This book stems from the CyberBRICS project, which is the first major attempt to produce a comparative analysis of Internet regulations in the BRICS countries – namely, Brazil, Russia, India, China, and South Africa. The project has three main objectives:

1) to map existing regulations; 2) to identify best practices; and 3) to develop policy recommendations in the various areas that compose cybersecurity governance, with a particular focus on the strategies adopted by the BRICS countries to date. Each study covers five essential

relic of Jeffersonian dreams of an agrarian society. And governments, motivated by a confused mix of populist and free market ideology, in fact go out of their way to promote small business. Every modern

president has sung the praises of small business, and every modern president, according to Atkinson and Lind, has been wrong. Pointing to the advantages of scale for job creation, productivity,

innovation, and virtually all other economic benefits, Atkinson and Lind argue for a “size neutral” policy approach both in the United States and around the world that would encourage growth rather than

enshrine an anachronism. If we overthrow the “small is beautiful” ideology, we will be able to recognize large firms as the engines of progress and prosperity that they are. Cybersecurity Regulations in
