This textbook explores the emergence of sociology as a distinct social science. Focusing on the evolution of social theories, movements and ideas through history, it analyses the dynamic relationship between the individual and the larger social forces around them. This volume examines the definitive aspects of societies, communities and social groups, and their intersections with culture, political and economic movements and religious institutions. It establishes the connections between sociology and other disciplines such as philosophy, history, political science, economics, psychology and anthropology to explore the interdependence between different realms of social life. The chapters in this book explain and highlight the significance of quantitative and qualitative methods of research in understanding the dynamics of social life. Drawing from the works of classical social theorists such as Auguste Comte, Herbert Spencer, Karl Marx, Emile Durkheim and Max Weber, this book traces the development of sociological perspectives and theories and their relevance in the history of ideas. Lucid and comprehensive, this textbook will be useful for undergraduate and postgraduate students of sociology, development studies, history of ideas, sociological thought, social theory, research methods, political science and anthropology. Placing an emphasis on global perspectives and current research, this wide praised and adopted sociology textbook introduces the reader to the field of sociology. & John Macionis, like many people, took a college course that shaped his life. style and emphasis on sociology's relevance to everyday life. Governments, Citizens, and Genocide A Comparative and Interdisciplinary Approach Alex Alvarez A comprehensive analysis demonstrating how whole societies come to support the practice of genocide. "Alex Alvarez has produced an exceptionally comprehensive and useful analysis of modern genocide... [It] is perhaps the most important interdisciplinary account to appear since Zygmunt Bauman's classic work, Modernity and the Holocaust." -- Stephen Feinstein, Director, Center for Holocaust and Genocide Studies "Alex Alvarez has written a first-rate propaedeutic on the running sore of genocide. The singular merit of the work is its capacity to integrate a diverse literature in a fair-minded way and to take account of genocides in the post-Holocaust environment ranging from Cambodia to Serbia. The work reveals patterns of authoritarian continuities of repression and rule across cultures that merit serious and widespread public concern." -- Irving Louis Horowitz, Rutgers University More people have been killed in 20th-century genocides than in all wars and revolutions in the same period. Recent events in countries such as Rwanda and the former Yugoslavia have drawn attention to the fact that genocide is a pressing contemporary problem, one that has involved the United States in varying negotiating and peace-keeping roles. Genocide is increasingly recognized as a threat to national and international security, as well as a source of tremendous human suffering and social devastation. Governments, Citizens, and Genocide views the crime of genocide through the lens of social science. It discusses the problem of defining genocide and then examines it from the levels of the state, the organization, and the individual. Alex Alvarez offers both a skillful synthesis of the existing literature on genocide and important new insights developed from the study of criminal behavior. He shows that governmental policies and

institutions in genocidal states are designed to suppress the moral inhibitions of ordinary individuals. By linking different levels of analysis, and comparing a variety of cases, the study provides a much more complex understanding of genocide than have prior studies. Based on lessons drawn from his analysis, Alvarez offers an important discussion of the ways in which genocide might be anticipated and prevented. Alex Alvarez is Associate Professor in the Department of Criminal Justice at Northern Arizona University. His primary research interests are minorities, crime, and criminal justice, as well as collective and interpersonal violence. He is author of articles in *Journal of Criminal Justice*, *Social Science History*, and *Sociological Imagination* and is currently writing a book on patterns of American murder. provide a comprehensive exploration of social problems. UNDERSTANDING SOCIAL PROBLEMS, Tenth Edition, progresses from a micro to macro level of analysis, focusing first on problems related to health care, drugs and alcohols, families, and crime, and then broadening to the larger issues of poverty and inequality, population growth, aging, environmental problems, and conflict around the world. The social problem in each chapter is framed in a global as well as a U.S. context. In addition, the three major theoretical perspectives are applied to the problem under discussion, and its consequences -- as well as alternative solutions -- are explored. Pedagogical features such as The Human Side and Self and Society enable students to grasp how social problems affect the lives of individuals and apply their understanding of social problems to their own lives. With close attention to the spheres of sport and religion as important sites of moral currency, this book draws on media coverage of major cases of hypocrisy, attending to differing meanings and consequences of hypocrisy within the US, France and Iceland. Instances come from scandals within the established churches, as well as cases from the National Collegiate Athletic Association, the Tour de France, and the inquest into the Hillsborough Disaster in the UK. It considers the importance of the context within which moral conduct takes place and the relevance of this for the occurrence of hypocritical action, while exploring also the implications of advances in computer and information technology for controlling messages and monitoring deceit. Identifying the negative effects of the detection of hypocrisy at individual and institutional levels, the author engages with the work of Goffman to argue for the importance of trust in institutions, underlining the necessity of minimizing and correcting hypocritical acts by which this is undermined. A detailed study of hypocrisy and the need for trust, this volume will appeal to scholars and students of sociology with interests in social and moral conduct, sport, religion, Goffman and

A concise, affordable, cutting-edge collection of articles that take a critical constructionist approach to social problems. Featuring 26 in-depth and engaging articles, this reader is an ideal supplement to editor Robert Heiner's textbook, *Social Problems: An Introduction to Critical Constructionism*, Third Edition. This unique anthology is the only social problems reader in which the majority of the selections reflect the conflict perspective; this approach views social problems as the consequence of social and economic inequalities and therefore encourages students to critically analyze American public policy responses to social problems. *Conflicting Interests* is organized into five sections: Thinking about Social Problems, The Economics of Inequality, Social Inequalities, Problems of the Family, Crime and Drugs, and Problems of the Environment. Several articles address the contemporary economic crisis and the role that the media plays in constructing social problems. In addition, many of the essays describe public policies in countries outside of the United States, providing students with

alternative, cross-cultural perspectives and solutions to social problems. Each section begins with an introduction that briefly summarizes the articles and shows how they are interrelated. Each essay concludes with critical thinking questions that are designed to stimulate class discussion and to help students carefully evaluate the issues.

