"We need to refocus on leadership as a value important to our American republic. The book is a small effort in restarting the dialogue to stimulate the effort to produce more and better leadership on the ice and off.

Helps riders of all levels and riding styles, including downhill, slalom, and halfpipe, on snowboarding techniques and tricks, and offers advice on selecting or building the best board for individual riding styles and abilities.

Though kites have been around for centuries, only recently have they been used for surfing and snowboarding, creating the exhilarating new sports of kiteboarding and snowkiting. Kiteboarders experiment with new tricks and can even display their talent at internationally sanctioned competitions. Along with that thrill, however, there is an element of danger. Participants need to take the appropriate safety measures, such as using proper equipment and checking weather conditions. When approached and handled correctly, kiteboarding and snowkiting are activities that can be enjoyed to the extreme.

A wine book unlike any other, **THE FOOD LOVER'S GUIDE TO WINE** offers a fresh perspective via the single aspect of wine most compelling to food lovers: flavor. At the heart of this indispensable reference, formatted like the authors' two previous bestsellers *The Flavor Bible* and *What to Drink with What You Eat*, is an encyclopedic A-to-Z guide profiling hundreds of different wines by their essential characteristics—from body and intensity to distinguishing flavors, from suggested serving temperatures and ideal food pairings to recommended producers (including many iconic examples). The book provides illuminating insights from dozens of America's best sommeliers via informative sidebars, charts and boxes, which complement the book's gorgeous four-color photography. Another groundbreaking work from two of the ultimate culinary insiders, this instant classic is the perfect gift book.!--EndFragment--

The author of *Cyberia* explains how the media culture of today's youngsters is preparing them for the future and for a world in which surprise is constant and information pours

in rapidly from hundreds of sources. \$50,000 ad/promo. Tour. It is 1953 in Canvey Island. Len and Violet are at a dance. Violet's husband George sits and watches them sway and glide across the dance floor, his mind far away, trapped by a war that ended nearly ten years ago. Meanwhile, at home, a storm rages and Len's wife Lily and his young son Martin fight for their lives in the raging black torrent. The night ends in a tragedy that will reverberate through their lives. This poignant novel follows the family's fortunes from the austerity of the post-war years to Churchill's funeral, from Greenham Common to the onset of Thatcherism and beyond, eloquently capturing the very essence of a transforming England in the decades after the war. It is a triumph of understated emotion, a novel about growing up and growing old, about love, hope and reconciliation.

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. The process of user-centered innovation: how it can benefit both users and manufacturers and how its emergence will bring changes in business models and in public policy. Innovation is rapidly becoming democratized. Users, aided by improvements in computer and communications technology, increasingly can develop their own new products and services. These innovating users—both individuals and firms—often freely share their innovations with others, creating user-innovation communities and a rich intellectual commons. In Democratizing Innovation, Eric von Hippel looks closely at this emerging system of user-centered innovation. He explains why and when users find it profitable to develop new products and services for themselves, and why it often pays users to reveal their innovations freely for the use of all. The trend toward democratized

innovation can be seen in software and information products—most notably in the free and open-source software movement—but also in physical products. Von Hippel's many examples of user innovation in action range from surgical equipment to surfboards to software security features. He shows that product and service development is concentrated among "lead users," who are ahead on marketplace trends and whose innovations are often commercially attractive. Von Hippel argues that manufacturers should redesign their innovation processes and that they should systematically seek out innovations developed by users. He points to businesses—the custom semiconductor industry is one example—that have learned to assist user-innovators by providing them with toolkits for developing new products. User innovation has a positive impact on social welfare, and von Hippel proposes that government policies, including R&D subsidies and tax credits, should be realigned to eliminate biases against it. The goal of a democratized user-centered innovation system, says von Hippel, is well worth striving for. An electronic version of this book is available under a Creative Commons license.

The inside story of the deadly 2006 climbing season on Everest On May 15, 2006, a young British climber named David Sharp lay dying near the top of Mount Everest while forty other climbers walked past him on their way to the summit. A week later, Lincoln Hall, a seasoned Australian climber, was left for dead near the same spot. Hall's death was reported around the world, but the next day he was found alive after spending the night on the upper mountain with no food and no shelter. If David Sharp's death was shocking, it was hardly singular: despite unusually good weather, ten others died attempting to reach the summit that year. In this meticulous inquiry into what went wrong, Nick Heil tells the full story of the deadliest year on Everest since the infamous season of 1996. He introduces Russell Brice, the commercial operator who has done more than anyone to provide access to the summit via the mountain's north side—and who some believe was partly accountable for Sharp's death. As more climbers attempt the summit each year, Heil shows how increasingly risky expeditions and unscrupulous outfitters threaten to turn Everest into a deadly circus. Written by an experienced climber and outdoor writer, Dark Summit is both a riveting account of a notorious climbing season and a troubling investigation into whether the pursuit of the ultimate mountaineering prize has spiraled out of control.

