divorced, heterosexual and homosexual, aristocratic and working-class and politically right and left. The contributors analyze cases shaped by their particular geographical locations, ranging from retreat settings like the English countryside and Woods Hole, Massachusetts, to university laboratories and urban centers in Berlin, Stockholm, Geneva and London. The volume demonstrates how the terms and meanings of collaboration, variably shaped by disciplinary imperatives, cultural mores, and the agency of the collaborators themselves, illuminate critical intellectual and institutional developments in the modern sciences.

The Fifth Edition of *A History of the Roman People* continues to provide a comprehensive analytical survey of Roman history from its prehistoric roots in Italy and the wider Mediterranean world to the dissolution of the Roman Empire in Late Antiquity in A.D. 600. Clearly organized and highly readable, the text's narrative of major political and military events provides a chronological and conceptual framework for the social, economic, and cultural developments of the periods covered. Major topics are treated separately so that students can easily grasp key concepts and ideas.

In *Mordin On Time*, Nick Mordin sets out his method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse? He was timing the sections of races with a stop watch, estimating wind strength and direction, adjusting for movements of running rails, using projected times and calculating average times years before the best-selling American books on speed rating were published. This new edition incorporates much new material, including standard times for all Irish racecourses (plus the major French ones). *Mordin On Time* enables the reader to construct their own speed ratings wherever they live.
