Managerial Accounting for Managers, 4th edition by Noreen/Brewer/Garrison is based on the market-leading managerial accounting solution, Managerial Accounting, by Garrison, Noreen and Brewer. The Noreen solution presents integrated and proven solutions designed to help attain course goals of student readiness, comprehension of content, and application of key concepts in the managerial accounting course, while addressing the needs of instructors who do not wish to teach the financial accounting-oriented content that is included in the Garrison solution (no debits/credits). Of the three

programs in the Garrison franchise (the Brewer solution, the Garrison solution, and the Noreen solution), the Noreen solution is the most pure management accounting content. The other two programs contain greater coverage of financial accounting topics. **Managerial Accounting for Managers 4e** is geared towards professors who love Garrison's market-leading managerial accounting content but prefer to approach their course by eliminating the debits and credits coverage. The Noreen solution includes the managerial accounting topics such as Relevant Costs for Decision Making, Capital Budgeting Decisions, and Segment Reporting and Decentralization, however, the job-order costing chapter has been extensively rewritten to remove all journal entries. Furthermore, the chapters dealing with process costing, the statement of cash flows, and financial statement analysis have been dropped to enable professors to focus their attention on the bedrocks of managerial accounting—planning, control, and decision making. McGraw-Hill's Connect Accounting offers a complete digital solution combines all the great features of Connect Accounting including McGraw-Hill's SmartBook, powered by LearnSmart, which is designed to help students learn faster and more efficiently, and retain more knowledge for greater success. Products and services will change with demand, but one thing that will always be required for a company's success is having the right people working hard for you. In this accessible and practical playbook, HR expert and author Paul Falcone helps take the guesswork out of this crucial element for success, showing managers how to:

- Identify the best and brightest talent
- Hire for organizational compatibility
- Address uncomfortable workplace situations
- Create an environment that motivates

- Delegate in a way that develops your staff

And much more! Every HR executive has a laundry list of things they wish managers knew--best practices that would enable the entire organization to operate more effectively. The successful management of emergencies and public health crises depends on adequate measures being implemented at all levels of the emergency chain of action, from policy makers to the general population. It starts with appropriate risk assessment, prevention, and mitigation and continues to prehospital and hospital care, recovery, and evaluation. All levels of action require well-thought out emergency management plans and routines based on established command and control, identified safety issues, functional

communication, well-documented triage and treatment policies, and available logistics. All these characteristics are capabilities that should be developed and trained, particularly when diverse agencies are involved. In addition to institutional responses, a robust, community-based disaster response system can effectively mitigate and respond to all emergencies. A well-balanced response is largely dependent on local resources and regional responding agencies that all too often train and operate within "silos", with an absence of interagency cooperation. The importance of this book issue is its commitment to all parts of emergency and public health crisis management from a multiagency perspective. It aims to discuss lessons learned and emerging risks, introduce new ideas about flexible surge capacity, and show the way it can practice multiagency collaboration.

“Blundo and Simon have successfully outlined how a solution-focused perspective can be a powerful tool for case managers. Their understanding and presentation is based upon practice scenarios that are real and applied...They clearly demonstrate the impact of ‘thinking and language’ and the importance of building a collaborative relationship with clients. Their work challenges the traditional theory-driven interventions that focus on problems and arrive at a diagnosis . They encourage a ‘shift’ to a co-constructive partnership that requires a practitioner to respect that clients are ‘experts of their own lives’...They provide a clear step-wise discussion of techniques and strategies that can be employed working with individuals and families in case management settings. This book is a must read.” -Lawrence T. Force, PhD. LCSW-R Professor of Psychology, Mount Saint Mary College, Newburgh, NY From the Foreword Solution-focused practice is a paradigm that stresses client abilities, strengths, and individual goals rather than disability. Written by a team of educator/practitioners noted for their expertise in solution-focused therapy, this “how-to” text for social work, counseling,

and psychology students guides current and future case managers in learning this strengths-based, collaborative approach to case management. It discusses both the philosophical basis for solution-focused casework and demonstrates how it is ideally suited for the case management process. The book is based on teaching materials the authors have developed and used in their classes and workshops with undergraduate and graduate students and professionals. The text incorporates new research and theoretical developments in solution-focused therapy as well as actual practice scenarios demonstrating the process of building a collaborative relationship with individual clients and families. Replete with strategies and tools for practicing solution-focused case management, the text describes such essential skills as identifying goals, monitoring progress, working with other agencies, and transitioning out of treatment. It discusses issues related to ethical practice and presents strategies for self-care. Additionally, the book addresses diversity and social justice and their relationships to solution-focused practice. Student exercises help to reinforce knowledge. The text will assist case managers in a variety of settings—hospitals, nursing homes, rehabilitation facilities,

community-based mental health agencies, schools, prisons, court systems, and shelters for the homeless and victims of domestic violence—to partner with their clients towards finding strengths-based and solution-focused approaches to resolving issues in a positive way. Key Features: Authored by noted experts in solution-focused education and practice Facilitates a reframing of casework and case management around client strengths and resources Provides specific case examples that allow readers to troubleshoot and apply solution-focused principles to practice Includes student exercises throughout the book
