The New Managed Account Solutions Handbook

Everything that we know about the world of finance is changing before us. Innovation is happening constantly, despite the protests of the traditional financial industry. With all the new technology that we have today, it is almost mind-blowing to think about the kind of technology that we will have in another ten years or so. The change is going to keep coming, the only thing we can do is get on board with it. This book introduces the basics of FinTech and equips readers with the knowledge to get on the cutting edge of age we live in today.

This report discusses resource allocation issues that affect patrol operations and demonstrates some of the mechanisms available for resolving them. The authors suggest that managers use the report to select the method most suited to their department's situation. Specifically, the report focuses on calculating the number of patrol officers needed to satisfy departmental service-delivery objectives and distributing those personnel across shifts and geographic boundaries. The report's five chapters are organized to guide the reader through the

processes involved in patrol planning, from issue development through the resolution of single and multiple issues and modification of the patrol plan. Also addressed are the concept and benefits of patrol planning, fundamentals of analyzing a patrol plan, analytical techniques, and key planning steps for resolving resource allocation issues. Exhibits and tables are included. Additional sources of information are appended.

Data Mining: Concepts and Techniques provides the concepts and techniques in processing gathered data or information, which will be used in various applications. Specifically, it explains data mining and the tools used in discovering knowledge from the collected data. This book is referred as the knowledge discovery from data (KDD). It focuses on the feasibility, usefulness, effectiveness, and scalability of techniques of large data sets. After describing data mining, this edition explains the methods of knowing, preprocessing, processing, and warehousing data. It then presents information about data warehouses, online analytical processing (OLAP), and data cube technology. Then, the methods involved in mining frequent
