"The study of the Bible is at a vital juncture." Thus begins this merger of a stellar group of scholars of both literary and historical perspectives on the Hebrew Bible: Robert Alter, Baruch Halpern, Shemaryahu Talmon, Jacob Milgrom, Nahum Sarna, and Jack Miles, and edited by Richard Elliott Friedman. In this seminal work they raise questions of conception, technique, and audience, treating of both the Bible's authors and editors. At bottom, the question that all are addressing is: in what way(s) is the study of the Bible different from the study of other literature? Their answers, it should come as no surprise, all have to do with the Bible's special life as sacred literature. Book jacket.

This is the second volume of a trilogy that began with Power vs. Force and will be completed in the year 2002 by the publication of the third volume entitled I: Reality and Subjectivity. The Eye of the I (which calibrates at 950) is more advanced than Power vs. Force (which calibrates at 850) and brilliantly reveals the very core of the spiritual process critical to the state of Enlightenment. The intrinsic power of the information provided in this startling classic is sufficient of itself to elevate the consciousness of the reader. This likelihood has been anticipated and provided for by preparatory recontextualizations. Included are verbatim dialogues with advanced students, instructions, and explanations that illuminate the spiritual teachings. The Eye of the I is a brilliant work that dissolves the barriers between the known and the unknown, between science and spirituality, and between the Newtonian linear paradigm of the ego and the nonlinear reality of Enlightenment. With the resolution of the self, the Self shines forth and reveals one's true identity.
