## ***The Essential Guide for Writers, Editors, and Publishers***

This book examines the crucial issues affecting Human Rights Education in contexts of culture, religious and societal diversity. It exhibits an impressive scholarly achievement, capturing and combining the insights of both established academics and emerging researchers. Each author succeeds in distilling the knowledge of their particular fields of interest, as well as conveying the essence of their intuitive understanding and the richness of the context. This book considers a variety of connected content and methodological issues in three major sections: 'Philosophical and policy perspectives', 'Gender discourses: diverse perspectives' and 'Discourses on narratives as safe spaces'. The Edition is further strengthened by allowing international reviewers the opportunity of

engaging with the contributors in the Introduction and Conclusion, an innovative departure from conventional formats and which will provide a global perspective to the readers. The focus of the various chapters succeeds in establishing both a foundation and platform for dialogue surrounding human rights and human rights education in modern policy and governance. Aptly named “Safe Spaces”, the Edition offers in-depth and credible (“safe”) nuances (“spaces”), in terms of the somewhat reified concept of human rights, at a time when human rights remains a highly topical and contested international issue. As such, the book imparts an immense scope of theoretical and empirical perspectives, reflected by the distinguished intellectuals who navigate the terrain of their respective disciplines with profound erudition. This book represents a collaborative effort of immeasurable value. This exemplary

edition is both timeous, and will prove timeless.

There are 13 ancient history books that are mentioned and recommended by the Bible. The Ancient Book of Jasher is the only one of the 13 that still exists. It is referenced in Joshua 10:13; 2 Samuel 1:18; and 2 Timothy 3:8. This volume contains the entire 91 chapters plus a detailed analysis of the supposed discrepancies, cross-referenced historical accounts, and detailed charts for ease of use. As with any history book there are typographical errors in the text but with three consecutive timelines running through the histories it is very easy to arrive at the exact dates of recorded events. It is not surprising that this ancient document confirms the Scripture and the chronology given in the Hebrew version of the Old Testament, once and for all settling the chronology differences between the Hebrew Old Testament and the Greek Septuagint. Chaka is a genuine masterpiece that represents one of the earliest major contributions of black Africa to the corpus of modern world literature. Mofolos fictionalized life-story account of Chaka (Shaka), translated from Sesotho by D. P. Kunene, begins with the future Zulu kings birth followed by the unwarranted taunts and abuse he receives during childhood and adolescence. The author manipulates events leading to Chakas status of great Zulu warrior, conqueror, and king to emphasize classic tragedys psychological themes of ambition and power, cruelty, and ultimate ruin. Mofolos clever nods to the supernatural add symbolic value. Kunenes fine translation renders the dramatic and tragic tensions in Mofolos tale palpable as the richness of the authors own culture is revealed. A

Although health literacy is commonly defined as an individual trait, it does not depend on the skills of individuals alone. Health literacy is the product of the interaction between individuals' capacities and the health literacy-related demands and complexities of the health care system. Specifically, the ability to understand, evaluate, and use numbers is important to

Health Literacy and Numeracy is the summary of a workshop convened by The Institute of Medicine Roundtable on Health Literacy in July 2013 to discuss topics related to numeracy, including the effects of ill health on cognitive capacity, issues with communication of health information to the public, and communicating numeric information for decision making. This report includes a paper commissioned by the Roundtable, "Numeracy and the Affordable Care Act: Opportunities and Challenges," that discusses research findings about people's numeracy skill levels; the kinds of numeracy skills that are needed to select a health