The Responsible Company, by Yvon Chouinard, founder and owner of Patagonia, and Vincent Stanley, co-editor of its Footprint Chronicles, draw on the their 40 years' experience at Patagonia - and knowledge of current efforts by other companies - to articulate the elements of responsible business for our time. Patagonia, named by Fortune in 2007 as the coolest company on the planet, has earned a reputation as much for its ground-breaking environmental and social practices as for the quality of its clothes. In this exceptionally frank account, Chouinard and Stanley recount how the company and its culture gained the confidence, by step and misstep, to make its work progressively more responsible, and to ultimately share its discoveries with companies as large as Wal-Mart or as small as the corner bakery. In plain, compelling prose, the authors describe the current impact of manufacturing and commerce on the planet's natural systems and human communities, and how that impact now forces business to change its ways. The Responsible Company shows companies how to reduce the harm they cause, improve the quality of their business, and provide the kind of meaningful work everyone seeks. It concludes with specific, practical steps every business can undertake, as well as advice on what to do, in what order. This is the

first book to show companies how to thread their way through economic sea change and slow the drift toward ecological bankruptcy. Its advice is simple but powerful: reduce your environmental footprint (and its skyrocketing cost), make legitimate products that last, reclaim deep knowledge of your business and its supply chain to make the most of opportunities in the years to come, and earn the trust you'll need by treating your workers, customers and communities with respect.

******NPR Books We Love 2021 selection*** “If you’re only going to read one Everest book this decade, make it *The Third Pole*. . . . A riveting adventure.”—Outside Shivering, exhausted, gasping for oxygen, beyond doubt . . . A hundred-year mystery lured veteran climber Mark Synnott into an unlikely expedition up Mount Everest during the spring 2019 season that came to be known as “the Year Everest Broke.” What he found was a gripping human story of impassioned characters from around the globe and a mountain that will consume your soul—and your life—if you let it. The mystery? On June 8, 1924, George Mallory and Sandy Irvine set out to stand on the roof of the world, where no one had stood before. They were last seen eight hundred feet shy of Everest’s summit still “going strong”***

for the top. Could they have succeeded decades before Sir Edmund Hillary and Tenzing Norgay? Irvine is believed to have carried a Kodak camera with him to record their attempt, but it, along with his body, had never been found. Did the frozen film in that camera have a photograph of Mallory and Irvine on the summit before they disappeared into the clouds, never to be seen again? Kodak says the film might still be viable. . . . Mark Synnott made his own ascent up the infamous North Face along with his friend Renan Ozturk, a filmmaker using drones higher than any had previously flown. Readers witness first-hand how Synnott's quest led him from oxygen-deprivation training to archives and museums in England, to Kathmandu, the Tibetan high plateau, and up the North Face into a massive storm. The infamous traffic jams of climbers at the very summit immediately resulted in tragic deaths. Sherpas revolted. Chinese officials turned on Synnott's team. An Indian woman miraculously crawled her way to frostbitten survival. Synnott himself went off the safety rope—one slip and no one would have been able to save him—committed to solving the mystery. Eleven climbers died on Everest that season, all of them mesmerized by an irresistible magic. The Third Pole is a rapidly accelerating ride to the limitless

joy and horror of human obsession.

The classic American passion for the road meets the current obsession with internet consumption in one of the most original illustrated books to come along in years. One day, John Freyer decided to sell everything he owned on the internet. He invited his friends over to tag all the possessions in his apartment, and he systematically put them up for sale on eBay. An unopened box of taco shells, half a bottle of mouthwash, almost all of his clothes, his favorite records, his sideburns (in a plastic bag), his family's Christmas presents (not yet given), furniture: John didn't let sentiment or utility stand in his way. Soon his belongings were sold all over the world, with a bag of Porky's BBQ Pork Skins making its way to Japan, and a chair ending up in the Museum of Modern Art. With almost all the objects in his life now gone, he started the second phase of his journey: to go visit his one-time possessions in their new surroundings. All My Life for Sale is an extraordinary book that functions as an autobiography, a travel narrative, and a meditation on what the objects we surround ourselves with actually mean to us and what happens when we set them free. Designed by the author himself, it is visually striking, surprisingly

moving, and will change the way you look at the things that surround you.

With more and more people heading into the winter backcountry on skis, snowshoes, and snowmobiles, avalanche safety is of paramount importance. Allen & Mike's Really Cool Avalanche Safety Book distills the sometimes overly technical information of snow science into a user-friendly format with helpful illustrations and easy-to-understand text. With years of experience as NOLS instructors to draw on, Allen O'Bannon and Mike Clelland team up to give winter recreationists the information they need to stay safe in the backcountry, including how to prepare for your trip, proper equipment and how to use it, snowpack assessment, choosing safe travel routes, decision making, and rescue scenarios. Written for both aspiring winter backcountry travelers and experts alike, this book is a must-read for anybody who loves to experience the solitude and beauty of the snowy mountains.
