Youth, Amy Best has assembled an important group of essays that address these concerns head on, providing scholars with thoughtful and often practical answers to their many methodological concerns. These original essays range from how to conduct research on youth in ways that can be empowering for them, to issues of writing and representation, to respecting boundaries and to dealing with issues of risk and responsibility to those interviewed. Contributors include: Amy L. Best, Sari Knopp Biklen, Elizabeth Chin, Susan Driver, Marc Flacks, Kathryn Gold Hadley, Madeline Leonard, C.J. Pascoe, Rebecca Raby, Alyssa Richman, Jessica Taft, Michael

Ungar, Yvonne Vissing, and Stephani Etheridge Woodson. The material in this book was prepared for electrical training courses. It is a practical manual that enables even the beginner to grasp the various topics quickly and thoroughly. The book is one of a kind in that it teaches the concepts of basic electricity in a way that's clear, to-the-point, and very easy to understand. It forms an excellent foundation for those who wish to proceed from the basics to more advanced topics. Numerous illustrations are included to simplify learning both theories and their applications. Direct-current and alternating-current devices and circuits are explained in detail.

get tangled in a ball of wool, she's always the first person you call to help you sort your cross stitch from your cable. While recruiting for her fledgling online knitwear company, Katie Mowat swiftly realised that it was mainly older women, namely grannies, who were volunteering their services, and so Grannies Inc. was born. Since 2009 they have gone from strength to strength, and from one product (beanies), they now design and produce a whole range of knitwear. Her crack squad of 15 grannies will be contributing their 'purls' of wisdom and patterns to help the new knitting generation in this attractive book. With knitting patterns for snoods, legwarmers, slouch socks, laptop cases and

The precise shape of a protein is a crucial factor in its function. How do proteins become folded into the right conformation? Molecular chaperones and protein folding catalysts bind to developing polypeptides in the cytoplasm and ensure correct folding and transport. This Guidebook catalogues the latest information on nearly 200 of these molecules, including the important class of heat shock proteins; each entry is written by leading researchers in the field.