A. Javier Treviño, working with a panel of experts, thoroughly examines all aspects of social problems, providing a contemporary and authoritative introduction to the field. Each chapter is written by a specialist on that particular topic and the unique, contributed format ensures that the research and examples provided are the most current and relevant available. The text is framed around three major themes: intersectionality (the interplay of race, ethnicity, class, and gender), the global scope of many problems, and how researchers take an evidence-based approach to studying problems. Frames social problems and solutions through politics. Macionis's book is the only social problems text that explains how society frames social problems and solutions through politics. The text analyzes social issues and policies, using the concepts of sociological theory and the everyday language of politics. It also helps students understand the attitudes and values

that define the political spectrum in the United States. Once students know how social problems are defined by our society through politics, and how the policies to solve these problems are developed, they can become involved in solving social problems through activism and political involvement. Norman A. Dolch, Linda Deutschmann, and Helen Powell compile a number of critical and innovative essays that explore different aspects of society including mental illness, race relations, terrorism, and family life.

This book---an edited compilation of twenty-nine essays---focuses on the difference(s) that a Christian worldview makes for the disciplines or subject areas normally taught in liberal arts colleges and universities. Three initial chapters of introductory material are followed by twenty-six essays, each dealing with the essential elements or issues in the academic discipline involved. These individual essays on each discipline are a unique element of this book. These essays also

treat some of the specific differences in perspective or procedure that a biblically informed, Christian perspective brings to each discipline. Christian Worldview and the Academic Disciplines is intended principally as an introductory textbook in Christian worldview courses for Christian college or university students. This volume will also be of interest to Christian students in secular post-secondary institutions who may be encountering challenges to their faith---both implicit and explicit---from peers or professors who assume that holding a strong Christian faith and pursuing a rigorous college or university education are essentially incompatible. This book should also be helpful for college and university professors who embrace the Christian faith but whose post-secondary academic background---because of its secular orientation---has left them inadequately prepared to intelligently apply the implications of their faith to their particular academic specialty. Such specialists, be they professors or upper-level graduate students, will

find the extensive bibliographies of recent scholarship at the end of the individual chapters particularly helpful. "Downey and Porter present a unique contribution to the perennial question of how faith interacts with the academic disciplines. Numerous factors contribute to this book's significance: the common conviction that one's Christian beliefs ought to shape the contents of one's teaching, the variety of perspectives and opinions, and the wide range of academic disciplines under discussion. The essays---originating among the excellent faculty of Trinity Western University---will deservedly be much used in undergraduate colleges and universities."---Hans Borsma J.I. Packer Professor of Theology, Regent College "Few faculty, Christian or otherwise, understand what their colleagues in other departments are doing or why. **'Simultaneous invention' has become commonplace in the natural sciences, but is still virtually unknown within the sphere of social science. The convergence of two highly compatible versions of Critical Realism from two independent sources is a striking exception. Pierpaolo Donati's Relational Sociology develops 'upwards' from sociology into a Realist meta-theory, unlike Roy Baskhar's philosophy of science that works 'downwards' and 'underlabours' for the social sciences. This book systematically introduces Donati's Relational Sociology to an English readership for the first time since he began to advance his approach thirty years ago. In this eagerly awaited book, Pierpaolo Donati shifts the focus of sociological theory onto the relational order at all levels. He argues that society is constituted by the relations people create with one another, their emergent properties and powers, and internal and external causal effects. Relational Sociology provides a distinctive variant upon the Realist theoretical conspectus, especially because of its ability to account for social integration. Macionis also provides students with the most current sociological research, including hundreds of new research citations, as well as recent data from Census 2000 to present a cutting-edge picture of life both in the United States and around the world.

In *Miseducating Americans*, Richard F. Hamilton examines accounts of American history appearing in textbooks and popular accounts and compares these with the reports contained in scholarly monographs. The task: to determine how certain myths and misconstructions became accepted as recorded history. Hamilton provides much needed correction of those misleading accounts. Was America historically the "land of the free?" Not if you take into account slavery, discrimination, and post-Civil War segregation policies. Was America in the late nineteenth century truly expansionist, as American textbooks imply, or did it actually capitalize on unexpected political and economic opportunities, like Russia's desire to rid itself of Alaska? Was the acquisition of the Philippines a zealous profit-seeking effort aiming for "the China market," or the fortuitous consequences of a move against Spain during the Spanish-American War? *Miseducating Americans* debunks many commonly accepted explanations of historical facts. It contends that many accounts are oversimplifications, and some are one-sided depictions of virtue. Hamilton traces the sources of these misconstructions, which mostly come from history textbooks written by authors aiming for "popular audiences." He then offers explanations as to how and why the inaccuracies have been repeated and passed on.

The NEW EDITION of this primary text for advanced

clinical practice courses at the core of the MSW curriculum teaches students how to integrate theory and practice on multiple levels. Highlights of the New Edition: Chapters 6-12 present clinical illustrations through the lenses of specific theoretical models, beginning with a detailed discussion of a theory and moving to assessment and treatment within that conceptual framework. Dialogue illustrates how theory guides practice. Models of intervention are covered in seven chapters (Chapters 7-13). Each chapter presents a clinical illustration of an individual, family, or group and examines them using a specific theoretical model.
