Thus, students gain an appreciably better understanding of the field of sociological social psychology; how and why social psychologists trained in sociology ask particular kinds of questions; the types of research they are involved in; and how their findings have been, or can be, applied to contemporary societal patterns and problems. They go on to examine the relationship between the individual and society in the context of a discussion of discrimination, stereotyping and intergroup relations, conformity and social influence, cohesiveness and intragroup solidarity, language and ethnic group relations, and collective behaviour. Social Identifications fills a gap in the literature available to students of social psychology.
