This clinically focused book explores W. R. Bion's thinking on primitive and unrepresented mental states and shows how therapists can work effectively with traumatized patients who are difficult to reach. The author illuminates how trauma survivors suffer from direct access to primal undifferentiated positions of the psyche that lie outside the symbolic order of the mind and are resistant to treatment. This

access, unmediated by symbolic representation but represented in the body, disrupts the normal trajectory of development and of relationship. Integrating theory and clinical application, the book addresses processes of symbolization, somatic receptivity, and the use of countertransference when working therapeutically with undeveloped areas of the mind. It also demonstrates how primitive body relations and object relations include the body of the analyst as part of the analytic frame and are essential in establishing a therapeutic alliance. Illustrated with

detailed clinical vignettes, Bion and Primitive Mental States is important reading for psychoanalysts, psychologists, social workers, and educators who wish to understand primitive states of mind and body in patients who have previously been considered untreatable. The subject of Convergence is the creative, social, political and pedagogical issues raised by the advent of new media technologies. Loud, drunk and obnoxious. That's just Bob Benkinsog's horse. filled receptacles to his mouth. But, even in the bizarre world of the Benkinsog family, a drunken horse calls for professional intervention. Enter a narcissistic vet called Adonis Longwilly. With some characters taking over the narration at various points and others behaving as if they wish they were in a much better novel, this is a comically surreal story of lust, greed, corruption and gratuitous use of foul language. WARNING. If you are offended by graphic descriptions of things that you might find offensive, this book contains them. But you should read it anyway.

rapid dispersal and efficient movement across country where no roads exist, and many current civilian engineering tasks require movement of men and materials long distances over roadless terrain. Oversnow transport is a particular aspect of the general problem of cross-country mobility, but the characteristics of snow-covered regions are such that special techniques and equipment are required for efficient operation. In order to fully understand the action of vehicles in snow and to formulate sound design criteria, it is necessary to develop a theory which permits quantitative analysis of trafficability problems. For

practical purposes, vehicle evaluation is at present made from the results of relatively simple field tests which give drawbar pull as their main indicator. The best practical evaluations are made by observing the operational capabilities of vehicles in various types of snow.

Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.

makes sense to pray and do the next right thing. As life moves at ninety miles an hour, moving with the flow can set you up to make split-second decisions. Taking what we think is the easy way is often the hardest of all. We are told in 1 Peter 5:7 to cast all our cares on Him because He cares for us. Taking the Jesus way out is always the best way. It may not be the easy that we are looking for, but it will not leave the collateral damage that our way leaves behind. The roads that we walk down in life are covered with attractive billboards drawing us to off-ramps that will lead us to destruction. It is so important to keep our eyes fixed on Jesus Christ as we walk life's highways and byways so we are not lured into the craziness that the world has to
