Apologetics is for everyone. The Bible is clear that all believers are called to defend their faith. However, if apologetics is the formal process that we have come to expect, this sounds like an impossible task. But what if apologetics could be part of natural, normal conversation—both from the pulpit and in everyday life? Aimed at preparing you to clearly and confidently defend your faith, Expository Apologetics sets forth an approach to apologetics that is rooted in Scripture and eminently accessible. Filled with real-world examples and practical advice, this book will equip you with the tools you need to think biblically and converse persuasively—offering unbelievers “ a reason for the hope that is in you. ”

It started with a mother's love... Fleeing from a forest fire, a mother bear urges her two cubs into the watery shelter of a vast body of water. Though it will be difficult, she knows if they can swim across to the opposite shore, they will be safe. With calls of encouragement and steadfast love, Mother Bear guides her cubs across the great lake, Lake Michigan. And the story of what happens once Mother Bear reaches the far shore becomes the legend behind the natural wonder known as Sleeping Bear Dune. In 1998 writer Kathy-jo Wargin and nature artist Gijsbert van Frankenhuyzen combined their talents to bring The Legend of Sleeping Bear to life. Published to wide acclaim, the book was soon named the Official Children's Book of Michigan.

A History

Global Values 101 grew out of one of the most popular courses ever offered at Harvard University, in which some of the most original thinkers of our day sat down with students and explored how ideas have made them-and can make us-more engaged, involved, and compassionate citizens. In these engrossing, essay-length interviews, which address the topics of war, religion, the global economy, and social change, Amy Goodman, host of the popular radio program Democracy Now, speaks about the role of the independent media as gatekeeper and witness; Lani Guinier, author of Tyranny of the Majority, reveals that students' SAT scores more accurately describe the kind of car their parents drive than the grades they will earn in college and shows the way to a more equitable college admissions system; Howard Zinn, author of A People's History of the United States, explores the American Dream and exposes the myth of the "good war"; economist Juliet Schor, author of Born to Buy and The Overspent American, explains why Americans are willing to sacrifice quality of life to attain financial success; former "mall rat" Naomi Klein, author of No Logo: Taking Aim at the Brand Bullies, urges readers to go global while fighting global conglomerates; and Katha Pollitt, author of Reasonable Creatures: Essays on Women and Feminism, employs her incisive wit to explore what it really means to be a feminist in the Twenty First century. For anyone who has been moved by idealism and longed to become a more proactive citizen, this collection offers a range of stories on how progressive ethics can inform, inspire, and ultimately transform lives.

Anthropologist Sandya Hewamanne spent several months in a Sri Lankan free trade zone (FTZ) working and living among the workers to learn about their lives. "They were poor women from rural areas," Hewamanne writes, "who migrated to do garment work in transnational factories of a global assembly line. Their difficult work routines and sad living conditions have been examined in detail. When I was with them I often wondered whether anyone noticed the smiles, winks, smirks, gestures, tones of voice, the movies they saw, or the songs they sang." Hewamanne deftly weaves theories of identity, globalization, and cultural politics throughout her detailed accounts of the workers' efforts to negotiate ever shifting roles and expectations of gender, class, and sexuality. By analyzing how these workers claim political subjectivity, Hewamanne's *Stitching Identities in a Free Trade Zone* challenges conventional notions about women at the bottom of the global economy. The book offers a fascinating journey through the vibrant subaltern universe of Sri Lankan female migrant workers, from the FTZ factory shop floor to boarding houses, from urban movie theaters to temples and beaches and back to their native rural villages. *Stitching Identities in a Free Trade Zone* captures the spirit with which women confront power and violence through everyday poetics and politics, exploring how female workers construct themselves as different while investigating this difference as the space where deep anxieties and ambivalences over notions of nation, modernity, and globalization get played out.

Answering Objections with the Power of the Word

To protect their ancient churches from desecrating marauders on horseback, worshipers in the Holy Land centuries ago sealed off most of their doors to keep the invaders outside their sacred halls, thus the term “narrow gate churches” began to be used to describe the Christian worship centers in the Holy Land. This history of how Christians have kept the faith for two millennia under stressful conditions is a tribute to the courage and steadfastness of a remnant community which has miraculously survived under hostile regimes and straightened conditions

Sri Lanka in the Modern Age recounts the modern history of the island in an accessible yet unconventional manner. Where other histories have tended to focus on the state's failure to accommodate the needs and demands of minority communities, Wickramasinghe places their claims alongside the political, social and economic demands of other communities, parties, associations and groups, tracing their lineages to the colonial period. This updated second edition carries the book into the present, covering the brutal end of Sri Lanka's civil war and the making of oppressive stability that has grown in its wake. Drawing on recent work as well as on her own research in the field, Wickramasinghe has written above all a history of the

people of Sri Lanka rather than a history of the nation-state.

The book discusses simple trusses, simple stress and strain, temperature, bending, and shear stresses, as well as thin-walled pressure vessels and thin rotating cylinders. The text also describes other stress and strain contributors such as torsion of circular shafts, close-coiled helical springs, shear force and bending moment, strain energy due to direct stresses, and second moment of area. Testing of materials by tests of tension, compression, shear, cold bend, hardness, impact, and stress concentration and fatigue is also tackled. Students taking courses in strength of materials and engineering and civil engineers will find the book invaluable.
