**This is the first book published with recipes, methodology and tips on how to make Melt and Pour Soap from Scratch. It is written from the perspective of a Cosmetic Formulator on the production of the popular cosmetic base known as, Melt and Pour Soap. Whether you are a crafter,**

## Online Library Soap Queen Business Handbook

hobbyist or business owner this book has everything that you need. This book give you guidance on how, as a small home based business, you can follow the regulations, labeling laws and industry standards for selling soap and cosmetics. My entire journey into the cosmetic industry started with Melt and Pour Soap shortly after I discovered aromatherapy. The roots of our business, Essential Wholesale, all started in December of 1998. Over the years we moved from our home kitchenette to a 600 square foot space, to a 2500 square foot building, to a 10,000 square foot

## Online Library Soap Queen Business Handbook

space in a bigger building, and from there we have expanded into 30,000 square feet of that same building. In 2011 our business will be moving to an even larger 58,000 square foot building. As our business expanded we began to focus on natural cosmetics and personal care products. However, I never lost my curiosity and fascination with Melt and Pour Soap. Our relationship with Melt and Pour Soap changed over the years. At first we sold retail customized Melt and Pour Soaps. We then bought and sold the company Critter Soaps. Later we sold thousands of pounds worth of wholesale Melt and

## Online Library Soap Queen Business Handbook

Pour Soap base and eventually discontinued selling Melt and Pour Soap because the price kept rising. At the time Melt and Pour Soap was the only cosmetic base we sold that we didn't manufacture ourselves. It simply didn't make sense to wholesale someone else's base when our business model had changed to selling only the bases we manufactured ourselves. It was at this point in our business that I decided it was time to formulate our own Melt and Pour Soap ourselves. It didn't take long to have working formulas, but at that moment we were using up every inch of space in our 30,000 square

## Online Library Soap Queen Business Handbook

foot building. We were bursting at the seams and couldn't accommodate the manufacturing and cooling of the Melt and Pour Soap Base in bulk. Our space was so tight we couldn't possibly cool an 8,000 lb batch of Melt and Pour Soap base into multiple 1 lb, 20 lb and 40 lb blocks to sell in bulk. But we got continued requests to manufacture and sell Melt and Pour Soap base. My solution is this book. I decided to share these basic recipes with you to give you the freedom to make your own Melt and Pour base in the quantities that work best for your business. These recipes will teach you the

## Online Library Soap Queen Business Handbook

foundational information that you need and give you tips on how to customize your base.

When making jump into making liquid soap, I would think that most of us have trouble with the process because it's a bit different from making soap! Boundaries cannot be pushed in liquid soap making as I would think for hot process soapmaking, but there are certain things and tricks that can help you make awesome liquid soap!

How to turn a pleasurable pastime into a booming business  
Do you have a special soap recipe that's proven to be effective with your children's skin sensitivities? Do your handmade soap gifts to your friends often get compliments and requests for more? If so, you might want to share your talents with a wider market and earn some extra income at the same time. With the popularity of clean and natural living in recent years, handmade bath products have become increasingly appealing for people who wish to stay away from harmful chemicals in commercially made goods. That popularity is also reflected in the rise of soap making classes. In fact, you may have even started honing your craft in one of these classes yourself. While most will just try it for fun, if you've got a knack for mixing oils and picking out scents, you

## Online Library Soap Queen Business Handbook

could be sitting on the perfect business opportunity! The global handmade soap industry is valued at \$150 million worldwide, and it is expected to grow even further. Getting even just a small share of this segment could be very lucrative. However, just because you're good at making soap doesn't mean you'll easily be raking in money. Starting and running a business requires more than a great product. You'll need to comply with government requirements, manage your finances, market and sell your soaps, and compete with other handmade soap makers. Don't ruin your chances of success -- take the time to get to know what it takes to start a successful business. In *Soap Making Business Startup 2021*, you will discover: How to customize existing recipes and formulate your own to make a product that's uniquely yours

Soap Crafting Step-by-Step Techniques  
for Making 31 Unique Cold-Process  
Soaps Storey Publishing

In this comprehensive guide, Susan Miller Cavitch covers everything you need to know to make your own soaps. Learn the basic techniques for crafting oil-, cream-, and vegetable-based

## Online Library Soap Queen Business Handbook

soaps, and then start experimenting with your own personalized scents and effects. Cavitch provides tips for making more than 40 different specialty soaps, showing you how to design colorful marbled bars and expertly blend ingredients to create custom fragrances. You'll soon be making luxurious soaps at a fraction of the cost of boutique products. Important Notice Early printings of this book contain a recipe variation in a sidebar

## Online Library Soap Queen Business Handbook

note on page 36. As a result of further testing, author Susan Miller Cavitch and Storey Publishing strongly recommend that you do not try this variation. Adding honey when you are combining the sodium hydroxide and water may result in a stronger reaction with more intense heat. The mixture may bubble up quickly and come out of the pot, posing a potential hazard.

Soaps are cleaning agents that are usually made by reacting alkali (e.g., sodium hydroxide) with naturally occurring fat or fatty acids. A soap is a salt of a compound known as a fatty acid. A soap molecule consists of a long hydrocarbon chain (composed of carbons and hydrogens) with a carboxylic acid group on one end which is ionic bonded to a metal ion, usually a sodium or potassium. The hydrocarbon end is nonpolar

and is soluble in nonpolar substances (such as fats and oils), and the ionic end (the salt of a carboxylic acid) is soluble in water. Soap is made by combining tallow (or other hard animal fat) or vegetable or fish oil with an alkaline solution. The two most important alkalis in use are caustic soda and caustic potash. A detergent is an effective cleaning product because it contains one or more surfactants. Because of their chemical makeup, the surfactants used in detergents can be engineered to perform well under a variety of conditions. Such surfactants

are less sensitive than soap to the hardness minerals in water and most will not form a film. Disinfectants are chemical agents applied to non-living objects in order to destroy bacteria, viruses, fungi, mold or mildews living on the objects. Disinfectants are chemical substances used to destroy viruses and microbes (germs), such as bacteria and fungi, as opposed to an antiseptic which can prevent the growth and reproduction of various microorganisms, but does not destroy them. The ideal disinfectant would offer complete sterilization, without
