An electrifying novel about illness, displacement, and what holds us together, by the author of *Seeing Red* Ella is an astrophysicist struggling with her doctoral thesis in the “country of the present” but she is from the “country of the past,” a place burdened

in her memory by both personal and political tragedies. Her partner, El, is a forensic scientist who analyzes the bones of victims of state violence and is recovering from an explosion at a work site that almost killed him. Consumed by writer's block, Ella finds herself wishing that she would become ill, which would provide time for writing and perhaps an excuse for her lack of progress. Then she begins to experience mysterious symptoms that doctors find undiagnosable. As Ella's anxiety grows, the past begins to exert a strong gravitational pull, and other members of her family come into focus: the widowed Father, the Stepmother, the Twins, and the Firstborn. Each of them has their own experience of illness and violence, and eventually the systems

that both hold them together and atomize them are exposed. Lina Meruane's *Nervous System* is an extraordinary clinical biography of a family, full of affection and resentment, dark humor and buried secrets, in which illness describes the traumas that can be visited not just upon the body, but on families and on the history of the countries—present and past—that we live in.

Truth of the Divine is the latest alternate-history first-contact novel in the *Noumena* series from the instant *New York Times*, *Wall Street Journal* and *Los Angeles Times* bestselling author Lindsay Ellis. The human race is at a crossroads; we know that we are not alone, but details about the alien presence on Earth are still being

withheld from the public. As the political climate grows more unstable, the world is forced to consider the ramifications of granting human rights to nonhuman persons. How do you define “person” in the first place? Cora Sabino not only serves as the full-time communication intermediary between the alien entity Ampersand and his government chaperones but also shares a mysterious bond with him that is both painful and intimate in ways neither of them could have anticipated. Despite this, Ampersand is still keen on keeping secrets, even from Cora, which backfires on them both when investigative journalist Kaveh Mazandarani, a close colleague of Cora’s unscrupulous estranged father, witnesses far more of Ampersand’s

machinations than anyone was meant to see. Since Cora has no choice but to trust Kaveh, the two must work together to prove to a fearful world that intelligent, conscious beings should be considered persons, no matter how horrifying, powerful, or malicious they may seem. Making this case is hard enough when the public doesn't know what it's dealing with—and it will only become harder when a mysterious flash illuminates the sky, marking the arrival of an agent of chaos that will light an already-unstable world on fire. With a voice completely her own and more than a million YouTube subscribers, Lindsay Ellis deepens her realistic exploration of the reality of a planet faced with the presence of extraterrestrial intelligence, probing the

essential questions of humanity and decency, and the boundaries of the human mind. While asking the question of what constitutes a “person,” Ellis also examines what makes a monster.

And we lack a conscientiously developed appreciation of what it means to us. In other words, as Harry Frankfurt writes, "we have no theory." Frankfurt, one of the world's most influential moral philosophers, attempts to build such a

theory here. With his characteristic combination of philosophical acuity, psychological insight, and wry humor, Frankfurt proceeds by exploring how bullshit and the related concept of humbug are distinct from lying. He argues that bullshitters misrepresent themselves to their audience not as liars do, that is, by deliberately making false claims about what is true. In fact, bullshit need not be

untrue at all. Rather, bullshitters seek to convey a certain impression of themselves without being concerned about whether anything at all is true. They quietly change the rules governing their end of the conversation so that claims about truth and falsity are irrelevant. Frankfurt concludes that although bullshit can take many innocent forms, excessive indulgence in it can eventually undermine the practitioner's capacity

to tell the truth in a way that lying does not. Liars at least acknowledge that it matters what is true. By virtue of this, Frankfurt writes, bullshit is a greater enemy of the truth than lies are.

Truth, But I'm Lying, Basseyy Ikpi breaks open our understanding of mental health by giving us intimate access to her own. Exploring shame, confusion, medication, and family in the process, Basseyy looks at how mental health impacts every aspect of our lives—how we appear to others, and more importantly to ourselves—and challenges our preconception about what it means to be "normal." Viscerally raw and honest, the result is an exploration of the stories we tell ourselves to make sense of who we are—and the ways, as honest as we try to be, each of these stories can also be a lie.

A heartbreaking and hilarious memoir by iCarly and Sam & Cat star Jennette McCurdy about her struggles as a former child actor—including eating disorders, addiction, and a complicated relationship with her overbearing mother—and how she retook control of her life. Jennette McCurdy was six years old when she had her first acting audition. Her mother's dream was for her only daughter to become a star, and Jennette would do anything to make her mother happy. So she went along with what Mom called "calorie restriction,"

In *I'm Glad My Mom Died*, Jennette recounts all this in unflinching detail—just as she chronicles what happens when the dream finally comes true. Cast in a new Nickelodeon series called *iCarly*, she is thrust into fame. Though Mom is ecstatic, emailing fan club moderators and getting on a first-name basis with the

Finally, after discovering therapy and quitting acting, Jennette embarks on recovery and decides for the first time in her life what she really wants. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. by restlessness and chronic unemployment, what will happen to American society? In *The War on Normal People*, Andrew Yang paints a dire portrait of the American economy. Rapidly advancing technologies like artificial intelligence, robotics and automation software are making millions of Americans' livelihoods irrelevant. The consequences of these trends are already being felt across our communities in the form of political unrest, drug use, and other social ills. The future looks dire-but is it unavoidable? In *The War on Normal People*, Yang imagines

a different future--one in which having a job is distinct from the capacity to prosper and seek fulfillment. At this vision's core is Universal Basic Income, the concept of providing all citizens with a guaranteed income--and one that is rapidly gaining popularity among forward-thinking politicians and economists. Yang proposes that UBI is an essential step toward a new, more durable kind of economy, one he calls "human capitalism."
