How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of The Adult Learner has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of The Adult Learner will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

This very successful textbook is distinguished by a superior writing style that draws upon common student experiences to introduce economic concepts, making economic theory more accessible and interesting. Case Studies and numerous examples take advantage of students' intuitive knowledge of economics, building upon real-life situations. A streamlined design places pedagogy and illustrations directly within the flow of the text, making them less distracting and more useful for students. A fully integrated program of technology enhancements sets this text apart by pairing the book with numerous online multimedia learning tools that have been developed to help the text better serve a wide range of learning styles. The text uniquely integrates classroom use of The Wall Street Journal by including in-text pedagogy to help readers learn to analyze the latest economic events as reported in the Journal. The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or

would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News. His film In Debt We Trust warned of the economic meltdown in 2006. He has since written three books on the subject including Plunder: Investigating Our Economic Calamity (Cosimo Books, 2008), and The Crime Of Our Time: Why Wall Street Is Not Too Big to Jail (Disinfo Books, 2011), a companion to his latest film Plunder The Crime Of Our Time. He can be reached online at www.newsdissector.com.

The Global Innovation Index 2020 provides detailed metrics about the innovation performance of 131 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The 2020 edition sheds light on the state of innovation financing by investigating the evolution of financing mechanisms for entrepreneurs and other innovators, and by pointing to progress and remaining challenges - including in the context of the economic slowdown induced by the coronavirus disease (COVID-19) crisis.

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed address addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines include assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including standards, systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and national certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it is also a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

This volume explores the relevance of time travel as a characteristic contemporary way to approach the past. If reality is defined as the sum of human experiences and social practices, all reality is partly virtual, and all experienced and practiced time travel is real. In that sense, time travel experiences are not necessarily purely imaginary. Time travel experiences and associated social practices have become ubiquitous and popular, increasingly replacing more knowledge-orientated and critical approaches to the past. Papers discuss the implications and problems associated with the ubiquity and popularity of time travelling and whether time travel is inherently conservative because of its escapist tendencies, or whether it might instead be considered as a fulfilment of the contemporary Experience or Dream Society. Whatever position one may take, time travel is a legitimate and timely object of study and critique because it represents a particularly significant way to bring the past back to life in the present.

From agriculture to big business, from medicine to politics, The Cigarette Century is the definitive account of how smoking came to be so deeply implicated in our culture, science, policy, and law. No product has been so heavily promoted or has become so deeply entrenched in American consciousness. The Cigarette Century shows in striking detail how one ephemeral (and largely useless) product came to play such a dominant role in so many aspects of our lives—and deaths.

Business Analysis and Valuation has been developed specifically for students undertaking accounting Valuation subjects. With a significant number of case studies exploring various issues in this field, including a running chapter example, it offers a practical and in-depth approach. This second edition of the Palepu text has been revitalised with all new Australian content in parts 1-3, making this edition predominantly local, while still retaining a selection of the much admired and rigorous Harvard case studies in part 4. Retaining the same author team, this new edition presents the field of valuation accounting in the Australian context in a clear, logical and thorough manner.

Packed with real-life examples of business decisions gone awry, the book explores the complex issues of business ethics from the leaders' perspectives. This best-selling text offers a rare collection of readings which examines the business decision-making processes of many types of leaders, while revealing some of the common factors that push them over ethical lines they might not otherwise cross.

Spearhead of Logistics is a narrative branch history of the U.S. Army's Transportation Corps, first published in 1994 for transportation personnel and reprinted in 2001 for the larger Army community. The Quartermaster Department coordinated transportation support for the Army until World War I revealed the need for a dedicated corps of specialists. The newly established Transportation Corps, however, lasted for only a few years. Its significant utility for coordinating military transportation became again transparent during World War II, and it was resurrected in mid-1942 to meet the unparalleled logistical demands of fighting in distant theaters. Finally becoming a permanent branch in 1950, the Transportation Corps continued to demonstrate its capability of rapidly supporting U.S. Army operations in global theaters over the next few years. With useful lessons of high-quality support that validate the necessity of adequate transportation in a viable national defense posture, this text is an important resource for those now involved in military transportation and movement for ongoing expeditionary operations. This text should be useful to both officers and noncommissioned officers who can take examples from the past and apply the successful principles to future operations, thus ensuring a continuing legacy of Transportation excellence within Army operations. Additionally, military science students and military historians may be interested in this volume.

The strategic significance of the Papuan Campaign can be briefly stated. In addition to blunting the Japanese thrust toward Australia and the transpacific line of communications, it put General MacArthur's forces in a favorable position to take the offensive. But this little known campaign is significant for still another reason. It was the battle test of a large hitherto-inexperienced U.S. Army force and its commander under the conditions which were to attend much of the ground fighting in the Pacific. Costly in casualties and suffering, it taught lessons the Army had to learn if it was to cope with the Japanese under conditions of tropical warfare. Samuel Milner holds a graduate degree in history from the University of Alberta and has done further graduate work in political science at the University of Minnesota. During World War II, he served in Australia and New Guinea as a historian with the Air Transport Command, Army Air Forces. Upon completing Victory in Papua he left the Office of the Chief of Military History to become historian of the Air Weather Service, U.S. Air Force.

With these challenges, however, come opportunities to respond. By taking steps to adapt to and mitigate climate change, the risks to society and the impacts of continued climate change can be lessened. The National Climate Assessment, coordinated by the U.S. Global Change Research Program, is a mandated report intended to inform response decisions. Required to be developed every four years, these reports provide the most comprehensive and up-to-date evaluation of climate change impacts available for the United States, making them a unique and important climate change document. The draft Fourth National Climate Assessment (NCA4) report reviewed here addresses a wide range of topics of high importance to the United States and society more broadly, extending from human health and community well-being, to the built environment, to businesses and economies, to ecosystems and natural resources. This report evaluates the draft NCA4 to determine if it meets the requirements of the federal mandate, whether it provides accurate information grounded in the scientific literature, and whether it effectively

communicates climate science, impacts, and responses for general audiences including the public, decision makers, and other stakeholders.
