"Exciting and engaging vocabulary instruction can set students on the path to a lifelong fascination with words. This book provides a research-based framework and practical strategies for vocabulary development with children from the earliest grades through high school. The authors emphasize instruction that offers rich information about words and their uses and enhances students' language comprehension and production. Teachers are guided in selecting words for instruction; developing student-friendly explanations of new words; creating meaningful learning activities; and getting students involved in thinking about, using, and noticing new words both within and outside the classroom. Many concrete examples, sample classroom dialogues, and exercises for teachers bring the material to life. Helpful appendices include suggestions for trade books that help children enlarge their vocabulary and/or have fun with different aspects of words"--

Marcus, a.k.a "w1n5t0n," is only seventeen years old, but he figures he already knows how the system works—and how to work the system. Smart, fast, and wise to the ways of the networked world, he has no trouble outwitting his high school's intrusive but clumsy surveillance systems. But his whole world changes when he and his friends find themselves caught in the aftermath of a major terrorist attack on San Francisco. In the wrong place at the wrong time, Marcus and his crew are apprehended by the Department of Homeland Security and whisked away to a secret prison where they're mercilessly interrogated for days. When the DHS finally releases them, Marcus discovers that his city has become a police state where every citizen is treated like a potential terrorist. He knows that no one will believe his story, which leaves him only one option: to take down the DHS himself. Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological

materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

Kek comes from Africa. In America he sees snow for the first time, and feels its sting. He's never walked on ice, and he falls. He wonders if the people in this new place will be like the winter - cold and unkind. In Africa, Kek lived with his mother, father, and brother. But only he and his mother have survived, and now she's missing. Kek is on his own. Slowly, he makes friends: a girl who is in foster care; an old woman who owns a rundown farm, and a cow whose name means "family" in Kek's native language. As Kek awaits word of his mother's fate, he weathers the tough Minnesota winter by finding warmth in his new friendships, strength in his memories, and belief in his new country. Bestselling author Katherine Applegate presents a beautifully wrought novel about an immigrant's journey from hardship to hope. *Home of the Brave* is a 2008 Bank Street - Best Children's Book of the Year.

The author provides over 60 primary sources organized into 7 thematic units, each structured around an essential question from U.S. history. As students analyze carefully excerpted documents--speeches by presidents and protesters, Supreme Court cases, political cartoons--they build an understanding of how diverse historical figures have approached key issues. At the same time, students learn to participate in civic debates and develop their own views on what it means to be a 21st-century American. Each unit connects to current events and dynamic classroom activities make history come alive. In addition to the documents themselves, this teaching manual provides: strategies to assess

student learning; mini-lectures designed to introduce documents; activities to help students process, display, and integrate their learning; guidance to help teachers create their own units, and more.

Before outsiders arrived, about 100 distinct Indian languages were spoken in California, many of them alive today. Each of these languages represents a unique way of understanding the world and expressing that understanding. Flutes of Fire examines many different aspects of Indian languages: languages, such as Yana, in which men and women have markedly different ways of speaking; ingenious ways used in each language for counting. Hinton discusses how language can retain evidence of ancient migrations, and addresses what different groups are doing to keep languages alive and pass them down to the younger generations.

The 71 tests in this assessment package have been designed around the primary goal of A History of US: understanding information, not memorizing. Each test checks understanding of chapter content, which is coordinated with the teaching guides for each volume of the A History of US set. A portion of the questions assess knowledge of key facts and chronology. The rest of the questions require students to use critical thinking skills such as making comparisons, synthesizing information, and drawing conclusions.

Baseball, basketball, football — no matter the game, Jackie Robinson excelled. His talents would have easily landed another man a career in pro sports, but in America in the 1930s and '40s, such opportunities were closed to athletes like Jackie for one reason: his skin was the wrong color. Settling for playing baseball in the Negro Leagues, Jackie chafed at the inability to prove himself where it mattered most: the major leagues. Then in 1946, Branch Rickey, manager of the Brooklyn Dodgers, decided he was going to break the “rules” of segregation: he recruited Jackie Robinson. Fiercely determined, Jackie faced cruel and sometimes violent hatred and discrimination, but he proved himself again and again, exhibiting courage, restraint, and a phenomenal ability to play the game. In this compelling biography, award-winning author Doreen Rappaport chronicles the extraordinary life of Jackie Robinson and how his achievements won over — and changed — a segregated nation.
