This bulletin is the first in a series of summaries of research conducted in reading from 1955 to 1960. The publication includes both published and unpublished research during the 5-year period. The published research has been compiled largely from studies reported in educational periodicals. The unpublished research was made available through a survey conducted under the auspices of the U.S. Office of Education, with the cooperation of colleges, universities, and public school systems, which furnished information on studies undertaken in the various educational institutions. Chapter I, Summary of Research in the Teaching of Primary Reading, provides an overview of the studies reported in this bulletin: (1) Reading Readiness; (2) Age of Beginning Reading; (3) Methods of Teaching Reading; (4) Grouping for Reading Instruction; (5) Reading Achievement; (6) Reading Programs; (7) Reading Interests; (8) Reading Materials; (9) Comprehension; (10) Vocabulary; (11) Word Recognition; (12) Reading and Language Arts; (13) Reading and Intelligence; (14) Auditory Factors; (15) Reading and Physical Growth; (16) Reversals; (17) Kindergarten Attendance; (18) Language; and (19) Causes of Reading Difficulties. "The C Workbook takes an informal, workbook-style approach to teaching the C programming language. The workbook is designed as a self-guided study of C, including most of its nuances. Rather than provide voluminous detail on each and every topic, the workbook presents on a 'need to know' basis. Motivating the need for a language feature prior to presenting it makes it easy for the reader to grasp the concept quickly and progress toward proficiency in the language. The informal style of presentation makes for easy reading. The workbook uses numerous, simple, well-thought-out, and classroom-tested examples to show the language's features and highlight its intricacies. A carefully designed 'Common problems' section at the end of each chapter provides a safety net to catch and correct mistakes student often make in learning C"--Back cover.
